Description

The ZILOG ZHX1203 for mobile phones, pagers, and PDAs is the smallest, lowest power, and highest functional transceiver in its class.

Communication takes place at the low receive current consumption of 100 μA (typical). The ZHX1203MB features only the low receive current consumption of 100 μA (typical).

The UltraSlim form factor (7.3 mm long x 2.8 mm wide x 1.9 mm high) allows placement in virtually any small device (see Figure 1). Application circuit space is also minimized because only two external components are required.

Figure 1. UltraSlim Form

The ZHX1203 is designed to support IrDA-Data SIR mode, which at 115 Kbits/s provides the capability for the user to share phone numbers, addresses, and notes as well as linking a PC to the internet via a mobile telephone.

The transceiver combines an IRED emitter, a photodiode, and a unique driver/control ASIC in a single package, as shown in Figure 2. The ZILOG ZHX1203 also features a shutdown control that minimizes current draw to 0.1 μA typical.

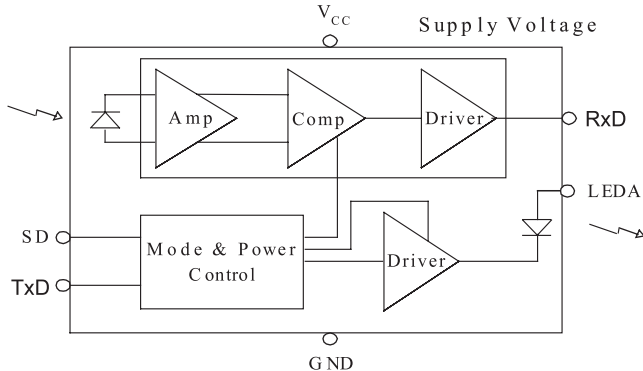

Figure 2. ZHX1203 Block Diagram

Features

- Compliant to IrDA Data Specification 1.4 Low Power SIR (link range: low power to low power—0 to 20 cm; standard power to low power—0 to 30 cm)
- Low-power supply voltage range: 2.4 V to 3.6 V
- ZHX1203MB receive current: 100 μ A (typical)
- UltraSlim package: 7.3 mm long x 2.8 mm wide x 1.9 mm high
- Only two external components
- Extended operating temperature range: $-30\text{ }^{\circ}\text{C}$ to $+85\text{ }^{\circ}\text{C}$
- Internal current source eliminates need for a current-limiting resistor for IR LED
- Meets IEC 825-1 Class 1 eye safety specifications

Pin Description

Table 1 lists the pin out for the ZHX1203 transceiver. The pins are described in this section.

Table 1. ZHX1203 Transceiver Pin Out

Pin	Name	Function	I/O
1	NC	NC (future use)	—
2	V _{CC}	Supply voltage	—
3	GND	Ground	—
4	SD	Shutdown	I
5	RxD	Receiver output	O
6	TxD	Transmitter input	I
7	LEDA	IRED anode	—
—	TAB	Shield connection	—

V_{CC} Positive Supply

(Power)

Connect to positive power supply (2.4–3.6 V). Filter with a 1.0- μ F ceramic bypass capacitor and terminating resistor as close as possible to the V_{CC} pin.

GND Ground

(Power)

Connect to ground of the power supply. A solid ground plane is recommended for proper operation.

SD Shutdown

(Input, active high)

This input is used to place the IC into a shutdown mode.

TxD needs to be driven low to achieve low shutdown current and held low during the transition from shutdown to active to ensure that the circuitry is properly set to communicate.

RxD Receive Data

(Output, active low)

This output provides received serial data. It is a tri-state, slew rate controlled CMOS output (tri-stated during shutdown) driver capable of driving a standard CMOS or LS series TTL load. No external resistor is required.

TxD Transmit Data

(Input, active high)

This CMOS input is used to transmit serial data and has an internal pull-down resistor that is enabled only during shutdown.

LEDA LED Driver

(Power)

This output is internally connected to the LED anode and contains an internal current source. The voltage range on this pad is 2.1–4.2 volts.

TAB Shield Connection

The shield tab must be soldered to ground for proper operation.

Application Block Diagrams

Figure 3 shows the application block diagrams for the ZHX1203 transceiver.

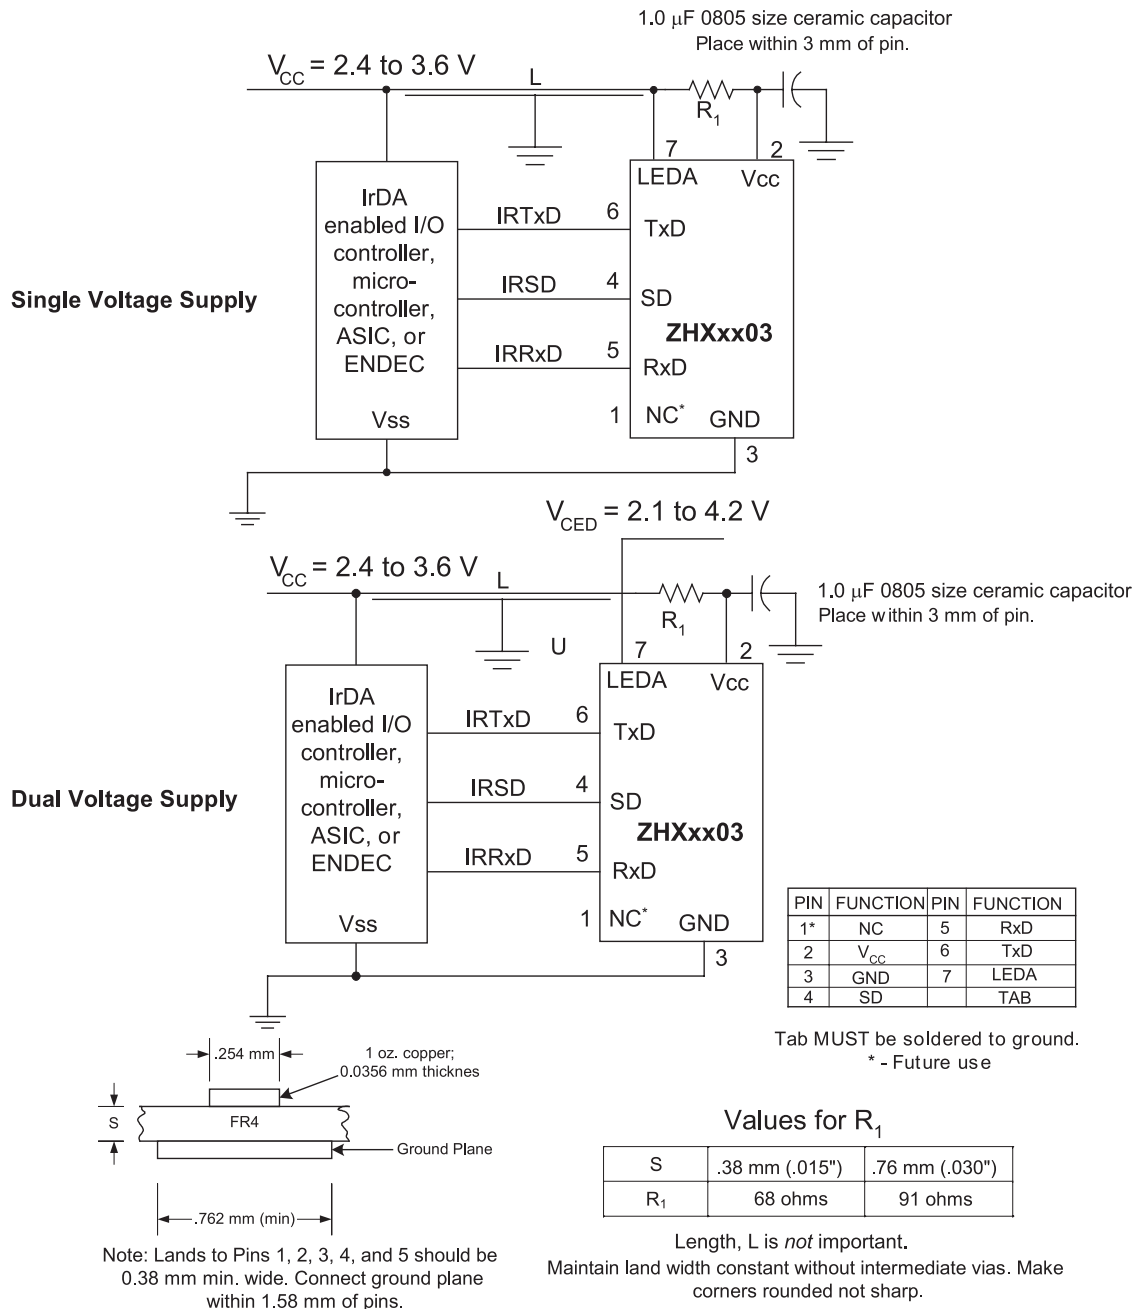

Figure 3. ZHX1203 Application Block Diagrams

Electrical and Timing Specifications

Table 2 through Table 6 list the electrical and timing specifications.

Table 2. Absolute Maximum Ratings

Parameter	Symbol	Min	Max	Unit	Comment
Supply voltage	V_{CC}	-0.3	3.6	V	V_{CC} , GND
Supply voltage	V_{LED}	-0.3	4.4	V	
Input voltage	V_{IN}	GND-0.3	$V_{CC}+0.3$	V	TxD, SD
Output (Ext.) voltage	V_{OUT}	GND-0.3	$V_{CC}+0.3$	V	RxD
Storage temperature	T_{ST}	-40	100	°C	
Solder temperature	T_{SOL}		240	°C	See page 9.
ESD			400	V	

Table 3. Recommended Operating Conditions

Parameter	Symbol	Min	Max	Unit
Supply voltage	V_{CC}	2.4	3.6	V
Supply voltage, LEDA	V_{LED}	2.1	4.2	V
Ambient operating temperature	T_{OP}	-30	85	°C

Table 4. Receiver Electrical Characteristics

Parameter	Symbol	Condition	Min	Typical	Max	Unit	Remarks
High-level output voltage	V_{OH}	$I_{OH}=-100\ \mu\text{A}$	$V_{CC}-0.4$			V	RxD
Low-level output voltage	V_{OL}	$I_{OL}=100\ \mu\text{A}$			0.4	V	RxD
RxD rise/fall time	T_r, T_f	$C_{load}=25\ \text{pF}$			100	ns	10% and 90%
RxD pulse width	t_{PWA}	$SIR \leq 115.2\ \text{Kbps}$		1	5	μs	Input pulse=1.6 μs ; rise/fall time<600 ns
RxD pulse width, alternate 3/16 th of pulse duration. See IrDA Physical Layer specs.	t_{PWA}	$9.6 \leq SIR \leq 115.2\ \text{Kbps}$	TBD		TBD	μs	Input pulse=19.53 μs (3/16*(1/9600))

Table 4. Receiver Electrical Characteristics (Continued)

Parameter	Symbol	Condition	Min	Typical	Max	Unit	Remarks
Startup time	T_{STU}			300		μs	
Latency	T_{RRT}			25	50	μs	
Minimum input irradiance	E_{emin}	$V_{CC}=3.3 V$			9	$\mu W/cm^2$	$\theta_h, \theta_v \leq (\pm 15^\circ)$
Maximum input irradiance	E_{emax}	$V_{CC}=3.3 V$			500	mW/cm^2	$\theta_h, \theta_v \leq (\pm 15^\circ)$
Logic low input irradiance	E_{eL}	$V_{CC}=3.3 V$			0.3	$\mu W/cm^2$	
Peak wavelength	λ_p			870		nm	

Unless otherwise noted: $V_{CC}=3.3 V$, $GND=0 V$, $TA=25^\circ C$

Table 5. Transmitter Electrical Characteristics

Parameter	Symbol	Condition	Min	Typical	Max	Unit	Remarks
High-level input voltage	V_{IH}		$0.75V_{CC}$			V	TxD
Low-level input voltage	V_{IL}				0.4	V	TxD
Transmitter current	I_{LED}			40	65	mA	LEDA pin
Startup time	T_{STU}			20		μs	
LED protection timeout				130	270	μs	Protects LED when TxD is left high
Trans. radiant intensity	I_E		3.6		72	mW/sr	$\theta_h, \theta_v \leq (\pm 15^\circ)$
Peak wavelength	λ_p			870		nm	
Input leakage TxD pin	I_{IL}	$V_{IN}=0 V, V_{CC}$	-1		1	μA	
Optical pulse width	t_{OW}	9.6–115.2 kb/s		1.39	30	μs	
Optical rise time	t_{OR}	9.6–115.2 kb/s		100	600	μs	

Table 5. Transmitter Electrical Characteristics (Continued)

Parameter	Symbol	Condition	Min	Typical	Max	Unit	Remarks
Optical fall time	t_{OF}	9.6–115.2 kb/s		100	660	μs	
TxD pulldown resistor	TxD_{RP}	$SD=V_{CC}$	300K			Ω	

Unless otherwise noted: $V_{CC}=3.3\text{ V}$, $GND=0\text{ V}$, $TA=25\text{ }^\circ\text{C}$

Table 6. Transceiver Electrical Characteristics

Parameter	Symbol	Condition	Min	Typical	Max	Unit	Remarks
High-level input voltage	V_{IH}		$0.75V_{CC}$			V	SD
Low-level input voltage	V_{IL}				0.4	V	SD
Receive current	I_{CC}			100	125	μA	Idle
Shutdown current	I_{STB}			0.1	1.0	μA	$SD=V_{CC}$, $TxD=0\text{ V}$
Power shutdown time	T_{SD}				200	μs	
Input leakage SD pin	I_{IL}	$V_{IN}=0\text{ V}$, V_{CC}	-1		1	μA	
Transceiver data rate			9.6		115.2	kb/s	

Unless otherwise noted: $V_{CC}=3.3\text{ V}$, $GND=0\text{ V}$, $TA=25\text{ }^\circ\text{C}$

- **Notes:** To minimize power dissipation, the part has been designed for optimal operation in 1.6 μs mode. If the part is used in the 3/16th pulse duration mode, some devices might exhibit a phantom RxD pulse at 9.6 Kbits/s.

TxD *must* be held low during the transition from shutdown to active to ensure that the circuitry is properly set to communicate.

- Caution:** This component is susceptible to damage from electrostatic discharge (ESD). To prevent damage and/or degradation that might be induced by ESD, use normal static precautions in handling and assembly of this component.

ZHX1203 Tape and Reel Specifications

Figure 4 shows the ZHX1203 reel specifications, and Figure 5 shows the ZHX1203 tape specifications.

Figure 4. ZHX1203 Reel Specifications

Figure 5. ZHX1203 Tape Specifications

ZHX1203 Soldering and Cleaning Recommendations

Follow these recommendations to maintain the performance of the ZHX1203 transceiver.

Reflow Soldering

- ▶ **Note:** Please refer to ZiLOG's Lead-Free Solder Reflow: Packaging Application Note (AN0161, <http://www.zilog.com/docstools.asp>) for more information about the solder profile.

Manual Soldering

- Use 63/37 or silver solder.
- Temperature at solder iron tip: no more than 280 °C
- Finish soldering within 3 seconds.
- Handle only after the ZHX1203 has cooled off.

Cleaning

Perform cleaning under the following conditions:

- Cleaning agent: alcohol
- Temperature and time 30 seconds below 50 °C or 3 minutes below 30 °C
- Ultrasonic cleaning: below 20 W

Moisture Prevention Guidelines

To avoid moisture absorption during transportation and storage, ZHX1203 reels are packed in aluminum envelopes (see Figure 6) that contain a desiccant with a humidity indicator. While this packaging is an impediment to moisture absorption, it is by no means absolute, and no warranty is implied. The user must store these parts in a controlled environment to prevent moisture entry. Please read the label on the aluminum bag for indicator instructions.

Figure 6. ZHX1203 Packaging

Baking

It is recommended that parts that have been stored over 12 months or unpacked over 72 hours be baked under the following guidelines.

Reels

60 °C for 48 hours or more

Loose Parts

- 100 °C for 4 hours or more
or
- 125 °C for 2 hours or more
or
- 150 °C for 1 hour or more

Mechanical Drawing

Figure 7 shows the mechanical specification for the ZHX1203 transceiver.

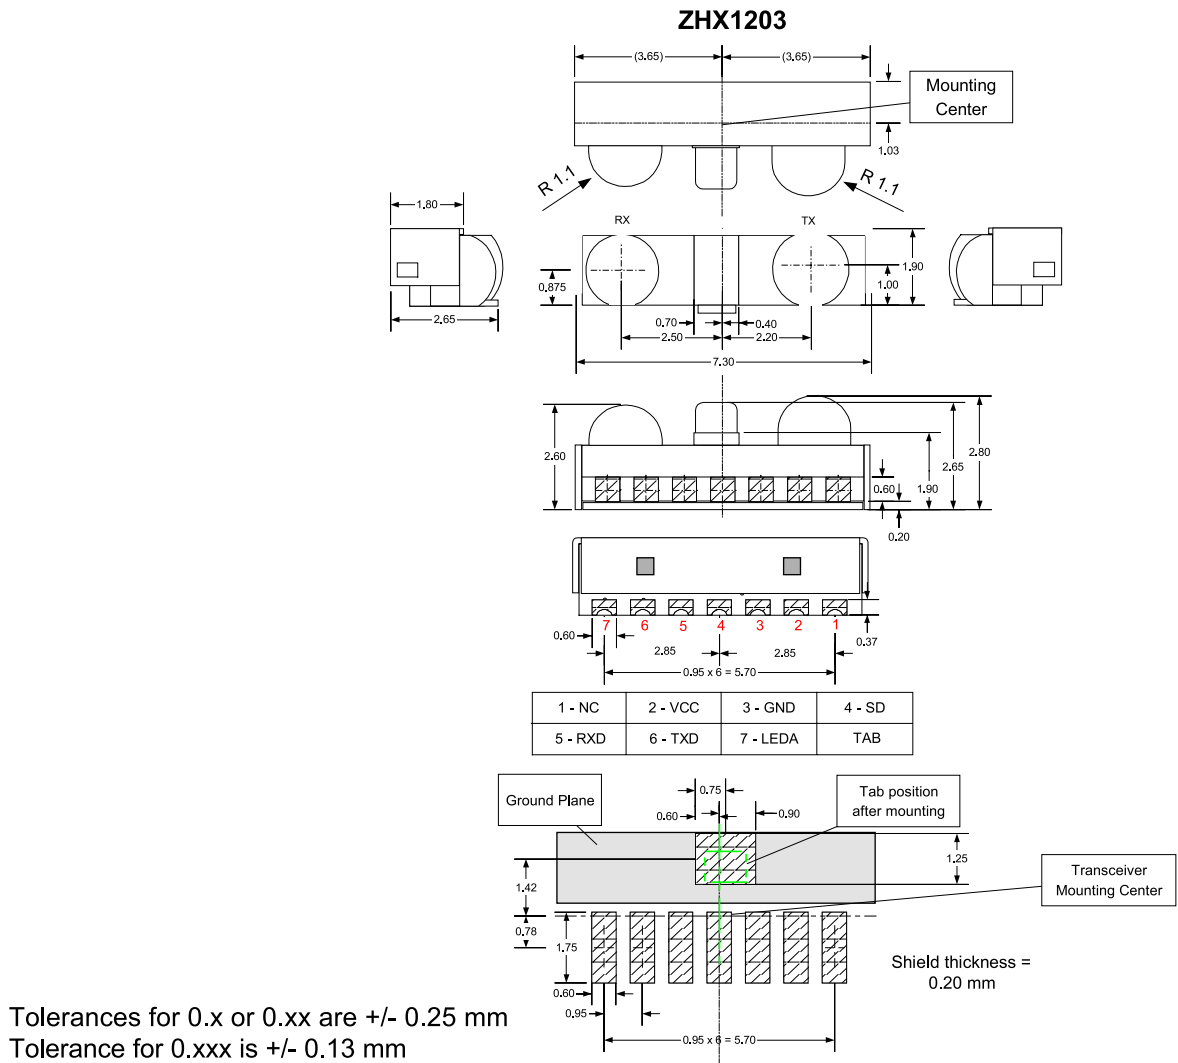

Figure 7. ZHX1203 Mechanical Drawing

► **Note:** The ZHX1203 family of transceivers are marked as follows:
ZHX1203MB = Z1203

Ordering Information

Use the following information to order the ZHX1203 transceiver:

ZHX1203MB115THTR without AlwaysOn Listen 3500 per reel

- ▶ **Note:** All ZiLOG devices are available lead free. Since 2005, ZHX1203 has been manufactured with lead-free components. When ordering from your ZiLOG distributor, there is a possibility that the parts containing lead might be shipped. To ensure that you receive lead-free devices, please use part number ZHX1203MB115TH2090TR. These devices meet or exceed RoHS Directive 2002/95/EC. For additional information, please see the ZiLOG Quality and Reliability web page at <http://www.zilog.com/quality/index.asp>.

Customer Feedback Form

If you experience any problems while operating the ZHX1203 transceiver, or if you note any inaccuracies while reading this product specification, please copy and complete this form, then mail or fax it to ZiLOG (see "Return Information," below). We also welcome your suggestions!
