

LTC3888

8-Phase, Dual-Output Synchronous Buck Converter with Power System Management

DESCRIPTION

Demonstration circuit 2652A-A is an 8-phase dual-output, high efficiency, high density, synchronous buck converter with 7V to 14V input range. Each output can supply up to 120A maximum load current with 1V output. The demo board showcases the [LTC®3888](#), which is a PMBus-compliant dual loop 8-phase step-down DC/DC controller with digital power system management. The LTC3888 is designed to work with DrMOS devices that provide an output current sense and temperature monitor. Please refer to LTC3888's data sheet for more detailed information.

DC2652A-A powers up to default settings and produces power based on configuration resistors (or with the setting in its non-volatile memory) without the need for any serial bus communication. This allows easy evaluation of

the DC/DC converter. To fully explore the extensive power system management features of the part, download the GUI software LTpowerPlay™ onto your PC and use ADI's I²C/SMBus/PMBus dongle DC1613A to connect to the board. LTpowerPlay allows the user to reconfigure the part on the fly and store the configuration in EEPROM, view telemetry of voltage, current, temperature and fault status.

GUI Download

The software can be downloaded from:

DEMO MANUAL DC2652A-A

PERFORMANCE SUMMARY

Specifications are at $T_A = 25^\circ\text{C}$

PARAMETER	CONDITIONS	VALUE
Input Voltage Range		7V to 14V
Output Voltage, V_{OUT0}	$V_{IN} = 7$ to 14V, $I_{OUT0} = 0\text{A}$ to 120A	0.3 to 1.8V, Default: 1.0V
Maximum Output Current, I_{OUT0}	$V_{IN} = 7$ to 14V, $V_{OUT0} = 0.3\text{V}$ to 1.8V	120A
Output Voltage, V_{OUT1}	$V_{IN} = 7$ to 14V, $I_{OUT1} = 0\text{A}$ to 120A	0.3 to 1.8V, Default: 1.0V
Maximum Output Current, I_{OUT1}	$V_{IN} = 7$ to 14V, $V_{OUT1} = 0.3\text{V}$ to 1.8V	120A
Typical Efficiency of V_{OUT0}	$V_{IN} = 12\text{V}$, $V_{OUT0} = 1.0\text{V}$, $I_{OUT0} = 120\text{A}$	91.7%
Typical Efficiency of V_{OUT1}	$V_{IN} = 12\text{V}$, $V_{OUT1} = 1.0\text{V}$, $I_{OUT1} = 120\text{A}$	91.7%
Default Switching Frequency		500kHz

QUICK START PROCEDURE

DC2652A-A is easy to set up to evaluate the performance of LTC3888. Refer to Figure 2 for the proper measurement equipment setup and follow the procedure below.

1. With power off, connect the input power supply (7V-14V) to V_{IN} (J1) and GND (J2).
2. Connect the 1.0V output load (Initial load: no load) between V_{OUT0} (J3) and GND (J4).
3. Connect the 1.0V output load (Initial load: no load) between V_{OUT1} (J5) and GND (J6).
4. Connect the DMMs to the input and outputs. Set default jumper position:
 - JP1: ON
 - JP2: EXT
 - JP3: SLAVE
 - JP4: SLAVE
 - SW1: ON
 - SW2: ON
5. Turn on the input power supply and check for the proper output voltages. V_{OUT0} should be $1.0\text{V} \pm 0.5\%$ and V_{OUT1} should be $1.0\text{V} \pm 0.5\%$.
6. Once the proper output voltages are established, adjust the loads within the operating range and observe the output voltage regulation, ripple voltage and other parameters.
7. Connect the dongle and control the output voltages from the GUI. See LTpowerPlay Quick Start Procedure for details.

Note:

1. When measuring the efficiency, it is recommended to monitor the V_{IN} , V_{OUT0} and V_{OUT1} at the locations close to the power stage. Here are examples:
 - (1) Monitor V_{IN} across CIN9 and V_{OUT0} across C_{OUT11} for V_{OUT0} efficiency measurement
 - (2) Monitor V_{IN} across CIN29 and V_{OUT1} across C_{OUT31} for V_{OUT1} efficiency measurement
2. When measuring the output or input voltage ripple, do not use the long ground lead on the oscilloscope probe. Figure 3 for the proper scope probe technique. Short, stiff leads need to be soldered to the (+) and (-) terminals of an output capacitor. The probe's ground ring needs to touch the (-) lead and the probe tip needs to touch the (+) lead.
3. When doing the load transient test, it is recommended to use a function generator to generate a pulse (~3% duty cycle with 10Hz~100Hz frequency). Then applying this pulse to the EXT PULSE (E9) and GND (E10) turrets, the dynamic load circuit will work well to achieve desired load transient test by adjusting the amplitude, rising edge and falling edge of the pulse. Here are examples:
 - (1) Set the amplitude of the pulse to 3.4V for a 0A to 30A load transient test with $10\text{m}\Omega$ I_{OUT} sensing resistor
 - (2) Set the amplitude of the pulse to 3.6V for a 0A to 40A load transient test with $10\text{m}\Omega$ I_{OUT} sensing resistor

QUICK START PROCEDURE

Connecting a PC to DC2652A-A

You can use a PC to reconfigure the power management features of LTC3888 such as: nominal V_{OUT} , margin set

points, OV/UV limits, temperature fault limits, sequencing parameters, the fault log, fault responses, GPIOs and other functionalities. The DC1613A dongle may be plugged when V_{IN} is present.

LTPOWERPLAY SOFTWARE GUI

LTpowerPlay is a powerful Windows based development environment that supports Analog Devices power system management ICs and μ Modules, including LTM4675, LTM4676, LTM4677, LTM4678, LTM4680, LTM4700, LTC3880, LTC3882, LTC3883, LTC3884 and LTC3888. The software supports a variety of different tasks. You can use LTpowerPlay to evaluate Analog Devices ICs by connecting to a demo board system. LTpowerPlay can also be used in an offline mode (with no hardware present) in order to build a multichip configuration file that can be saved and reloaded at a later time. LTpowerPlay provides unprecedented diagnostic and debug features. It becomes a valuable diagnostic tool during board bring-up to program or tweak the power management scheme in a system, or to diagnose power issues when bringing

up rails. LTpowerPlay utilizes the DC1613A USB-to-I²C/SMBus/PMBus controller to communicate with one of many potential targets, including LTM4675, LTM4676, LTM4677, LTM4678, LTM4680, LTM4700, LTC3880, LTC3882, LTC3883, LTC3884 and LTC3888's demo system, or a customer board. The software also provides an automatic update feature to keep the software current with the latest set of device drivers and documentation. The LTpowerPlay software can be downloaded from:

To access technical support documents for ADI's Digital Power System Management Products, visit the LTpowerPlay Help menu.

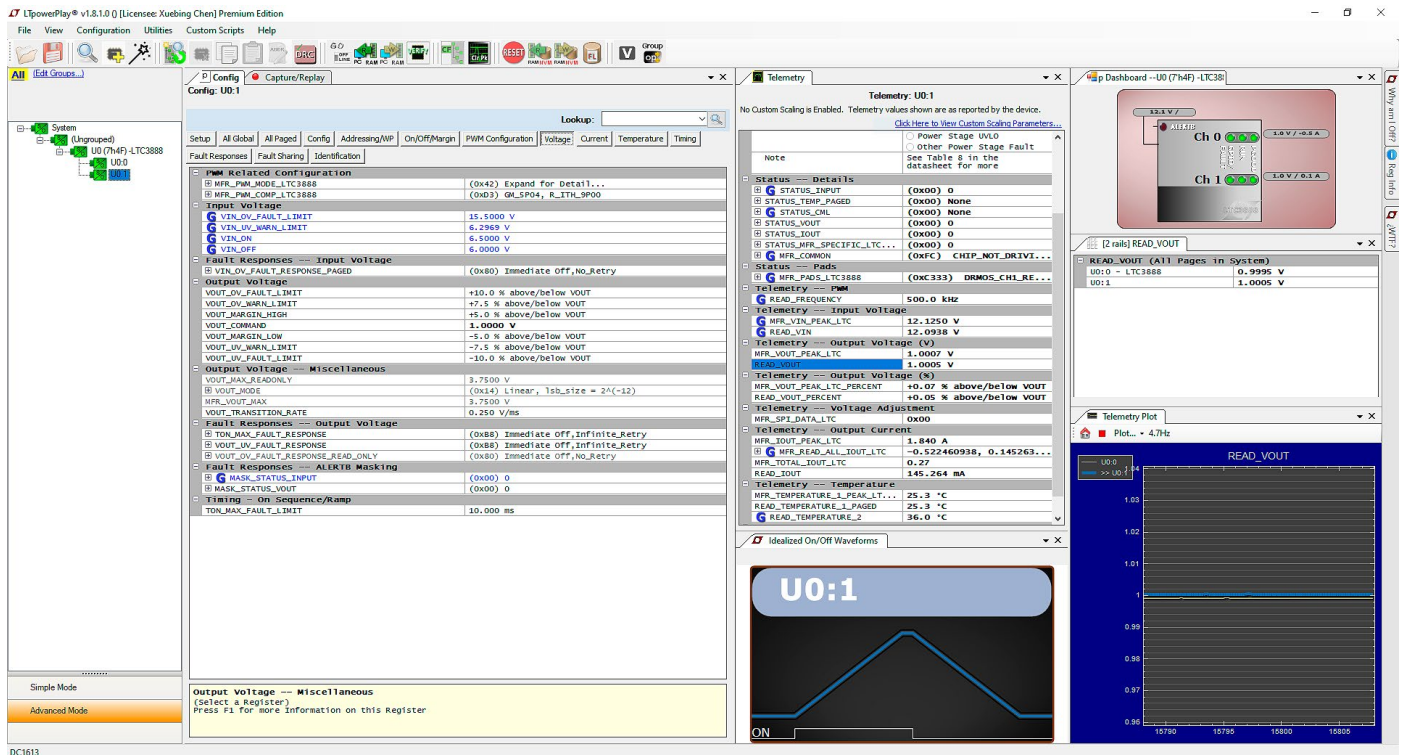

Figure 12. LTpowerPlay Main Interface

DEMO MANUAL DC2652A-A

LTPOWERPLAY QUICK START PROCEDURE

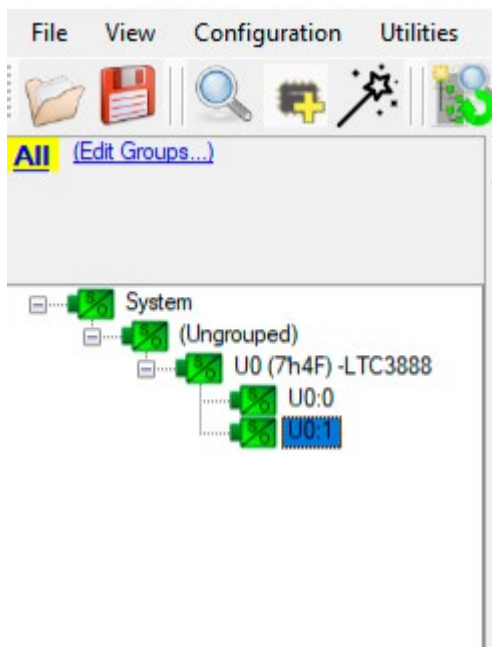

The following procedure describes how to use LTpowerPlay to monitor and change the settings of LTC3888.

1 Download and install the LTpowerPlay GUI:

[here](#)

2. Launch the LTpowerPlay GUI.

a. The GUI should automatically identify the DC2652A-A. The system tree on the left hand side should look like this:

b. A green message box shows for a few seconds in the lower left-hand corner, confirming that LTC3888 is communicating:

c. In the Toolbar, click the “R” (RAM to PC) icon to read the RAM from the LTC3888. This reads the configuration from the RAM of LTC3888 and loads it into the GUI.

d. If you want to change the output voltage to a different value, like 1.8V. In the Config tab, type in 1.8 in the VOUT_COMMAND box, like this:

Then, click the “W” (PC to RAM) icon to write these register values to the LTC3888. After finishing this step, you will see the output voltage will change to 1.8V.

If the write is successful, you will see the following message:

e. You can save the changes into the NVM. In the toolbar, click “RAM to NVM” button, as following

f. Save the demo board configuration to a (*.proj) file. Click the Save icon and save the file. Name it whatever you want.

CUSTOMER NOTICE

ANALOG DEVICES MAKES A BEST EFFORT TO DESIGN A SCHEMATIC FOR THE CUSTOMER'S APPLICATION. OPERATIONAL IN THE FIELD, THE CUSTOMER'S OPERATIONAL REQUIREMENTS, COMPONENTS, AND APPLICATIONS MAY VARY FROM THE SCHEMATIC. ANALOG DEVICES DOES NOT WARRANT THAT THE SCHEMATIC WILL BE COMPLETELY CORRECT OR THAT IT WILL BE COMPLETELY SUITABLE FOR THE CUSTOMER'S APPLICATION. CUSTOMERS ARE RESPONSIBLE FOR VERIFYING THE SCHEMATIC'S APPLICATION AND PERFORMANCE IN THEIR OWN APPLICATIONS.

ESD Caution

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
