RS Pro Retractable Scalpel Set

RS Stock No: 847-7580

RS Pro retractable scalpel set features an easily recognisable Reflex Blue handle that offers the added safety. It is a highly versatile cutting tool produced with designers, graphic artists and model makers in mind.

- Supplied with 5 No.10a individually packed blades
- Blade retracts safely into the handle body
- Durable stainless steel bayonet provides additional strength
- Simple blade change

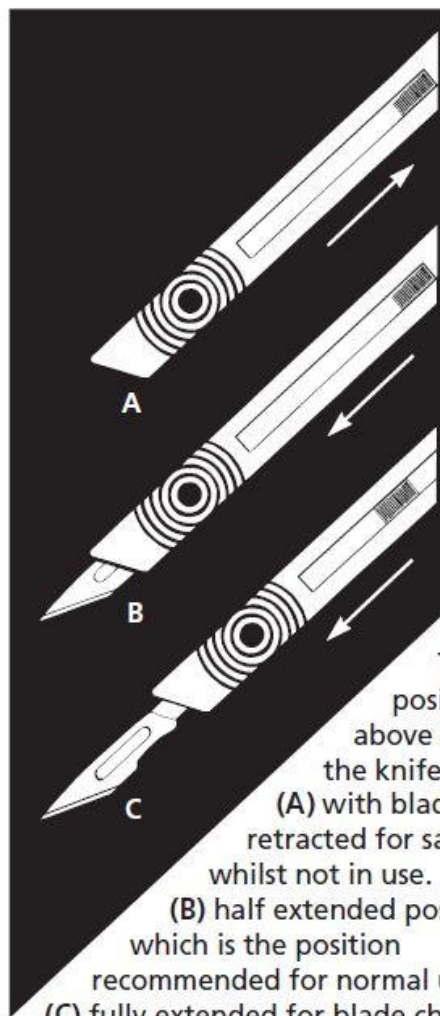

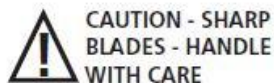

Fitting a new blade:

Fully extend the handle's blade carrier using the side trigger.

Grip the blade with pliers avoiding contact with cutting edge. Slide the blade into position on blade carrier until the slot locates fully over blade stop and clicks into position.

Retract the carrier back using the side trigger into the mid-usage position. When not in use retract the blade fully back into the handle for safety from sharps injury.

The 3 positions above show the knife:

- (A) with blade fully retracted for safety whilst not in use.
- (B) half extended position which is the position recommended for normal use.
- (C) fully extended for blade changing.
