

## IR Receiver Modules for Remote Control Systems

23051

### DESCRIPTION

This IR receiver series is optimized for long burst remote control systems in different environments. The customer can choose between different IC settings (AGC variants), to find the optimum solution for his application. The higher the AGC, the better noise is suppressed, but the lower the code compatibility.

The devices contain a PIN diode and a preamplifier assembled on a lead frame. The epoxy package contains an IR filter. The demodulated output signal can be directly connected to a microprocessor for decoding. These components have not been qualified to automotive specifications.

### FEATURES

- Individual IC settings to reach maximum performance
- Immunity against noise (lamps, LCD TV, Wi-Fi)
- Low supply current
- Photo detector and preamplifier in one package
- Supply voltage: 2.0 V to 5.5 V
- Material categorization: for definitions of compliance please see [www.vishay.com/doc?99912](http://www.vishay.com/doc?99912)

**Note**

- Stresses beyond those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect the device reliability

**SUITABLE DATA FORMAT**

This series is designed to suppress spurious output pulses due to noise or disturbance signals. The devices can distinguish data signals from noise due to differences in frequency, burst length, and envelope duty cycle. The data signal should be close to the device’s band-pass center frequency (e.g. 38 kHz) and fulfill the conditions in the table below.

When a data signal is applied to the product in the presence of a disturbance, the sensitivity of the receiver is automatically reduced by the AGC to insure that no spurious pulses are present at the receiver’s output. Some examples which are suppressed are:

- DC light (e.g. from tungsten bulbs sunlight)
- Continuous signals at any frequency
- Strongly or weakly modulated patterns from fluorescent lamps with electronic ballasts (see Fig. 13 or Fig. 14).
- 2.4 GHz and 5 GHz Wi-Fi

Fig. 13 - IR Disturbance from Fluorescent Lamp With Low Modulation

Fig. 14 - IR Disturbance from Fluorescent Lamp With High Modulation

|  | TSOP532..   | TSOP534..   |
|--|---|---|
| Minimum burst length   | 10 cycles/burst   | 10 cycles/burst   |
| After each burst of length a minimum gap time is required of               | 10 to 72 cycles<br>≥ 10 cycles  | 10 to 40 cycles<br>≥ 10 cycles  |
| For bursts greater than a minimum gap time in the data stream is needed of | 72 cycles<br>> 3 x burst length   | 40 cycles<br>> 10 x burst length  |
| Maximum number of continuous short bursts/second                           | 950   | 1500  |
| NEC code   | Yes   | Preferred   |
| RC5/RC6 code   | Yes   | Preferred   |
| Thomson RCA 56 kHz code  | Yes   | Preferred   |
| Sharp code   | Yes   | Preferred   |
| Sony code  | Preferred   | No  |
| r-step code  | Yes   | Preferred   |
| Suppression of interference from fluorescent lamps                         | Mild disturbance patterns are suppressed (example: signal pattern of Fig. 13) | Complex and critical disturbance patterns are suppressed (example: signal pattern of Fig. 14 or highly dimmed LCDs) |

**Note**

- For data formats with short bursts please see the datasheet of TSOP531.., TSOP533.., TSOP535..

PACKAGE DIMENSIONS in millimeters

Technical drawings according to DIN specifications

Not indicated tolerances  $\pm 0.2$

Drawing-No.: 6.550-5335.01-4  
Issue: 2; 02.07.19

**BULK PACKAGING**

Standard shipping for minimold is in conductive plastic bags. The packing quantity is determined by weight and a maximum of 0.3 % of the components per carton may be missing.

**ORDERING INFORMATION**

**Note**

- d = "digit", please consult the list of available series on the previous page to create a valid part number

Examples: TSOP53438  
 TSOP53456VI1  
 TSOP53438SS1F

**PACKAGING QUANTITY**

- 300 pieces per bag (each bag is individually boxed)
- 6 bags per carton
