

**SERIES: PYB30-U | DESCRIPTION: DC-DC CONVERTER**
**FEATURES**

- up to 30 W isolated output
- industry standard pinout
- 4:1 input range (9~36 Vdc, 18~75 Vdc)
- smaller package
- single/dual/triple regulated outputs
- 1,500 Vdc isolation
- continuous short circuit, over current protection, over voltage protection
- temperature range (-40~85°C)
- six-sided metal shielding
- efficiency up to 90%

| MODEL             | input voltage |             | output voltage<br>(Vdc) | output current |              | output power<br>max (W) | ripple and noise <sup>1</sup><br>max (mVp-p) | efficiency<br>typ (%) |

Notes: 1. Ripple and noise are measured at 20 MHz BW by "parallel cable" method with 1 µF ceramic and 10 µF electrolytic capacitors on the output.  
 2. \* Discontinued model.

Note: \*2nF/2kV capacitors for triple output, 48 Vdc input models.

## TEST CONFIGURATION

Figure 2

Table 2

| External components |                              |
|---------------------|------------------------------|
| Lin                 | 4.7µH                        |
| Cin                 | 220µF, ESR < 1.0Ω at 100 kHz |

Note: Input reflected-ripple current is measured with an inductor Lin and Capacitor Cin to simulate source impedance.

## APPLICATION NOTES

### 1. Recommended circuit

This series has been tested according to the following recommended testing circuit before leaving the factory. This series should be tested under load (see Figure 3). If you want to further decrease the input/output ripple, you can increase the capacitance accordingly or choose capacitors with low ESR (see Table 3). However, the capacitance of the output filter capacitor must be appropriate. If the capacitance is too high, a startup problem might arise. For every channel of the output, to ensure safe and reliable operation, the maximum capacitance must be less than the maximum capacitive load (see Table 4).

| 15                | 1100                      | 15              | 680                                    | 5/±15             | 4700/220                               |

Note: 1. For each output.

### 2. Output voltage trimming

Leave open if not used.

Figure 4

Application Circuit for Trim pin  
(part in broken line is the interior of models)

Formula for Trim Resistor

$$\begin{aligned} \text{up: } R_T &= \frac{aR_2}{R_2-a} - R_3 & a &= \frac{V_{ref}}{V_o' - V_{ref}} \cdot R_1 \\ \text{down: } R_T &= \frac{aR_1}{R_1-a} - R_3 & a &= \frac{V_o' - V_{ref}}{V_{ref}} \cdot R_2 \end{aligned}$$

Note: Value for R1, R2, R3, and Vref refer to Table 5  
R<sub>T</sub>: Trim Resistor  
a: User-defined parameter, no actual meanings  
V<sub>o'</sub>: The trim up/down voltage

Table 5

| Vout (Vdc) | R1 (kΩ) | R2 (kΩ) | R3 (kΩ) | Vref (V) |
|------------|---------|---------|---------|----------|
| 5          | 2.883   | 2.864   | 10      | 2.5      |
| 12         | 10.971  | 2.864   | 17.8    | 2.5      |
| 15         | 14.497  | 2.864   | 17.8    | 2.5      |

Note: 1. Minimum load shouldn't be less than 5%, otherwise ripple may increase dramatically. Operation under minimum load will not damage the converter, however, they may not meet all specifications listed.  
2. Maximum capacitive load is tested at input voltage range and full load.  
3. All specifications are measured at Ta=25°C, humidity<75%, nominal input voltage and rated output load unless otherwise specified.

CUI offers a two (2) year limited warranty. Complete warranty information is listed on our website.

CUI reserves the right to make changes to the product at any time without notice. Information provided by CUI is believed to be accurate and reliable. However, no responsibility is assumed by CUI for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

CUI products are not authorized or warranted for use as critical components in equipment that requires an extremely high level of reliability. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
