

1. Overview

The AK1224 is a high linearity and low noise mixer. RF frequency range coverage is from 100 to 900MHz and IF coverage is from 20 to 100MHz. AK1224 can be driven by a single ended RF input and a low-power differential LO input that can be driven with a differential or single ended LO signal. IF output ports are differential open drain outputs. The analog circuit characteristics and power consumption performances can be optimized by the resistance connected to the BIAS Pin.

2. Feature

- Operating Frequency: 100MHz to 900MHz
- Linearity vs. Power selectable architecture:
Current consumption:21mA, IIP3:+16dBm, Gain:5.5dB, NF:8.5dB
- Lo input level: 0dBm \pm 5dB
- Operating Supply Voltage: 4.75 to 5.25 V
- Package: 16pin UQFN(0.5mm pitch, 3mm \times 3mm \times 0.60mm)
- Operating Temperature Range -40 to 85°C

3. Applications

- Two-way Radios (PMR/LMR)
- Radio Communications for disaster prevention
- Marine Radios
- Amateur Radios

6. Pin Function Description

Table 1 Pin Function

No.	Name	I/O	Pin Function	Remarks
1	RFIN	AI	RF Input	Connecting a inductor between this pin and ground.
2	VSS	G	Ground pin	
3	VSS	G	Ground pin	
4	LOINN	AI	Lo Input Negative	
5	LOINP	AI	Lo Input Positive	
6	BIAS1	AIO	Resistance pin for current adjustment	Connecting a resistor between this pin and ground.
7	BIAS2	AIO	Resistance pin for current adjustment	Connecting a resistor between this pin and ground.
8	VDD	P	Power Supply	VDD
9	VDD	P	Power Supply	VDD
10	VDD	P	Power Supply	VDD
11	IFOUTN	AO	IF Output Negative	This pin is open drain output. It needs power feeding via an inductor.
12	IFOUTP	AO	IF Output Positive	This pin is open drain output. It needs power feeding via an inductor.
13	VSS	G	Ground pin	
14	POWER DOWN_H	DI	Power Down control pin	High : Power OFF Low : Power ON
15	BIAS SELECT	DI	Bias Resistance select pin	High : Bias2 pin is enable Low : Bias1pin is enable
16	VSS	G	Ground pin	

Note) The exposed pad at the center of the backside should be connected to ground.

AI: Analog input pin	AO: Analog output pin	AIO: Analog I/O pin
P: Power supply pin	G: Ground pin	DI: Digital input pin

7. Absolute Maximum Ratings

Table 2 Absolute Maximum Ratings

Parameter	Symbol	Min.	Max.	Unit	Remarks
Supply Voltage	VDD	-0.3	5.5	V	
RF Input Power	RFPOW		12	dBm	
LO Input Power	LOPOW		12	dBm	
Storage Temperature	Tstg	-55	125	°C	

Exceeding these maximum ratings may result in damage to the AK1224. Normal operation is not guaranteed at these extremes.

1. Recommended Operating Range

Table 3 Recommended Operating Range

Parameter	Symbol	Min.	Typ.	Max.	Unit	Remarks
Operating Temperature	Ta	-40		85	°C	
Supply Voltage	VDD	4.75	5	5.25	V	

The specifications are applicable within the recommended operating range (supply voltage/operating temperature).

8. Electrical Characteristics

1. Analog Circuit Characteristics

Unless otherwise noted IF output=50MHz, Lo Input Level=-5dBm to +5dBm,
Output Load Resistor (R_{Load})=2.2k Ω , VDD=4.75 to 5.25V, Ta=-40°C to 85°C

Parameter	Min.	Typ.	Max.	Unit	Remarks
RF Input Frequency	100		900	MHz	
Lo Input Frequency	100		900	MHz	
IF output Frequency	20		100	MHz	
Lo Input Power	-5	0	+5	dBm	
Current Adjustment Resistor(BIAS)	22		100	k Ω	
IDD (BIAS=22k Ω)	20	26	36	mA	The total current of VDD pin, IFOUTP pin and IFOUTN pin.
IDD (BIAS=27k Ω)	16	21	30	mA	
IDD (BIAS =100k Ω)	4.5	6	8.5	mA	
IDD (POWERDOWN_H=VDD)		1	10	μ A	
RFIN=600MHz, Current Adjustment Resistor=27kΩ					
Conversion Gain	3.5	5.5	7.5	dB	
SSB Noise Figure		8.5	11	dB	Design guarantee value
IP1dB	-3	0		dBm	
IIP3	13	16		dBm	

2. Digital Circuit Characteristics

This table is for **POWER DOWN_H** pin and **BIAS SELECT** pin.

Parameter	Symbol	Conditions	MIN	TYP	MAX	Unit	Remark
High level input voltage	V _{ih}		0.8×VDD			V	
Low level input voltage	V _{il}				0.2×VDD	V	
High level input current	I _{ih}	V _{ih} = VDD=5.25V	-1		1	μ A	
Low level input current	I _{il}	V _{il} = 0V, VDD1=5.25V	-1		1	μ A	

9. Typical Performance

Unless otherwise noted, RF input =600MHz, Lo input =550MHz, IF output =50MHz,
Output Load Resistor (R_{Load})=2.2kΩ

8. Leakage

RFIN=600MHz,-20dBm, LO input=550MHz,0dBm, RLoad=2.2kΩ, Ta=25°C VDD=5V

Parameter	BIAS	Typ.	Unit
RF – LO Leakage	22kΩ	-60	dBc
	100kΩ	-58	dBc
RF – IF Leakage	22kΩ	-59	dBc
	100kΩ	-60	dBc
LO – RF Leakage	22kΩ	-52	dBc
	100kΩ	-55	dBc
LO – IF Leakage	22kΩ	-57	dBc
	100kΩ	-56	dBc

10. Typical Evaluation Board Schematic

1. Typical Evaluation Board Schematic

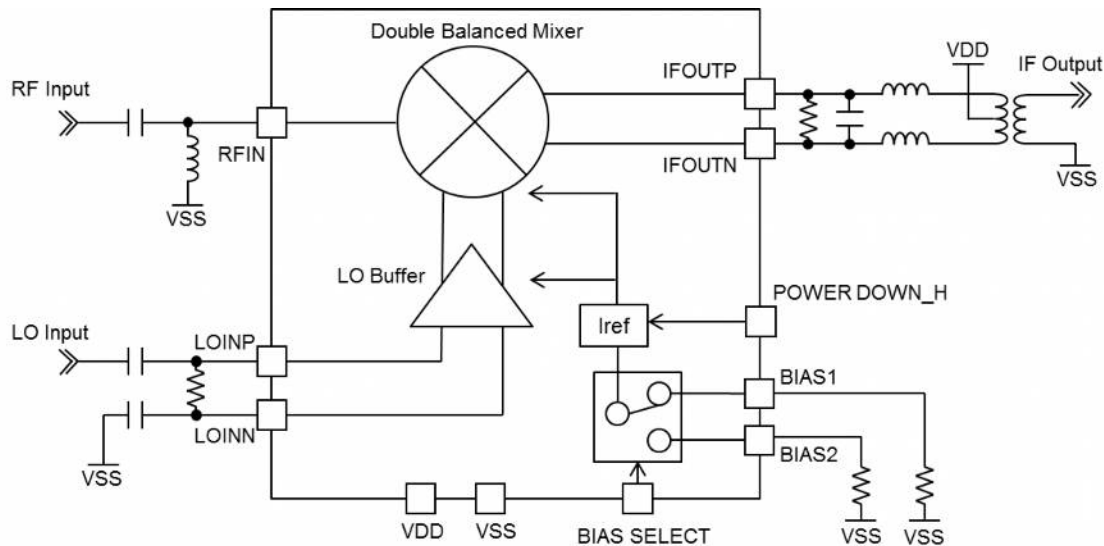

Figure 10. Typical Evaluation Board Schematic

- Note) The exposed pad at the center of the backside should be connected to ground.
- Note) The open drain output needs power feeding via an inductor. (IFOUTP pin and IFOUTN pin)
- Note) It is necessary to adjust impedance matching as to its setting frequency. (RF input and IF output)

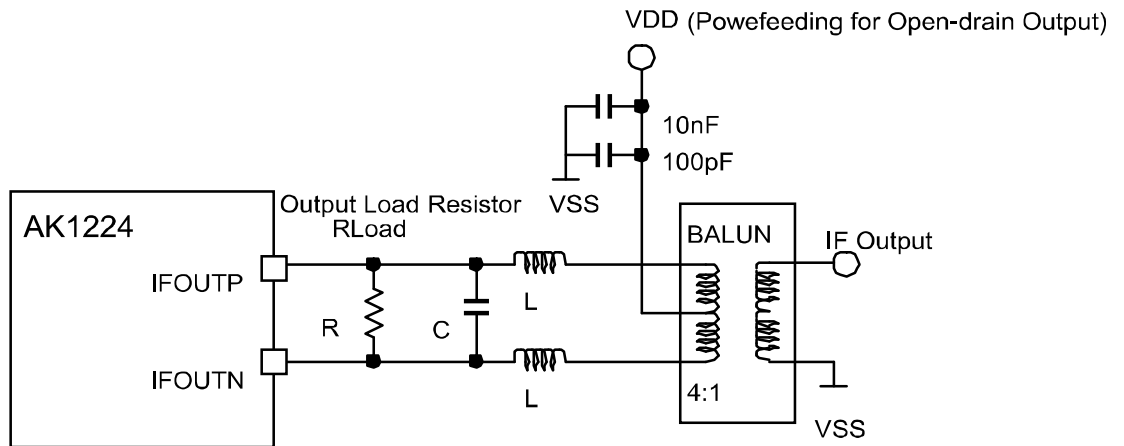

2. Example of impedance matching

•RFIN

Frequency[MHz]	C1[pF]	L[nH]	Impedance[ohm]
100	68	220	49.3 - j5.4
600	15	22	48.3 - j0.7
900	12	12	44.48 - j1.0

·IFOUT

Frequency [MHz]	R1 [kohm]	C [pF]	L [nH]	Impedance[ohm]
20	2.2	10	2200 ^{*1}	51.2 – j11.6
50	2.2	3.3	1000 ^{*1}	51.6 – j0.6
100	2.2	1.2	470 ^{*1}	48.6 – j5.7

*1)Murata LQW series

·LOINP/LOINN

11. LSI Interface schematic

No.	Name	I/O	Function
1	RFIN	I	RF Input pin 
4	LOINN	I	LO Input pins 
5	LOINP		
6	BIAS1	I/O	Analog I/O pins 
7	BIAS2		
11	IFOUTN	O	IF Output pins 
12	IFOUTP		

14	Power Down_H	I	Digital Input pins
15	BIAS Select		

12. Application Information

• Impedance matching network with LC

Figure 11. Impedance matching network with LC

Impedance matching network with LC is shown in Figure 11. AK1224 has open drain outputs, so $RL1 + RL2$ is output load resistance. C11 and L11 compose lowpass filter. C12 and L12 are for highpass filter. C13 is DC blocking capacitor and L13 is RF choke. IFOUTP and IFOUTN pins need power feeding via L11, L12 and L13.

The differential voltage from IFOUTP/N can be converted to a single-ended by L11, L12, C11 and C12 properly. The differential impedance ($RL1 + RL2$) is converted to single-ended output terminating impedance R_o .

L11, C11, L12 and C12 are calculated as below. f_{out} is IF output frequency.

$$C_{11} = C_{12} = \frac{1}{2\pi * f_{OUT} * \sqrt{(R_{L1} + R_{L2}) * R_o}}$$

$$L_{11} = L_{12} = \frac{\sqrt{(R_{L1} + R_{L2}) * R_o}}{2\pi * f_{OUT}}$$

For example, in the case of IF Output = 50MHz, Output Load Resistor (R_{load}) = 2.2k Ω in 50 Ω interface, L11, C11, L12 and C12 are calculated as below.

$$C_{11} = C_{12} = \frac{1}{2\pi * (50 * 10^6) * \sqrt{(2.2 * 10^3) * 50}} = 9.6\text{pF}$$

$$L_{11} = L_{12} = \frac{\sqrt{(2.2 * 10^3) * 50}}{2\pi * (50 * 10^6)} = 1056\text{nH}$$

L13 and C13 should be large enough not to affect the impedance at IF output frequency. In some cases the impedance matching can be optimized by L13 and C13.

For example, in the case of IF Output = 50MHz, Output Load Resistor (Rload) = 2.2kΩ in 50Ω interface, it is recommended to choose 2200nH and 1000pF as L13 and C13. If any correction is needed, it can be adjusted by reducing the value of L13 and C13.

These calculated values are approximation. In some cases, some correction is needed due to the effect of parasitic capacitance of external parts or/and PCBs. The impedance matching network components should be decided through enough evaluation on AK1224

Typical Performance using impedance matching network with LC is below. RF Input = 600MHz, IF Output = 50MHz, LO Input = 550MHz, Output Load Resistor (Rload) = 2.2kΩ, Vdd = 5V, Ta = 25°C, LO Input Level = 0dBm, Current Adjustment Resistor=27kΩ.

Ref.	Value	Size	Part Number
RL1, RL2	1.1kΩ	1005	KOA RK73K1ETP112
L11, L12	1000nH	2012	Murata LQW21HN1R0J00
C11, C12	10pF	1005	Murata GRM1552C1H100JA01
L13	2200nH	2012	Murata LQW21HN2R2J00
C13	150pF	1005	Murata GRM1552C1H151JA01

Parameter	Min.	Typ.	Max.	Unit
Conversion Gain		5.1		dB
SSB Noise Figure (NF)		8.6		dB
IP1dB		2.0		dBm
IIP3		16.3		dBm

The phase and amplitude balance is achieved at IF Output frequency by using impedance matching network with LC. The port-to-port leakage is improved with the phase and amplitude balance is achieved at RF, LO, and IF frequency with wide band balun.

0. Asahi Kasei Microdevices Corporation (“AKM”) reserves the right to make changes to the information contained in this document without notice. When you consider any use or application of AKM product stipulated in this document (“Product”), please make inquiries the sales office of AKM or authorized distributors as to current status of the Products.
1. All information included in this document are provided only to illustrate the operation and application examples of AKM Products. AKM neither makes warranties or representations with respect to the accuracy or completeness of the information contained in this document nor grants any license to any intellectual property rights or any other rights of AKM or any third party with respect to the information in this document. You are fully responsible for use of such information contained in this document in your product design or applications. **AKM ASSUMES NO LIABILITY FOR ANY LOSSES INCURRED BY YOU OR THIRD PARTIES ARISING FROM THE USE OF SUCH INFORMATION IN YOUR PRODUCT DESIGN OR APPLICATIONS.**
2. The Product is neither intended nor warranted for use in equipment or systems that require extraordinarily high levels of quality and/or reliability and/or a malfunction or failure of which may cause loss of human life, bodily injury, serious property damage or serious public impact, including but not limited to, equipment used in nuclear facilities, equipment used in the aerospace industry, medical equipment, equipment used for automobiles, trains, ships and other transportation, traffic signaling equipment, equipment used to control combustions or explosions, safety devices, elevators and escalators, devices related to electric power, and equipment used in finance-related fields. Do not use Product for the above use unless specifically agreed by AKM in writing.
3. Though AKM works continually to improve the Product’s quality and reliability, you are responsible for complying with safety standards and for providing adequate designs and safeguards for your hardware, software and systems which minimize risk and avoid situations in which a malfunction or failure of the Product could cause loss of human life, bodily injury or damage to property, including data loss or corruption.
4. Do not use or otherwise make available the Product or related technology or any information contained in this document for any military purposes, including without limitation, for the design, development, use, stockpiling or manufacturing of nuclear, chemical, or biological weapons or missile technology products (mass destruction weapons). When exporting the Products or related technology or any information contained in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. The Products and related technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
5. Please contact AKM sales representative for details as to environmental matters such as the RoHS compatibility of the Product. Please use the Product in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. AKM assumes no liability for damages or losses occurring as a result of noncompliance with applicable laws and regulations.
6. Resale of the Product with provisions different from the statement and/or technical features set forth in this document shall immediately void any warranty granted by AKM for the Product and shall not create or extend in any manner whatsoever, any liability of AKM.
7. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of AKM.
