100118 5-Wide 5, 4, 4, 4, 2 OA/OAI Gate

General Description

The 100118 is a monolithic 5-wide 5, 4, 4, 4, 2 OR/AND gate with true complementary outputs. All inputs have 50 k Ω pull-down resistors and all outputs are buffered.

Ordering Code: See Section 6

Note 1: Absolute maximum ratings are those values beyond which the device may be damaged or have its useful life impaired. Functional operation under these conditions is not implied.

Note 2: Parametric values specified at -4.2V to -4.8V

Note 3: The specified limits represent the "worst case" value for the parameter. Since these "worst case" values normally occur at the temperature extremes, additional noise immunity and guard banding can be achieved by decreasing the allowable system operating ranges.

Note 4: Conditions for testing shown in the tables are chosen to guarantee operation under "worst case" conditions
