

- Custom voltage input options.
- Custom temperature options.
- Supports HC-35/U, T0-05, and T0-39

Instrument Part Number: **M05 VV TT**

M05	VV	TT
SERIES	VOLTAGE*	TEMPERATURE**
M05	05 = 5V	35 = 35 °C
	12 = 12V	45 = 45 °C
	15 = 15V	55 = 55 °C
	20 = 20V	65 = 65 °C
	25 = 25V	75 = 75 °C
	28 = 28V	85 = 85 °C
		95 = 95 °C

**Specifications:**

\* Any Voltage from 5V-28V Available

\*\* Any temperature from 35°C-95°C Available

Description	Min	Typ	Max	Unit
Set Temperature: (T <sub>s</sub> )	+35	-	+95	°C
Set Point Tolerance:	-3	-	+3	°C
Temperature Stability: (-30°C ~ (T <sub>s</sub> - 10)°C)	-3	-	+3	°C
Voltage Stability:	-0.5	-	0.5	°C
Supply Voltage: (V <sub>s</sub> )	5	-	28	V
Power: (@ Warm-Up)	-	-	6	W
(Slope)	-	-0.024**	-	W/°C
Voltage Tolerance:	0.9 * V <sub>s</sub>	-	1.1 * V <sub>s</sub>	V
Warm Up: (@ 2 Minutes, 25°C, Referenced to 15 Minutes)	-1	-	1	°C

Supported Crystals/Semi-Conductors:

HC-35/U, T0-05, and T0-39

\* A 10°C buffer between ambient and the set temperature is required so the performance can be maintained.

\*\* To calculate the typical steady state power use the following formula where T<sub>A</sub> is the ambient temperature:

$$P_{SS} = (T_s - T_A) \times 0.024W$$

MARKING  
XXXX = Date Code

Pin #	Function
1	+VDC
2	NC
3	0 VDC

INCH  
mm

\* CRYSTAL CAVITY connected to 0 VDC.
