

GaAs MMIC DOUBLE-BALANCED HIGH IP3 Mixer, 6 - 12 GHz

Typical Applications

The HMC663LC3 is ideal for:

- Point-to-Point Radios
- Point-to-Multi-Point Radios
- Test Equipment & Sensors
- Military End-Use

Features

- High LO/RF Isolation: 40 dB
- Wide IF Bandwidth: DC - 4 GHz
- Passive Double-Balanced Topology
- Low Conversion Loss: 8 dB
- 16 Lead Ceramic 3x3mm SMT Package: 9mm²

Functional Diagram

General Description

The HMC663LC3 is a general purpose double balanced mixer in a leadless RoHS compliant ceramic SMT package that can be used as an upconverter or downconverter between 6 and 12 GHz. This passive mixer is fabricated in a GaAs MESFET process, requires no DC Bias and no external components or matching circuitry.

The HMC663LC3 provides excellent LO to RF and LO to IF isolation due to optimized balun structures and operates with LO drive levels as low as +17 dBm. The HMC663LC3 eliminates the need for wire bonding, and is compatible with high volume surface mount manufacturing techniques.

Electrical Specifications, $T_A = +25^\circ\text{C}$, $IF = 100\text{ MHz}$, $LO = +21\text{ dBm}$ *

Parameter	Min.	Typ.	Max.	Units
Frequency Range, RF		6 to 12		GHz
Frequency Range, LO		6 to 14		GHz
Frequency Range, IF		DC to 4		GHz
Conversion Loss		8	12	dB
Noise Figure (SSB)		10		dB
LO to RF Isolation	29	40		dB
LO to IF Isolation	27	42		dB
RF to IF Isolation	8	20		dB
IP3 (Input)		30		dBm
IP2 (Input)		55		dBm
1 dB Gain Compression (Input)		20		dBm

*Unless otherwise noted, all measurements performed as downconverter, with high side LO and with $IF = 100\text{ MHz}$.

Pin Descriptions

Pin Number	Function	Description	Interface Schematic
1, 4, 5, 8 - 13, 16	N/C	Not Connected	
2	LO	This pin is AC coupled and matched to 50 Ohms.	
3, 6, 15	GND	These pins and package base must be connected to RF/DC ground.	
7	IF	This pad is DC coupled. For applications not requiring operation to DC, this port should be DC blocked externally using a series capacitor whose value has been chosen to pass the necessary IF frequency range. For operation to DC, this pin must not source or sink more than 2 mA of current or part non-function and possible part failure will result.	
14	RF	This pin is AC coupled and matched to 50 Ohms.

Evaluation PCB

List of Materials for Evaluation PCB 122395 [1]

Item	Description
J1, J2	PCB Mount SMA SRI Connector
J3	PCB Mount SMA Connector
U1	HMC663LC3 Mixer
PCB [2]	122393 Evaluation PCB

[1] Reference this number when ordering complete evaluation PCB

[2] Circuit Board Material: Rogers 4350 or Arlon 25 FR, FR4

The circuit board used in this application should use RF circuit design techniques. Signal lines should have 50 Ohm impedance while the package ground leads and exposed paddle should be connected directly to the ground plane similar to that shown. A sufficient number of via holes should be used to connect the top and bottom ground planes. The evaluation circuit board shown is available from Hittite upon request.
