## MG Chemicals Introduces... 9510 - One-Part Epoxy Potting Compound

### Room Temperature Storage & Long Shelf Life

#### Features and Benefits:

- Up to 12 months shelf life at room temperature
- Minimum cure temperature of 80 °C [176 °F]
- Ready to dispense; no mixing is required
- Broad service temperature of -65 °C to 150 °C
- Extremely high tensile and compressive strength

#### Dispensing Accessories:

- 8DG-30-1
- Regular caulking gun

Our newly formulated 9510 is a one-part epoxy potting compound notable for its low cure temperature and long room temperature shelf life. It does not require cold or frozen storage.

9510 flows smoothly and evenly and provides a simple and easy potting experience by eliminating the time-consuming mixing step of two-part epoxies.

#### Available Sizes:

Cartridge	Net Weight	Format	Dispensing Accessories
9510-30ML	33.6 g [1.18 oz]	Cartridge	8DG-30-1
9510-300ML	336 g [11.8 oz]	Cartridge	See note

**NOTE:** 9510-300ML cartridges are compatible with caulking guns that are readily available for purchase at local hardware stores.
