

# MultiTech xDot<sup>®</sup>

## Long Range LoRa<sup>®</sup> Module

arm MBED

MultiTech xDot<sup>®</sup> is a secure, end-certified, Arm<sup>®</sup> Mbed<sup>™</sup> programmable, low-power RF module, that provides long-range, low bit rate M2M data connectivity to sensors, industrial equipment and remote appliances.

The xDot is LoRaWAN<sup>®</sup> 1.0.4 compliant, providing bi-directional data communication up to 10 miles / 15 km line-of-sight and 1-3 miles / 2 km into buildings\*\*, using sub-GHz ISM bands in North America, Europe, Australia (AU915), Asia Pacific (AS923), India (IN865) and Korea (KR920).

xDots bring intelligence, reduced complexity and a lower overall bill of material cost to the very edge of the network while supporting a variety of electronic interfaces to connect just about any “Thing” for years on battery power.

### BENEFITS

- Range of miles
- Deep in-building penetration
- Developer friendly
- Runs for years on batteries

### FEATURES

- End-certified for use in North America, Europe, Australia, Japan, Korea & India
- LoRaWAN Certified<sup>™</sup>
- Unicast & Multicast message support
- Multiple I/O interfaces for most any “Thing”
- Data rates 293bps-20Kbps+ LoRa<sup>®</sup>
- Listen-Before-Talk (LBT) enabled in Japan & Korea models

## SPECIFICATIONS

| Models  | MTXDOT-AS1  | MTXDOT-AU1  | MTXDOT-EU1  |
|---|---|---|---|
| Region/Country  | Asia Pacific (**)   | Australia   | Europe  |
| LoRa Radio Frequency Plan   | AS920-923 ("AS1")   | AU915-928   | EU863-870   |
| Listen-Before-Talk (LBT) Enabled  | No  |   |   |
| Channel Capacity  | 8-channels  |   |   |
| Range   | Up to 10 miles (15 km) line of sight<br>1 - 3 miles (2km) into buildings  |   |   |
| Communication   | LoRaWAN 1.0.4 compliant, Class A and Class C<br>Arm Mbed libraries or AT commands for radio control   |   |   |
| Interfaces  | Up to 19 Digital I/O, 10 Analog Inputs, 2 DAC Outputs, I2C, SPI, Wake Pin, Reset Pin,<br>Full UART, MBED / simple UART (RX & TX only),<br>MBED Programming Interface                  |   |   |

| Max Effective Isotropic Radiated Power (EIRP) | 16 dBm   | 36 dBm  | 36 dBm  | 36 dBm  |

(\*) Calculation assumes two 0 dBi antennas.

North America: Greater link budget possible with higher gain antennas.

Europe: This is the maximum link budget.

Note: Point-to-Multipoint utilizing MultiTech Conduit Gateway with MTAC-LORA accessory card.

### Antenna Connector Options

-A00 Models U.FL and Trace (ULF/TRC)

-A01 Models Trace only (TRC)

### Environmental

Operating Temperature -40° C to +85° C (-40° F to +185° F)

Storage Temperature -40° C to +85° C (-40° F to +185° F)

Relative Humidity 20% to 90% RH noncondensing

## EDGE INTELLIGENCE

The MultiTech xDot® is Arm® Mbed™ compatible meaning applications can be written and compiled quickly online using developer friendly libraries, downloaded and hosted within the xDot. Decision making and control is distributed to the edge, enabling data to be more actionable without the heavy lift required to optimize RF performance, implement complex IoT middleware and security protocols needed to deploy a low touch install. In addition, xDots come from the factory with AT command firmware preloaded. This means you can use the xDot as an AT command driven LoRa modem. No custom software development for the xDot is needed when operating in this mode.

## HIGHLIGHTS

### Applications

- Securely manage and harvest sensor data
- Control and monitor remote assets and devices
- Low power for 10+ year battery performance

### Operating Modes

- Developer friendly Arm Mbed libraries provides customization capability for specific applications
- Comprehensive AT command instruction set

xDot LGA  
Family Footprint

## DEVELOPER KIT

The MultiTech xDot (MTMDK-XDOT) Micro Developer Kit is a USB dongle that allows a developer to plug in a MultiTech xDot (MTXDOT-XXX) and start developing their application. Its portable design makes it ideal for connecting to a laptop and doing range testing of the LoRa network. This kit includes a development board, xDot, integrated LoRa antenna and Quick Start Guide.

## YOU MAY ALSO BE INTERESTED IN: MULTITECH CONDUIT® FAMILY

MultiTech Conduit® family of products is the industry's most configurable, manageable, and scalable cellular communications gateways for industrial IoT applications. Network engineers can remotely configure and optimize their Conduit performance through DeviceHQ®, the world's first IoT Application Store and Device Management platform.

The award-winning Conduit series comes in three variants designed to address specific IoT gateway use cases:

- **MultiTech Conduit:** Indoor industrial gateway, ideal for environments that require metal casing for protection against particles and debris and require an industrial temperature range.
- **MultiTech Conduit IP67 Base Station:** Outdoor IP67-rated gateway ideal suited for performing in harsh environments such as rain, snow, extreme heat, and high winds.
- **MultiTech Conduit AP:** Indoor access point ideal for commercial environments (e.g., hotels, offices, retail facilities) to deepen LoRa coverage in difficult to reach places where cell tower or rooftop deployments may not perform as well.

### Services & Warranty

MultiTech's comprehensive Support Services programs offer a full array of options to suit your specific needs. These services are aimed at protecting your investment, extending the life of your solution or product, and reducing total cost of ownership. Our seasoned technical experts, with an average tenure of more than 10 years, can walk you through smooth installations, troubleshoot issues and help you with configurations.

### Technical Support Services

At MultiTech, we're committed to providing you personalized attention and quality service while providing you a quick response to your product support needs. We have several options of support for you to choose from.

For additional information on Support Services as well as other service offerings, please contact your MultiTech representative or visit [www.multitech.com/support.go](http://www.multitech.com/support.go)
