

MATERIAL

Polyamide based (PA) technopolymer housing, black colour, matte finish.

SCREW AND PRESSURE PLATE

Zinc-plated steel.

STANDARD EXECUTION

(NdFeB) Neodymium- iron-boron magnet, resistant to temperatures up to 80°C, nickel-plated finish.

See Guidelines for the choosing (on page 1180).

FEATURES AND APPLICATIONS

RMPR retaining magnets allow easy fixing of doors, covers or tools to aluminum profiles.

The elastic lateral elements allow the retaining magnet to be inserted at any point in the groove of the profile. Tighten the pressure screw slightly to get the fastening, preventing it from slipping.
