

28V Low Power Consumption 150mA Voltage Regulators (with Stand-by Function)

☆AEC-Q100 Grade2

■ GENERAL DESCRIPTION

XD6216 series are positive voltage regulator ICs with 28V of operation voltage. The series consists of a voltage reference, an error amplifier, a current limiter, a thermal shutdown circuit and a phase compensation circuit plus a driver transistor.

The output voltage is selectable in 0.1V increments within the range of 1.8V to 12V using laser trimming technologies.

The output stabilization capacitor (C_L) is also compatible with low ESR ceramic capacitors.

The over current protection circuit and the thermal shutdown circuit are built-in. These two protection circuits will operate when the output current reaches current limit level or the junction temperature reaches temperature limit level.

The CE function enables the output to be turned off and the IC becomes a stand-by mode resulting in greatly reduced power consumption.

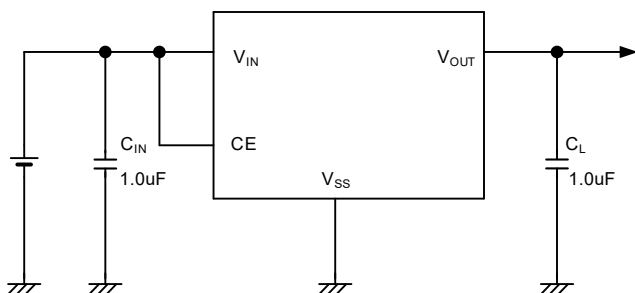

■ APPLICATIONS

- Car navigation systems
- Car audios
- Car-mounted camera
- Other automotive accessories

■ FEATURES

| | |
|-------------------------------|---|
| Max Output Current | : 150mA ($V_{IN}=V_{OUT}+3.0V$) |
| Low Power Consumption | : 5 μ A |
| Stand-by Current | : Less than 0.1 μ A |
| Dropout Voltage | : 190mV@ $I_{OUT}=20mA$ ($V_{OUT}=5.0V$) |
| Input Voltage Range | : 2.0V ~ 28.0V |
| Output Voltage Range | : 1.8V ~ 12.0V (0.1V Step) |
| Fixed Output Accuracy | : $\pm 1\%$ ($V_{OUT} \geq 2.0V$) $\pm 20mV$ ($V_{OUT} \leq 1.9V$) |
| High Ripple Rejection | : 30dB@1kHz |
| Built-in Protection | : Current Limit Thermal Shutdown |
| Output Capacitor | : Ceramic Capacitor Compatible |
| Operating Ambient Temperature | : -40°C ~ 105°C |
| Packages | : SOT-25 : SOT-89-5 |
| Environmentally Friendly | : EU RoHS Compliant, Pb Free |

*Diodes inside the circuit are an ESD protection diode and parasitic diodes.

■ PRODUCT CLASSIFICATION

● Ordering Information

XD6216①②③④⑤⑥-⑦^(*)

| DESIGNATOR | ITEM | SYMBOL | DESCRIPTION |
|---------------------|-------------------------|--------|--|
| ① | TYPE | B | Refer to Selection Guide |
| ②③ | Output Voltage | 18~C0 | For the voltage within 1.8V~9.9V (0.1V increments); e.g. 2.5V ⇒ 25, 5.0V ⇒ 50 For the voltage within 10.0V~12.0V (0.1V increments); e.g. 10.6V ⇒ A6, 11.2V ⇒ B2, 12.0V ⇒ C0 |
| ④ | Output Voltage Accuracy | 1 | ±1% |
| ⑤⑥-⑦ ^(*) | Packages (Order Unit) | MR-Q | SOT-25 (3,000pcs/Reel) |
| | | PR-Q | SOT-89-5 (1,000pcs/Reel) |

^(*) The “-Q” suffix denotes “AEC-Q100” and “Halogen and Antimony free” as well as being fully EU RoHS compliant.

● Selection Guide

| TYPE | CE function |
|------|-------------|
| B | Yes |

■ STANDARD VOLTAGE

● Examples for standard voltage

| V _{OUT} | PACKAGES | |
|------------------|----------------|----------------|
| | SOT-25 | SOT-89-5 |
| 3.3V | XD6216B331MR-Q | XD6216B331PR-Q |
| 5.0V | XD6216B501MR-Q | XD6216B501PR-Q |
| 8.0V | XD6216B801MR-Q | XD6216B801PR-Q |

Output voltages can be set internally from 1.8V to 12.0V. For other voltages, please contact your local Torex sales office or distribution

■ PIN CONFIGURATION

SOT-25
(TOP VIEW)

SOT-89-5
(TOP VIEW)

■ PIN ASSIGNMENT

| PIN NUMBER | | PIN NAME | FUNCTION |
|------------|----------|------------------|--------------------|
| SOT-25 | SOT-89-5 | | |
| 1 | 5 | V _{IN} | Power Supply Input |
| 2 | 2 | V _{SS} | Ground |
| 3 | 4 | NC | No Connection |
| 4 | 3 | CE | ON/OFF Control |
| 5 | 1 | V _{OUT} | Output |

■ FUNCTION

| PIN NAME | DESIGNATOR | IC OPERATION |
|----------|------------|------------------|
| CE | L | Stand-by |
| | H | Active |
| | OPEN | Undefined state* |

* Please avoid the state of OPEN, and make CE Pin arbitrary fixed potential.

■ ABSOLUTE MAXIMUM RATINGS

1) XD6216 Series

T_a=25°C

| PARAMETER | SYMBOL | RATINGS | UNITS |
|---------------------------------------|------------------|---|-------|
| V _{IN} Pin Voltage | V _{IN} | -0.3 ~ 30.0 | V |
| Output Current | I _{OUT} | 300 ^{(*)1} | mA |
| Output Voltage | V _{OUT} | -0.3 ~ V _{IN} +0.3 or 30.0 ^{(*)2} | V |
| CE Input Voltage | V _{CE} | -0.3 ~ 30.0 | V |
| Power Dissipation | Pd | 250 | mW |
| | | 600 (40mm x 40mm Standard board) ^{(*)3} | |
| | | 760 (JESD51-7 board) ^{(*)3} | |
| | | 500 | |
| | | 1300 (40mm x 40mm Standard board) ^{(*)3} | |
| 1750 (JESD51-7 board) ^{(*)3} | | | |
| Operating Ambient Temperature | Topr | -40 ~ 105 | °C |
| Storage Temperature | Tstg | -55 ~ 125 | °C |

All voltages are described based on the V_{SS}.

^{(*)1} Please use within the range of I_{OUT} ≤ Pd / (V_{IN}-V_{OUT})

^{(*)2} The maximum rating corresponds to the lowest value between V_{IN}+0.3V or 30.0V.

^{(*)3} The power dissipation figure shown is PCB mounted and is for reference only.

Please refer to PACKAGING INFORMATION for the mounting condition.

Unless otherwise stated, ($V_{IN}=V_{OUT(T)}+2.0V$).

NOTE:

(1): $V_{OUT(T)}$: Nominal output voltage

(2): $V_{OUT(E)}$: Effective output voltage

(i.e. the output voltage when " $V_{OUT(T)}+2.0V$ " is provided at the V_{IN} pin while maintaining a certain I_{OUT} value.)

(3): $V_{dif} = \{V_{IN1} - V_{OUT1}\}$

V_{OUT1} : $V_{OUT(T)} < 3.0V$, A voltage equal to 98% of the output voltage whenever an amply stabilized $I_{OUT} \{V_{OUT(T)}+3.0V\}$ is input.

V_{OUT1} : $V_{OUT(T)} \geq 3.0V$, A voltage equal to 98% of the output voltage whenever an amply stabilized $I_{OUT} \{V_{OUT(T)}+2.0V\}$ is input.

V_{IN1} : The input voltage when V_{OUT1} appears as input voltage is gradually decreased.

(4): The ambient temperature range ($-40^{\circ}C \leq Ta \leq 105^{\circ}C$) is design Value.

OPERATIONAL EXPLANATION

The voltage divided by resistors R_1 & R_2 is compared with the internal voltage reference by the error amplifier. The P-channel MOSFET which is connected to the V_{OUT} pin is then driven by the subsequent controlled signal. The output voltage at the V_{OUT} pin is controlled and stabilized by a system of negative feedback. The current limit circuit and short protect circuit operate in relation to the level of output current and heat dissipation. Further, the IC's internal circuitry can be shutdown via the CE pin's signal.

* Diodes shown in the above circuit are ESD protection diodes and parasitic diodes

<Low ESR Capacitors>

The XD6216 series needs an output capacitor (C_L) for phase compensation. In order to ensure the stable phase compensation, please place an output capacitor (C_L) of 1.0 μ F or bigger at the V_{OUT} pin and V_{SS} pin as close as possible. For a stable power input, please connect an input capacitor (C_{IN}) of 1.0 μ F between the input pin (V_{IN}) and the ground pin (V_{SS}). Since Input capacitor (C_{IN}), the output capacitor (C_L) are bias dependence of the capacitor the influence of the missing capacity due to temperature characteristics, also there is a risk that cannot be stable phase compensation. Please pay attention to the selection of the capacitor to be used.

<Current limit Protection>

The XD6216 series includes a current fold-back circuit as a current limit protection. When the load current reaches the current limit level, the current fold-back circuit operates and output voltage drops. The output voltage drops further and output current decreases. When the output pin is shorted, a current of about 30mA flows.

<CE Pin>

The IC's internal circuitry can be stand-by via the signal from the CE pin. In stand-by mode, output at the V_{OUT} pin will be pulled down by R_1 and R_2 to the V_{SS} level. Note that as the XD6216 series has no pull down resistor so that it will become unstable with the CE pin open. We suggest that you use this IC with either a V_{IN} voltage or a V_{SS} voltage input at the CE pin. If this IC is used with the correct specifications for the CE pin, the operational logic is fixed and the IC will operate normally. However, supply current may increase as a result of through current in the IC's internal circuitry if a medium voltage is applied.

<Overheating Protection (Thermal Protection)>

The XD6216 series incorporates a thermal shutdown circuit for overheating protection. When the junction temperature of the built-in driver transistor reaches the temperature limit, the thermal shutdown circuit operates and the driver transistor will be set to OFF. The IC resumes its operation when the thermal shutdown function is released and the IC's operation is automatically restored because the junction temperature drops to the level of the thermal shutdown release temperature.

<Minimum Operating Voltage>

For the stable operation of the IC, over 2.0V of input voltage is necessary. The output voltage may not be generated normally if the input voltage is less than 2.0V.

NOTES ON USE

1. For temporary, transitional voltage drop or voltage rising phenomenon, the IC is liable to malfunction should the ratings be exceeded.
2. Where wiring impedance is high, operations may become unstable due to noise and/or phase lag depending on output current. Please strengthen V_{IN} and V_{SS} wiring in particular. The input capacitor (C_{IN}) and the output capacitor (C_L) should be placed to the IC as close as possible with a shorter wiring.
3. Torex places an importance on improving our products and its reliability. However, by any possibility, we would request user fail-safe design and post-aging treatment on system or equipment.

| PACKAGE | OUTLINE / LAND PATTERN | THERMAL CHARACTERISTICS |
|----------|------------------------------|--|
| SOT-25 | SOT-25 PKG | SOT-25 Power Dissipation |
| SOT-89-5 | SOT-89-5 PKG | SOT-89-5 Power Dissipation |

MARKING RULE

● SOT-25 / SOT-89-5

SOT-89-5

SOT-25(Under dot)

① represents the product series

| MARK | VOLTAGE (V) |
|------|----------------|
| K | XD6216****M*-Q |
| M | XD6216****P*-Q |

*MARK "K" is to be Under dot.

② represents the output voltage range

| MARK | Type | VOLTAGE (V) | PRODUCT SERIES |
|------|------------------|-------------|----------------|
| 0 | with CE function | 1.8~3.0 | XD6216B****-Q |
| 1 | | 3.1~6.0 | |
| 2 | | 6.1~9.0 | |
| 3 | | 9.1~12.0 | |

③ represents the output voltage

| MARK | VOLTAGE(V) | | | MARK | VOLTAGE(V) | | | | |
|------|------------|-----|-----|------|------------|-----|-----|-----|------|
| 0 | - | 3.1 | 6.1 | 9.1 | F | - | 4.6 | 7.6 | 10.6 |
| 1 | - | 3.2 | 6.2 | 9.2 | H | - | 4.7 | 7.7 | 10.7 |
| 2 | - | 3.3 | 6.3 | 9.3 | K | 1.8 | 4.8 | 7.8 | 10.8 |
| 3 | - | 3.4 | 6.4 | 9.4 | L | 1.9 | 4.9 | 7.9 | 10.9 |
| 4 | - | 3.5 | 6.5 | 9.5 | M | 2.0 | 5.0 | 8.0 | 11.0 |
| 5 | - | 3.6 | 6.6 | 9.6 | N | 2.1 | 5.1 | 8.1 | 11.1 |
| 6 | - | 3.7 | 6.7 | 9.7 | P | 2.2 | 5.2 | 8.2 | 11.2 |

④,⑤ represents assembly lot number

01 to 09, 0A to 0Z, 11 to 9Z, A1 to A9, AA to AZ, B1 to ZZ repeated (G, I, J, O, Q, W excluded)

Note: No character inversion used.

1. The product and product specifications contained herein are subject to change without notice to improve performance characteristics. Consult us, or our representatives before use, to confirm that the information in this datasheet is up to date.
2. The information in this datasheet is intended to illustrate the operation and characteristics of our products. We neither make warranties or representations with respect to the accuracy or completeness of the information contained in this datasheet nor grant any license to any intellectual property rights of ours or any third party concerning with the information in this datasheet.
3. Applicable export control laws and regulations should be complied and the procedures required by such laws and regulations should also be followed, when the product or any information contained in this datasheet is exported.
4. The product is neither intended nor warranted for use in equipment of systems which require extremely high levels of quality and/or reliability and/or a malfunction or failure which may cause loss of human life, bodily injury, serious property damage including but not limited to devices or equipment used in 1) nuclear facilities, 2) aerospace industry, 3) medical facilities, 4) automobile industry and other transportation industry and 5) safety devices and safety equipment to control combustions and explosions, excluding when specified for in-vehicle use or other uses.
Do not use the product for in-vehicle use or other uses unless agreed by us in writing in advance.
5. Although we make continuous efforts to improve the quality and reliability of our products; nevertheless Semiconductors are likely to fail with a certain probability. So in order to prevent personal injury and/or property damage resulting from such failure, customers are required to incorporate adequate safety measures in their designs, such as system fail safes, redundancy and fire prevention features.
6. Our products are not designed to be Radiation-resistant.
7. Please use the product listed in this datasheet within the specified ranges.
8. We assume no responsibility for damage or loss due to abnormal use.
9. All rights reserved. No part of this datasheet may be copied or reproduced unless agreed by Torex Semiconductor Ltd in writing in advance.
