TRIPP-LITE

SmartOnline S3MT-Series 3-Phase 20kVA Input Isolation Transformer, Delta 480V to 208V Wye, TAA

MODEL NUMBER: S3MT-20K480V

20kVA/kW transformer provides 480V (Delta) to 208V (Wye) step-down and isolation protection to a 3-phase UPS and its load.

Features

Get Complete Step-Down and Isolation Protection and Prevent Power Disruption

Tripp Lite's S3MT-20K480V 20kVA/kW transformer offers line isolation and protection to the connected 3phase UPS system and its load. It isolates the UPS and connected components from line surges and spikes caused by utility power disruptions that can damage equipment or corrupt data. The step-down input isolation transformer is ideal for 4-wire (3Ph+N+PE) IT loads in government, manufacturing, healthcare and corporate settings with a 480V electrical feed and 208/120V equipment.

Performs with High Efficiency up to 96.5%

Not only is the S3MT-20K480V very efficient, with up to 96.5 percent efficiency, but it is also very quiet with a noise profile less than 65 dBA. A built-in circuit breaker on the output side helps prevent dangerous power overloads. Two ball-bearing cooling fans help prevent overheating. An overheat-sensing relay and switch combine with a red LED indicator to provide over-temperature warning and overheating protection.

Small Footprint for Quick Installation in a Compact Space

The compact footprint enables installation of the S3MT-20K480V with minimal space. The rugged stainless steel housing ships ready for immediate installation with a compatible 10–20kVA/kW Tripp Lite S3M-Series 3-phase UPS system.

Highlights

- Recommended for government, manufacturing, healthcare and corporate settings
- Up to 96.5% efficiency with a quiet acoustic profile less than 65 dBA
- Resettable protection relay/switch and red LED indicator warn against overheating
- Rugged stainless steel housing with compact footprint comes ready for installation
- Compatible with 10–20kVA/kW Tripp Lite S3M-Series 3-phase UPS systems

Applications

Protect healthcare, manufacturing, corporate and other IT equipment where the upstream power source is 480V and the load requires a 208V 3-phase UPS

Package Includes

- S3MT-20K480V 3-Phase 20kVA Input Isolation Transformer
- Owner's manual

TRIPP-LITE

Voltage Selection	NONE	
Input Inrush Current	300 A	
VA Rating	20К	
Input Number of Phases	зрн	
AC Output Voltage (V)	120/208V 3-PH Wye	
AC Output Amps	75 A	
Output Number of Phases	3PH + N	
AC Output Configuration	WYE	
Output Isolation	Yes	
Output Breaker Rating	80 A	
Connection Type	TERMINAL BLOCK	
LED Warning Light Functions	The over-temperature warning LED light will turn ON when the output/secondary of the Input transformer reaches 160°C ±5°C and will turn OFF when the corresponding transformer cools down to 125°C ±5°C	
Over Temperature Reset	If the secondary side of the input transformer reaches temperatures of or higher than $160^{\circ}C \pm 5^{\circ}C$, i.e. a range of $155^{\circ}C$ to $165^{\circ}C$ ($311^{\circ}F$ to $329^{\circ}F$), an over-temperature protection relay and thermal switch will activate and will open the breaker on secondary side of the transformer. Once the transformer temperature has cooled down to $125^{\circ}C \pm 5^{\circ}C$, i.e. a range of $120^{\circ}C$ to $130^{\circ}C$ ($248^{\circ}F$ to $266^{\circ}F$) the warning LED light will turn OFF, and you may manually reactivate (close) the output breaker on the transformer to restart normal operation.	
Efficiency @ Half Load	0.965	
Efficiency @ Full Load	0.95	
Heat Dissipation (BTU/Hr) @ Full Load	3413	
Audible Noise (dBA @ 1m)	65dB max
