

Product Description

The BSW6321 is a reflective SPDT RF switch that can be used in high power and good performance WLAN 802.11 a/b/g/n/ac/ax, DOCSIS 3.0/3.1 and Wireless Communication applications.

This device is packaged in RoHS2-compliant with 1.5mmx1.5mmx0.5mm, 6-lead UDFN package. It must be used with back side ground soldering.

The BSW6321 has robust ESD protection circuits at all pins and temperature performance (operating temperature range : -40 to +105°C).

This switch does not require blocking capacitors. If DC is presented at the RF port, add a blocking capacitor. This device also has a high linearity performance over all temperature range such as IIP3, IIP2.

A functional block diagram is shown in Figure 1.
