

The Jonard Tools WTL-12 is a wallbox template specifically designed for cutting out single and double gang boxes. The built-in levels assist in positioning the template so boxes are straight every time.

The WTL-12 is easy to use. Simply locate where you wish to install your wallbox. Place the WTL-12 against the wall and use the level to insure the box is straight. Either hold in place with one hand or the template can be screwed into place using the two holes. Trace the large rectangle for single gang boxes or trace the entire WTL-12 template for double gang boxes. Remove the WTL-12 and cut the wallboard following your traced lines.

WTL-12 is ideally suited to work with Carlon B114R, B12R, single gang boxes, Carlon B225R double gang boxes, Carlon SC100RR low voltage plate, Arlington Industries LVL1 and LVL2 boxes as well as many other brands of single and double gang boxes.

Single gang cutout dimension: 2 1/4" x 3 5/8"

Double gang cutout dimension: 4" x 3 5/8"
