## 5.1-5.9 GHz 802.11ac WLAN Power Amplifier

---

### Features

- 50Ω input and output match including DC blocks
- Integrated harmonic filter
- Operating voltage:  $V_{CC} = 5.0V$
- Operating frequency: 5.1 to 5.9 GHz
- High linear output power, typical performance:
  - 802.11a OFDM Spectrum mask compliant up to 24 dBm
  - 802.11n HT40 OFDM Spectrum mask compliant up to 23 dBm
  - 3% EVM up to 20 dBm for 802.11a, 54 Mbps signal
  - 2.5% EVM up to 19 dBm for 802.11n, HT40
  - 1.8% EVM up to 18 dBm for 802.11ac, MCS9, 80 MHz BW (bandwidth) signal
- Gain: Typically 31 dB gain across 5.1–5.9 GHz
- Idle current: Typically ~320 mA  $I_{CQ}$
- High-speed power-up/down
  - Turn on/off time (10%-90%) <100 ns
- Shut-down current (~2  $\mu A$ )
- On-chip power detection
  - >20 dB linear dynamic range
  - VSWR insensitive
- All devices are RoHS compliant

### Applications

- WLAN (IEEE 802.11a/n/ac)
- HyperLAN2
- Multimedia

### Product Description

SST11CP22 is a 50Ω, RF-matched Power Amplifier Module (PAM) with a FCC-compliant, harmonic filter that is based on the highly-reliable InGaP/GaAs HBT technology.

Operating over the 5.1–5.9 GHz frequency band, SST11CP22 meets 802.11a spectrum mask requirements up to 24 dBm and 802.11n HT40 spectrum mask at 23 dBm. With 802.11a modulation, this PA typically provides up to 20.5 dBm with 3% EVM, and provides 18 dBm with less than 1.8% dynamic EVM using 802.11ac modulation, MCS9, 80 MHz bandwidth.

This power amplifier module also features easy board-level operation, with a simple application circuit requiring only four external components. With its high-speed power-up/-down control, SST11CP22 is controllable directly from the base-band chip.

SST11CP22 also features a wide dynamic-range, linear power detector that is temperature-stable and VSWR-insensitive.

SST11CP22 is offered in 20-contact QFN package. See [Figure 2-1](#) for pin assignments and [Table 2-1](#) for pin descriptions.

## TO OUR VALUED CUSTOMERS

It is our intention to provide our valued customers with the best documentation possible to ensure successful use of your Microchip products. To this end, we will continue to improve our publications to better suit your needs. Our publications will be refined and enhanced as new volumes and updates are introduced.

If you have any questions or comments regarding this publication, please contact the Marketing Communications Department via E-mail at [docerrors@microchip.com](mailto:docerrors@microchip.com). We welcome your feedback.

### Most Current Data Sheet

To obtain the most up-to-date version of this data sheet, please register at our Worldwide Web site at:

<http://www.microchip.com>

You can determine the version of a data sheet by examining its literature number found on the bottom outside corner of any page. The last character of the literature number is the version number, (e.g., DS30000000A is version A of document DS30000000).

### Errata

An errata sheet, describing minor operational differences from the data sheet and recommended workarounds, may exist for current devices. As device/documentation issues become known to us, we will publish an errata sheet. The errata will specify the revision of silicon and revision of document to which it applies.

To determine if an errata sheet exists for a particular device, please check with one of the following:

- Microchip's Worldwide Web site; <http://www.microchip.com>
- Your local Microchip sales office (see last page)

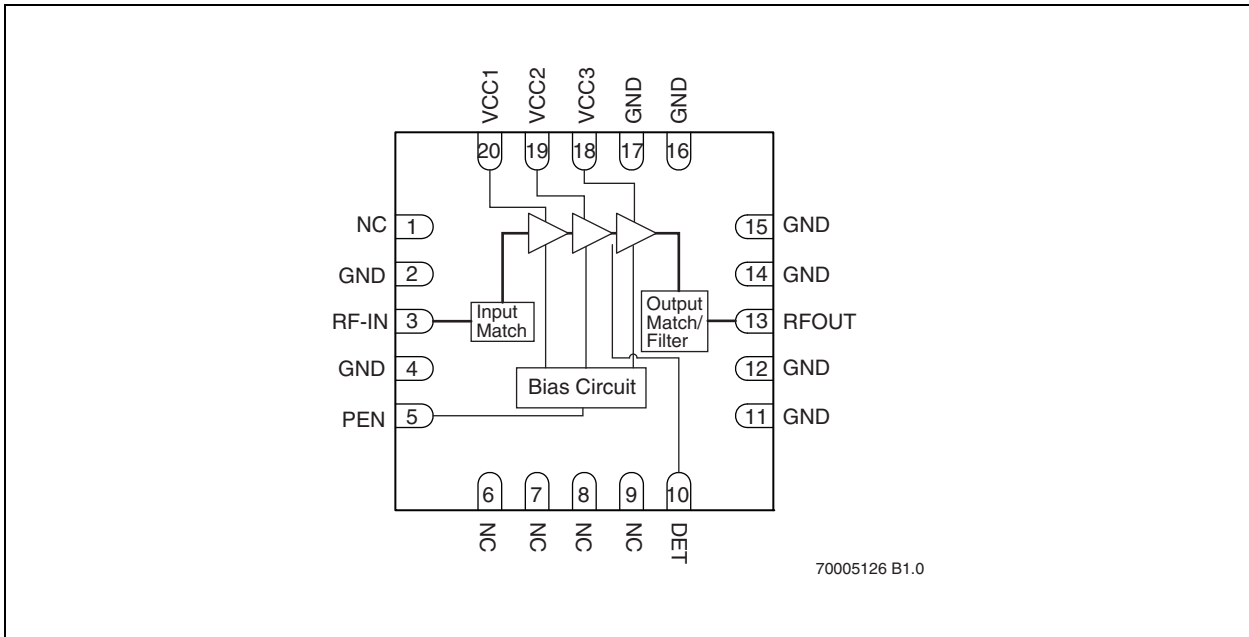

When contacting a sales office, please specify which device, revision of silicon and data sheet (include literature number) you are using.

### Customer Notification System

Register on our web site at [www.microchip.com](http://www.microchip.com) to receive the most current information on all of our products.

| GND    | 15      | Ground                |   |
| GND    | 16      | Ground                |   |
| GND    | 17      | Ground                |   |
| VCC3   | 18      | PA supply             | PA Supply   |
| VCC2   | 19      | PA supply             | PA Supply   |
| VCC1   | 20      | PA supply             | PA Supply   |

### 3.0 ELECTRICAL SPECIFICATIONS

The AC and DC specifications for the power amplifier interface signals. Refer to [Table 3-2](#) for the DC voltage and current specifications. Refer to [Figures 4-1 through 4-7](#) for the RF performance.

**Absolute Maximum Stress Ratings** (Applied conditions greater than those listed under “Absolute Maximum Stress Ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these conditions or conditions greater than those defined in the operational sections of this data sheet is not implied. Exposure to absolute maximum stress rating conditions may affect device reliability.)

|  |                      |
|--|----------------------|
| Supply Voltage at pins 18, 19, and 20 ( $V_{CC}$ ) | -0.3V to +6.5V       |
| Supply voltage to pins 5, 6, and 7 ( $V_{PEN}$ )   | -0.3V to +3.6V       |
| DC supply current ( $I_{CC}$ )                     | 600 mA               |
| Operating Temperature ( $T_A$ )                    | -20°C to +85°C       |
| Storage Temperature ( $T_{STG}$ )                  | -40°C to +120°C      |
| Maximum Junction Temperature ( $T_J$ )             | +150°C               |
| Maximum Output Power                               | 26 dBm               |
| Surface Mount Solder Reflow Temperature            | 260°C for 10 seconds |

**TABLE 3-1: OPERATING RANGE**

| Range      | Ambient Temp   | $V_{CC}$  |
|------------|----------------|-----------|
| Industrial | -10°C to +85°C | 5.0V-6.0V |

**TABLE 3-2: DC ELECTRICAL CHARACTERISTICS**

| Symbol    | Parameter   | Min. | Typ  | Max. | Unit    |
|-----------|---|------|------|------|---------|

## THE MICROCHIP WEB SITE

Microchip provides online support via our WWW site at [www.microchip.com](http://www.microchip.com). This web site is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the web site contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

## CUSTOMER CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip web site at [www.microchip.com](http://www.microchip.com). Under "Support", click on "Customer Change Notification" and follow the registration instructions.

## CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or field application engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

**Technical support is available through the web site at: <http://microchip.com/support>**

## 6.0 PRODUCT IDENTIFICATION SYSTEM

To order or obtain information, e.g., on pricing or delivery, refer to the factory or the listed sales office.

| <b>PART NO.</b>     |           | <b>XXX</b>                                       |

 SST11CP22-GN-K

---

**Note the following details of the code protection feature on Microchip devices:**

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as “unbreakable.”

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.
