TABLE OF CONTENTS

Rugged RJ45 Solutions

| | | |
|-----------------|--|----|
| NEW CAT6 | RJFRB: plastic circular shell - reverse bayonet coupling, IDC & PCB Tail Receptacle..... | 3 |
| | RJF544: plastic circular shell - push pull coupling | 6 |
| | RJFEZ: plastic rectangular shell - lever coupling | 8 |
| | RJF: metallic circular shell based on MIL-C-26482 - bayonet coupling | 10 |
| | RJF - special receptacles: right angle, cable mount inline and PC tails receptacles..... | 13 |
| | RJFTV: metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device | 15 |
| NEW | Self Closing Cap for square flange RJFTV receptacles..... | 18 |
| | RJFTV - receptacles and plugs with 360° EMI backshells | 19 |
| | RJFTV - special receptacles: right angle, through bulkhead and PC tails receptacles | 21 |
| | RJF-RJFTV Sealed: transversally sealed RJF and RJFTV receptacles..... | 24 |
| | High Reliability Cat5E cable and cordsets..... | 25 |

Rugged USB-A and USB-B solutions (USB2.0)

| | | |
|------------|---|----|
| | USBFTV: rugged USB-A - metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device..... | 26 |
| | USBFTV: special versions: receptacles with 360° EMI backshells - PC tails receptacles | 29 |
| NEW | USBFTV memory key | 30 |
| NEW | USBF memory key | 31 |
| NEW | High Reliability USB2.0 cordsets..... | 32 |
| | USBBF: rugged USB-B - plastic circular shell - thread coupling | 33 |

Rugged IEEE1394 solutions

| | | |
|--|--|----|
| | FWFTV: metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device | 34 |
|--|--|----|

Rugged RJ45 / USB-A / IEEE1394 receptacles with self closing cap

| | | |
|--|------------------------|----|
| | Self Closing Cap | 37 |
|--|------------------------|----|

Rugged RJ11/RJ12 solutions

| | | |
|------------|--|----|
| NEW | RJ11F: metallic circular shell based on MIL-C-26482 - bayonet coupling | 38 |
|------------|--|----|

Rugged MTRJ and LC (fiber optic) solutions

| | | |
|--|---|----|
| | MTRJF: metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device..... | 40 |
| | LCF: metallic circular shell based on MIL-DTL-38999 series III - thread coupling with anti-decoupling device | 42 |

Rugged Ethernet Switches

| | | |
|------------|---|----|
| | 5 or 9 ports IP30 Switch - Unmanaged, Ring or managed | 44 |
| | 5 ports IP67 Switch - Fiber glass reinforced Polyester enclosure - Unmanaged or Ring | 47 |
| NEW | 9 ports Switch IP67 - Aluminum enclosure with olive drab cadmium plating - Unmanaged or managed - Gigabit | 51 |

RJFIELD CONCEPT

The Amphenol Field Series allows you to transform a standard infocom cordset into a rugged waterproof connector for harsh environments.

RJ field allows you to use Ethernet Class D / Cat. 5e connections for 10 Base T, v 100 Base TX or 1000 Base T networks in extreme environments.

EXAMPLE FOR RJ 45 CORDSET

- A full range of versions depending upon the application
- No cabling operation nor measurement required after installation
- Sealing: IP67 (1 meter immersion for up to 30 minutes)
- Shock, vibration and traction resistant
- Inline extension
- Mechanical coding/polarization
- EMI protection

RJFIELD SELECTION GUIDE

| CONNECTORS | Series | Industrial Ethernet Specification | Coupling Mechanism | Shape | Material | Specification | Prime Market | Page |
|------------|------------------|-----------------------------------|---|-------------|----------|----------------------------|------------------------------|------|
| | RJF RB | | Reverse Bayonet | Circular | Plastic | N/A | Industrial & Telecom | 3 |

RJF RB

Ethernet Connection System for Harsh Environment – Industrial Ethernet

RJF RB allows you to use an Ethernet Class D / Cat. 5e and Class E/Cat 6 connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments.

With the patented RJStop® system you can use a standard RJ45 cordset in a protective composite plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling and grounding!

MAIN CHARACTERISTICS

- Sealed against fluids and dust (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field, no tools required
- **Reverse bayonet coupling**
- RJ45 cordset retention in the plug: 70 N in the axis
- Mating cycles: 500 min

IDC Receptacle

**NEW
CAT6**

PCB Receptacle

**NEW
PCB**

ROHS COMPLIANT

RJF RB

Applications

- Telecom Equipments
- Video Control
- Robotics
- Industrial Process Control
- CNC Machines
- Special Machines
- Motion Control

Environmental Protection

- Sealing: IP67
- Salt Spray > 1000 h
- Fire Retardant / Low Smoke: UL94 V0 and NFF 16102, DIN 5510-2
- Thermal Shock: 5 cycles at - 40°C / +100°C
- Operating Temperature: - 40°C / +85°C

Data Transmission

10 BaseT, 100 BaseTX and 1000 BaseT networks
 Cat 5e per TIA/EIA 568B and ClassD per ISO/IEC 11801
 Cat6 per TIA/EIA 568B and ClassE per ISO/IEC 11801

RJF 544

Ethernet Connection System for Harsh Environment – Industrial Ethernet

RJF544 allows you to use an Ethernet Class D / Cat. 5e connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments: With the patented RJStop® system you can use a standard RJ45 cordset in a protective composite plug which will protect it from shocks, dust and fluids. **No hazardous on-field cabling and grounding!**

ROHS COMPLIANT

RJF 544

MAIN CHARACTERISTICS

- Compliant with IEC 60603-7 variant 12
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Sealed against fluids and dust (IP67)
- **Quick Push Pull coupling**
- RJ45 cordset retention in the plug: 100 N in the axis
- Mating cycles: 500 min
- Improved EMI Protection

Applications

- Telecom Equipment
- CNC Machines
- Video Control
- Special Machines
- Robotics
- Motion Control
- Industrial Process Control
- Tele-maintenance

Environmental Protection

- Sealing: IP67
- Salt Spray > 1000 h
- Fire Retardant / Low Smoke: UL94 V0 and NFF 16102, DIN 5510-2
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 10 nano s.
- Thermal Shock: 5 cycles at - 40°C / +100°C
- Operating Temperature: - 40°C / +85°C

Data Transmission

10 BaseT, 100 BaseTX and 1000 BaseT networks

RJF allows you to use an Ethernet Class D / Cat. 5e connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments:
 With the patented RJStop® system you can use a standard RJ45 cordset in a metallic plug which will protect it from shocks, dust and fluids.
No hazardous on-field cabling and grounding!

ROHS COMPLIANT

“N”: nickel plating
 “B”: black coating

MAIN CHARACTERISTICS

- Compliant with IEC 60603-7 variant 11
- Bayonet coupling (“Audible & Visual” coupling signal)
- Robust metallic shells based on MIL-C-26482
- RJ45 cordset retention in the plug: 100 N in the axis
- Mating cycles: 500 min
- Sealed against fluids and dust (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Mechanical Coding / Polarization (4 positions)

Applications

- Robotics
- Industrial Process Control
- CNC Machines
- Special Machines
- Oil & Gas
- Motion Control
- Data Acquisition and Transmission in Harsh Environment
- Tele-maintenance

Environmental Protection

- Sealing: IP67
- Salt Spray: 48 h with Nickel plating
> 96 h with black coating
> 500 h with Oliv Drab Cadmium
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 10 nano s.
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Thermal Shock: 5 cycles at - 40°C / +100°C
- Temperature Range: - 40°C / +85°C

 - Nickel jam nut receptacle, solder termination: RJF 72 N 00

Plug:

- Shell type 6 With Plastic or Metal Gland

Receptacles:

- Square flange receptacle
4 mounting holes: Shell type 2

- Jam nut receptacle
Hexagonal Nut mounting:
Shell type 7

- IP67 In line receptacles:
Shell type 2PE and 7PE with Plastic or Metal Gland

Back Terminations:

Type 1: Female RJ45

Type 2: RJ45 Cordset

Type 2 - 00: Solder - 8 tinned holes

Notes: • Type 2 without RJ45 plug at the end of the cable are also available: consult factory

• Type 1 also available with 90° female RJ45

Universal: Can be used with all standard * RJ45 Cat.5e cordset brands

Assembly instructions

1. Push down the RJ45 cordset latch, and fix it inside the insert
2. Press in and click the other part of the insert
3. Insert in the metallic housing

Easy and Safe: No field cabling tools required

Accessories:

RJF

Special receptacles: Right angle, cable mount inline & PC tails

Right Angle Receptacles

ROHS COMPLIANT

"N": nickel plating
"B": black coating

Some applications have minimal space inside the system. The right angle receptacles meet this need while keeping the advantage of connecting a standard RJ45 cordset at the back.

Square Flange Receptacle - 4 mounting holes - Right Angle - 4 clocking positions:

PART NUMBERS:

Black coating: **RJF21RAB**
 Nickel plating: **RJF21RAN**
 Olive Drab Cadmium plating: **RJF21RAG**

Jam Nut Receptacle - Hexagonal nut mounting - Right Angle - 4 clocking positions:

PART NUMBERS:

Black coating: **RJF71RAB**
 Nickel plating: **RJF71RAN**
 Olive Drab Cadmium plating: **RJF71RAG**

Inline Cable Mount Receptacles

Inline receptacles allow you to make cable extensions in the field by using them with rugged RJFied series plugs.

PART NUMBERS:

Plastic Gland

Black coating: **RJF2PEWF1B**
 Nickel plating: **RJF2PEWF1N**
 Olive Drab Cadmium plating: **RJF2PEWF1G**

Metallic Gland

Black coating: **RJF2PEWFM1B**
 Nickel plating: **RJF2PEWFM1N**
 Olive Drab Cadmium plating: **RJF2PEWFM1G**

PCB Tails Receptacles

These receptacles can be soldered directly on your PCB. A compound insures a transversal sealing and good performance in high vibration environments. They can be connected with rugged RJField series plugs.

PART NUMBERS:

Note:

1. Platings available:

"B": black coating

"N": nickel plating

"B": olive drab cadmium plating

2. As these receptacles are compounded, coding position has to be chosen before ordering

Examples:

Square flange receptacle – black coating – coding A: **RJF2SA5B**

Square flange receptacle – nickel plating – coding C: **RJF2SC5N**

Square flange receptacle – olive drab cadmium plating – coding D: **RJF2SD5G**

Insert Codes

Keying

Environmentally Sealed Receptacles

In some applications, a **transversal sealing** for the receptacle is a « must ». This will prevent fluids and dust from going through the receptacle when plug or cap are not mated to the receptacle. The sealed solution (version "S") has a compound at the rear of the receptacle as shown on the picture. For more information, please consult datasheet RJF-RJFTV Environmentally Sealed Receptacles, page 23.

RJFTV allows you to use an Ethernet Class D / Cat. 5e connection for 10 BaseT, 100 BaseTx or 1000 BaseT networks in harsh environments. With the patented RJStop system you can use a standard RJ45 cordset in a metallic plug which will protect it from shocks, dust and fluids.
No hazardous on-field cabling and grounding!

MAIN CHARACTERISTICS

- Sealed against fluids and dusts (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Mechanical Coding / Polarization (4 positions)
- Improved EMI protection
- **Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device**
- **Robust metallic shells**
- RJ45 cordset retention in the plug: 100 N in the axis
- Mating cycles: 500 min

Environmental Protection

- Sealing: IP67
- Salt Spray: 48 h with Aluminium shell - Nickel plating
> 500 h with Aluminium shell - Olive Drab Cadmium plating
1000h with Marine bronze shell
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 10 nano s.
- Compounded versions tested per NAS 1599 (5-3000 Hz, 20g, 12h)
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Thermal Shock: 5 cycles at - 40°C / +100°C
- Temperature Range: - 40°C / +85°C

Remark: Compatible only with RJFTV square flange receptacle type: RJFTV2XXX (see page 15)

RJFTV

Receptacles - Plugs with 360° EMI backshells

RJFTV series receptacles and plugs with EMI backshells provide a solution with 360° shielding: same protection than the one proposed per standard MIL-DTL-38999 serie III connectors. With those solutions we recommend using our reinforced and double shielded cat5E cable, see page 24.

 Nickel Plating: **Kit38204NI**

Kit38204 and Kit38204NI include:

RJFTV - 360° shielded

IMPORTANT NOTE

With these receptacles, customer will have to solder his cable on the PCB. So the wire positions have to be defined per the customer according to his network.

WIRE POSITION
TO BE DEFINED
BY CUSTOMER
ACCORDING TO NETWORK

PLUGS

PART NUMBERS:

Olive Drab Cadmium Plating: **Kit38081**

Nickel Plating: **Kit38081NI**

Kit38081 and Kit38081NI include:

IMPORTANT NOTE

With these plugs, the standard RJ45 plug is not provided. Customer will have to crimp a standard RJ45 on the cable by himself.

We advise using our double Shielded, reinforced Cat5E cable (see page 24) with these RJ45 series EMI connectors. If customer wants to use his own cable, please check with us regarding compatibility with our backshells: contact@rjfield.com.

We also provide assembled cordsets, (see examples below). For this type of solution please provide the configuration needed: length, description of second end...

Right Angle Receptacles

Some applications have minimal space inside the system. The right angle receptacles meet this need while keeping the advantage of connecting a standard RJ45 cordset at the back.

Environmentally Sealed Receptacles

RJF TV 75A2 G 05 100B TX

In some applications, a transversal sealing for the receptacle is a « must ». This will prevent fluids and dust from going through the receptacle when plug or cap are not mated to the receptacle. The sealed solution (version "S") has a compound at the rear of the receptacle as shown on the example. In addition, the Sealed RJF TV have been successfully tested in very high vibration corresponding to airplanes applications. For more information, please consult datasheet RJF-RJFTV Environmentally Sealed Receptacles (*see page 23*).

PCB Tails receptacles

These receptacles can be soldered directly to your PCB. A compound insures a transversal sealing and good performance in high-vibration environments. The shell of those receptacles are in the « Stand Off » style. They can be connected with RJFTV series plugs.

RJF/RJF TV

Environmentally Sealed Receptacles

RJF/RJF TV

SEALED RECEPTACLE In some applications, a transversal sealing for the receptacle is a « must ». This will prevent fluids and dust from going through the receptacle when plug or cap are not mated to the receptacle. The sealed solution (version "S") has a compound at the rear of the receptacle as shown on the examples below. This feature is available both in RJF and RJF TV shells (please consult the relevant data sheet for product details and accessories). In addition, the Sealed RJF TV have been successfully tested in very high vibration corresponding to airplane applications.

Applications

- Outdoor Equipment
- Airplanes Equipment
- Tactical Radios
- Shelters
- Rugged computers
- Data Acquisition and Transmission in Harsh Environments

Data Transmission

10 BaseT, 100 BaseTX and 1000 BaseT networks
Cat 5e per TIA/EIA 568B and ClassD
per ISO/IEC 11801

ROHS COMPLIANT

- "N": nickel plating
- "B": black coating
- "BZ": marine bronze (only for RJFTV)

MAIN CHARACTERISTICS

- Same as the RJF and RJF TV series ... a complete IP67 sealing of the receptacle (even with no plug or no protective cap mated) is added. IP 67 means immersion during 30 minutes under 1 meter of water (watertight).
- Outside dimensions are the same as the standard RJF and RJF TV series.
- Vibrations: The compounded versions of the RJF TV have been tested in vibration following the NAS 1599 Aeronautic specification (Ambient temperature): 5 - 3000 Hz, 20g, 2,5 mm [.1 inch] double amplitude, 3 axes, 12 hours
Note: This specification exceeds MIL-C-26500 requirements.

IMPORTANT NOTE

Due to the compound, the coding of the connector must be done in the factory: use the codes A, B, C or D in the Part Number.

CABLE CAT 5E

High Reliability Cat 5e Ethernet Cable & Cordsets

General Construction: A 4 pair, 24 AWG, 100 Ohm SFTP round patch cable, designed to the ISO / IEC 11801 Category 5e requirements (cat 5e on 76m). The cable contains 4 twisted pairs, cabled, double shielded with kevlar reinforcement strands, jacketed in black UV resistant Polyurethane HFFR. Designed for fixed or portable applications in harsh environments.

HFFR: Halogen Free Flame Retardant

Jacket Compound Specification:

Halogen Free Flame Retardant Polyether-based Polyurethane. Glossy finish. Excellent hydrolysis resistance. High microbial resistance. UV resistant. High flexibility.

ROHS COMPLIANT

Applications

- Robotics
- Motion Control
- Railways
- CNC Machines
- Battelfield communication
- Industrial Process Control

Reinforced CAT 5E Cable

USBF TV

USB Connection System for Harsh Environment

With USB Field, you can insert a standard USB 2.0 cordset into a metallic plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling and grounding!

This metallic plug is connected into a receptacle, using a Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device for high vibrations.

MAIN CHARACTERISTICS

- Sealed against fluids and dusts (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Mechanical Coding / Polarization (2 positions)
- Improved EMI protection
- Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device
- 2 mechanical Coding / Polarization possibilities by the user (receptacle insert rotation)
- USBF TV plug retention in the receptacle: 100 N in the axis
- Mating cycles: 500 to 1500

Environmental Protection

- Sealing (when mated): IP67 (Temporary immersion)
- Salt Spray: 48 h with Nickel plating
> 500 h with Olive Drab Cadmium
1000 h with marine bronze shell
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 1micro s
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Temperature Range: - 55°C / +85°C

Applications

- Embedded Computers
- Data Acquisition and transmission in harsh environment
- Railways
- Battelfield Communication Systems
- Navy Systems

holes for solder termination

Assembly Instructions

Can be used with most the USB cordset brands: No tools required!

Plug Assembly

1. Only if you need a full sealing (IP67): Install the white sticker around the plug, covering the 4 little holes of the overmolding
2. Insert the black O Ring around the front face of the USB A plug. This O Ring will ensure connection sealing
3. Insert the USB cordset into the metallic backshell
4. Insert the retention spacer laterally to the cable (this spacer is soft, in order to adapt to different shapes of overmolding) and slide the overmolding of the USB-A plug into this retention spacer
5. Insert the friction ring laterally to the cable
6. Choose the right coding (2 positions) and insert the USB-A plug into the protective plug. Note at this step, the main key is used for polarization.
7. Screw the backshell on the plug body. A wrench can be necessary to fully tighten it, and the connection to the receptacle can help

IMPORTANT NOTE

The connection sealing is not done by the black retention spacer (which is slotted), but by the front face ORING (see 2)

Receptacle Assembly

Insert the USB module from the rear. Reference is main key. Beware to have a coding compatible with the coding you used for the plug: on front view, the white shapes in the USBs must be on the same side.

To remove the USB module, insert the removal tool USBF ODE from the front, and push back the module.

USBFTV

Receptacles with 360° EMI backshells & PC Tails receptacles

RECEPTACLES WITH 360° EMI BACKSHELLS

USBFTV Receptacles series with EMI backshells provide 360° shielding: same protection than the one proposed per Standard MIL-DTL-38999 serie III Connectors. We offer these EMI backshells with square flange and jam nut receptacles. The available platings are nickel or olive drab cadmium. With those solutions we suggest using our reinforced USB cable (shielded – zero halogen jacket). See page 31

We can provide those receptacles:
 • with cordset already soldered
 • without cordset

For 360° shielded USBFTV series receptacles, please consult us:

www.usbfield.com

EXAMPLE WITH A SQUARE FLANGE RECEPTACLE (PROVIDED WITHOUT CABLE)

IMPORTANT NOTE

With receptacles provided without cable, customer will have to solder his cable on the PCB, please find below the cabling specification. If customer prefers to use his cable, please check with us compatibility with our EMI backshells:

www.usbfield.com

High Reliability USB 2.0 Cordsets

Applications

- Robotics
- Motion Control
- Railways
- CNC Machines
- Battelfield communication
- Industrial Process

General Construction : this is a USB-2.0 cable containing one 28 AWG 90Ω characteristic impedance data pair, two 24 AWG power conductors, overall SFTP shields (SFTP = double shielding, Braid and foiled), jacketed in black UV resistant Polyurethane HFFR*. Designed for fixed or portable applications in industrial and harsh environments.*HFFR : Halogen Free Flame Retardant.

Jacket Compound Specification:

Halogen Free Flame Retardant Polyether-based Polyurethane. Glossy finish. Excellent hydrolysis resistance. High microbial resistance. UV resistant. High flexibility.

ROHS COMPLIANT

PHYSICAL CHARACTERISTICS

| | |
|---|--|
| DATA CONDUCTORS | bare copper, 7/0.12 mm nom (28 AWG) |
| DATA INSULATION | 0.9 mm nom |
| COLOR DATA PAIR | Green & white |
| POWER CONDUCTORS | Tinned copper, 7/0.2 mm (24 AWG) |
| POWER INSULATION | 1.1 mm nom |
| COLOR POWER WIRE | Red & Black |
| SHIELDS | Foil: providing 100% coverage, in contact with tinned copper drain wire and an overall braid providing 65% nom. coverage made of 16x5/0.1 mm tinned copper strands |
| JACKET | PU compound |
| COLOR JACKET | Black |
| WEIGHT | 38 KG/Km |
| OUTSIDE DIAM. | 0.20 inch (5.1 mm nom. +/- 0.15) |
| MIN BEND RADIUS (During installation) | 45.9 mm (9x O. D.) |
| MIN BEND RADIUS (During operation) | 25.5mm (5 x O.D.) |
| TEMPERATURE installation | Plus 60°C, minus 5°C |
| TEMPERATURE operational | Plus 70°C, minus 30°C |

ELECTRICAL CHARACTERISTICS

| | |
|--------------------------------|--------------------------|
| DC RESISTANCE | 94 Ohms/Km @ 20° C |
| IMPEDANCE | 90 +/- 13 Ohms 1-400 MHz |
| ATTENUATION | |

Data Transmission

IEEE 1394a-2000
400 Mbits/second over 4.5 meters

With FW Field, you can insert a standard IEEE1394 cordset into a metallic plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling and grounding!

This metallic plug is connected into a receptacle, using a Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device for high vibrations.

MAIN CHARACTERISTICS

- No assembly tools required
- Sealed against fluids and dusts (IP67)
- No time-consuming in-field cabling operation necessary
- **Tri-start thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device**
- FW plug retention in the receptacle: 100 N in the axis
- Mating cycles: 500 to 1500 times
- Improved EMI protection

Environmental Protection

- Sealing (mated): IP67 (Temporary immersion - 1 meter up to 30 minutes)
- Salt Spray: 48 hr with Nickel plating
500 hr with Olive Drab Cadmium
- Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 1 micro s
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Temperature Range: - 55°C / +85°C

Assembly Instructions

Can be used with most IEEE 1394 cordset brands: No tools required!

Plug Assembly

1. If a fully sealed (IP67) assembly is required: Install the white tape around the plug to cover the 4 holes of the overmolding. If there are no holes omit this step.
2. Insert the black O Ring around the front face of the IEEE 1394 plug. This O Ring will ensure the seal.
3. Insert the IEEE 1394 cordset into the metallic backshell.
4. Insert the retention spacer laterally onto the cable (this spacer is soft so as to adapt to various overmolding styles) and slide the IEEE 1394 plug into this retention spacer.
5. Insert the friction ring laterally onto the cable cordset.
6. Insert the IEEE 1394 plug into the metallic circular shell. Note at this step that the main key is used for polarization.
7. Screw the backshell on the plug body. A spanner may be required to fully close the backshell to the circular shell.

Important Note: The sealing of the connector is not done by the black retention spacers which are slotted, but rather by the front face O-Ring (Fig 2).

Receptacle Assembly

To Solder your cable onto the PCB:

1. Attach the 2 metallized plastic inserts around the PCB (Fig 1a & 1b).
2. Insert the IEEE 1394 module from the rear of the connector.

Removing Modules

1. Insert the removal tool FWF ODE from the front
2. Push the module back with thumb.

SELF CLOSING CAP

For RJ Field, USB and IEEE1394 receptacles

This Self Closing Cap automatically protects the RJ Field square flange receptacles (MIL-C-26482 type), protecting your system from dust and water projections. The same cap can be used to protect USB and IEEE1394 receptacles. A spring automatically closes the upper part of the cap when either the RJ Field plug, RJ45 cordset, USB or IEEE1394 cordset, or USB key are removed from the receptacle.

RJ11F

Rugged RJ11/RJ12 Connection System for Harsh Environment

RJ11F

RJ11Field allows you to use a standard phone RJ11 / RJ12 connection in harsh environments. With the patented RJStop® system you can use a standard RJ11 / RJ12 cordset in a metallic plug which will protect it from shocks, dust and fluids. **No hazardous on-field cabling!**

MAIN CHARACTERISTICS

- **Bayonet coupling** ("Audible & Visual" coupling signal)
 - **Robust metallic shells based on MIL-C-26482**
 - 4 mechanical user-defined coding / Polarization settings (insert rotation)
 - RJ11 cordset retention in the plug: 100 N in the axis
 - Mating cycles: 500 min
- ### Environmental Protection
- Sealing: IP67
 - Salt Spray:
 - 48 h with Nickel plating
 - > 96 h with black coating
 - > 500 h with Oliv Drab Cadmium
 - Fire Retardant / Low Smoke: UL94 V0 and NF F 16 101 & 16 102
 - Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 10 nano s.
 - Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (*mated pair*)
 - Humidity: 21 days, 43°C, 98% humidity
 - Thermal Shock: 5 cycles at - 40°C / +100°C
 - Temperature Range: - 40°C / +85°C

Applications

- Industrial applications
- Battlefield communication

MTRJF TV

Transform your MTRJ patchcord into an Environmental Connector

With MTRJF TV you can use a standard MTRJ patchcord in a metallic plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling!

The MTRJ Field offers an easy system to upgrade from a standard to an environmental MTRJ.

- Sealed against fluids and dust (IP67)
- Shock, Vibration proof,
- No cabling operation in field and no tools required for installation

MECHANICAL CHARACTERISTICS

- Number of Channels: 1/2/4
- Typical Insertion Loss: 0,5db in MM
- Durability: 500 mating/unmating cycles (changes for <0,2 db)

RJ Switch

Applications

- Factory Automation
- Robotics
- Process Control
- Transportation Systems
- Data Acquisition & Transmission

KEY FEATURES

- Redundant power inputs with surge/spike protection
- Ultra reliable 1,000,000 hours MTBF
- Hazardous location: operation in Zone 2
- Wide operating temperature range of -40°C to 70/85°C
- Rugged metal packaging with DIN rail or direct panel mounting
- Auto-detecting, auto-crossover and auto-polarity
- Full-Duplex operation with flow control (no collisions!)
- Ring Switch Networking Features
 - Real-Time Ring for ultra-fast fault-tolerant loops
 - Recovery time of 30 ms + 5 ms per hop!
 - Ideal for deterministic systems and PLCs
 - Real-time traffic prioritization
 - Port mirroring for traffic diagnostic
- Managed Switch Networking Features
 - Rapid Spanning Tree (RSTP) for fast redundant rings
 - Priority queuing for real-time performance (QoS and CoS)
 - SNMP v1 and v2 for network management
 - SNMPv3 for authentication and encryption
 - IGMP for multicast filtering
 - VLAN for traffic segregation
 - User friendly configuration (web, Telnet, RS232)
 - Encryption using HTTPS, SSL, SSH, SNMPv3
 - Message filtering to stop broadcast storms
 - RMON and port mirroring for diagnostics
 - The Power of Linux Inside

INDUSTRIAL RUGGED ETHERNET SWITCH

Amphenol offers a full range of Rugged Ethernet switches for industrial use. These switches are specifically designed for industrial applications where Real-Time is a key requirement. The wide range, from unmanaged Plug & Play switches to those managed with fiber optics ports, will fulfill all your needs. This family of switches, IP30 rated, is suitable for both Din-Rail or flat panel mounting. This is an easy way to make the Ethernet networks of your manufacturing site, automation or control units deterministic.

This wide range of Ethernet switches is available with following features:

- Unmanaged, Real-Time Ring and Managed models
- RJ45 ports and up to two fiber optics ports (multimode or singlemode)
- 5 or 9 port models

DESCRIPTION

MANAGED, RING & UNMANAGED SWITCH FEATURES

IEEE Ethernet Standards

| | |
|---------------|--|
| IEEE 802.3 /u | 10 Mbps Ethernet and 100 Mbps Fast Ethernet |
| IEEE 802.3x | Full-Duplex with Flow Control |
| IEEE 802.1p | Priority Queuing – QoS, CoS, ToS/DS (<i>Ring and managed models</i>) |
| IEEE 802.1D/w | Rapid Spanning Tree for redundant rings and Spanning Tree for interoperability (<i>managed models</i>) |
| IEEE 802.1Q | VLAN for traffic segregation (<i>managed models</i>) |

Regulatory Approvals

| | |
|--------------------|--|
| EMI emissions | EN55022, FCC part 15, ICES-003 |
| EMC immunity | IEC61326-1, IEEE C37.90 |
| Shocks | IEC60068-2-27 |
| Vibrations | IEC60068-2-6 |
| Free Fall | IEC60068-2-32 |

Example: RJ-Switch, 5 ports Ethernet Ring switch, with 1 multimode ST fiber port, pre-set for 1 ring: **RJS-SRS-2-ST-E1**

A COMPLETE RANGE OF IP67 SEALED INDUSTRIAL ETHERNET SWITCHES

Amphenol offers the widest range of IP67 sealed Industrial Ethernet switches for very harsh environments. The Ethernet interfaces are waterproof & rugged RJ45 connectors from the RJ FIELD series (www.rjfield.com). For any other product such as RJ45/fiber optics converter, please do not hesitate to consult us.

RJS-PC5 SERIES

- 5 ports IP67 RJ45 connectors
- Polyester enclosure
- Ring or unmanaged models

RJS-AL SERIES

- 8 ports IP67 RJ45 connectors
- Aluminum enclosure
- Managed or unmanaged models

RJS-PC SERIES

- 8 ports IP67 RJ45 connectors
- Polyester enclosure
- Managed or unmanaged models

CONSULT OUR DEDICATED WEBSITE FOR MORE INFORMATION:

RJ Switch

ROHS COMPLIANT

Harsh Environment Industrial Ethernet Switch
Plastic Enclosure - IP67

Rugged & Waterproof Switch

Amphenol offers a small size 5 port waterproof Ethernet Switch that can withstand a variety of extreme conditions - low & high temperatures, shocks & vibrations, dust particles or even liquid immersion. This is an easy way to make the Ethernet networks of your manufacturing site, automation or control units deterministic.

Amphenol IP67 Industrial Ring Switch

Amphenol IP67 Ring Ethernet switch is a combination of very fast, fault-tolerant network redundancy Sixnet technology and IP67 sealed & rugged packaging, specifically designed for the harshest environments.

Rings self-configure and just run, without any complex configuration.

The switch board is sealed within a waterproof IP67 polyester enclosure suitable for highly corrosive environments. The polyester material is glass fiber reinforced. This makes it very rugged against shocks and vibration.

The I/O interfaces are waterproof & rugged RJ45 connectors from the RJ FIELD plastic circular series.

Key Features

- Waterproof IP67 Rating (NEMA 6)
- Reduced Installation Costs with the patented RJStop® system
- Use any standard RJ45 cordset
- Rugged Enclosure in Polyester reinforced with 30% glass fiber
- Redundant power inputs with surge/spike protection
- Ultra reliable 1,000,000 hours Mean Time Between Failure (MTBF)
- Zone 2 hazardous location
- Ring Switch Networking Features (managed features available !)
 - Real-Time Ring for ultra-fast fault-tolerant loops
 - Recovery time of 30 ms + 5 ms per hop!
 - Modbus monitoring over Ethernet
 - Ideal for deterministic systems and PLCs
 - Real-time traffic prioritization (QoS and CoS)
 - Assure delivery of real-time data
 - Improve network utilization
 - User settable priority assignments
 - Advanced switch features
 - User configurable port settings
 - Port mirroring for traffic diagnostics
 - Pre-configurable for Plug-And-Play simplicity

Industrial Applications

- Factory Automation
- Robotics
- Process Control
- Transportation Systems
- Data Acquisition & Transmission

IP67 Unmanaged and Ring Switch Features

IEEE Ethernet Standards

Real-Time Ring Switches

Amphenol Real-Time Ring switches combines the Plug&Play simplicity of an unmanaged switch with high performances of Sixnet Ring managed switches.

- **Real-Time fault-tolerant Ring**
Recovery time of 30 ms + 5 ms per hop!
- **Real-Time traffic prioritization (QoS & CoS)**
Assure delivery of real-time data
- **Available Managed features**
User configurable port settings
Port mirroring for traffic diagnostics
Pre-configurable for Plug & Play simplicity

The use of such switches provides a fast network and avoids faults. When a break occurs, the switch instantly transfers data to new path. The link loss recovery is 30 ms plus 5 ms times the number of Ring switches in the ring. For example, 10 ring switches will recover in less than 80 ms. Rings can be pre-configured to "just run". They don't need an assigned IP address. But if you like, you can fine tune the performance of the ring by using a simple Windows wizard (which is free).

Ring networks can be divided into multiple "sub-rings" which enhance reliability and recovery speed through small ring paths.

The prioritization of messages assures delivery of real-time data. Some applications need to force no-real-time data (such as video information) to lower priority and force critical real-time data at higher priority. Network utilization is improved.

This combination of Ethernet technology associated with rugged and sealed protective enclosure is the ideal solution to deliver deterministic performance to your industrial systems even in the harshest environment!

Description *(example for Ring model)*

RJ Switch

Harsh Environment Military Ethernet Switch
Metallic enclosure – IP67 – Gigabit

Sealed, Rugged & Waterproof Switch

Amphenol offers 9 ports managed, RING and unmanaged Ethernet Switches that can withstand a variety of extreme conditions. Whatever the situation - high temperatures, extreme shocks & vibrations, dust particles or even liquid immersion there is a solution available.

This is an easy way to make the Ethernet networks of your systems deterministic. Up to 3 gigabit ports are offered! The switch electronics are sealed within a waterproof IP67 metallic enclosure. The conductive cadmium plating is suitable for most demanding EMI-RFI environments. The I/O interface includes redundant power inputs as well as waterproof rugged RJ45 connectors from the RJF TV FIELD threaded product series based on MIL-DTL-38999 (Series III) metallic shell size 19. This series enables the transformation without tooling any standard RJ45 cordset into a robust and waterproof connection system.

Key Features

Rugged environmental features

- Rugged metal packaging with cadmium olive drab protection
- MIL-DTL-38999 III connectors for both power and Ethernet ports
- IP65/IP67 rated
- MIL-STD-1275 Surge and Spike protection
- MIL-STD-810F shocks
- Zone 2 hazardous location
- Wide operating temperature range of -40°C to 70°C
- Altitude 3000m height; transportation 10000m height

Ethernet features

- 3 ports 10/100/1000-BaseT(X) + 6 ports 10/100-BaseT(X)
- Unmanaged, RING unmanaged and Managed models
- Full-Duplex operation with flow control (no collisions!)
- Auto-detecting, auto-crossover and auto-polarity

Applications

Military Applications

- Data Acquisition & Transmission
- Battlefield Communication C4ISR
- Rugged Networks
- Mobile Communications
- Test Equipment
- Avionic & Shipboard Systems

RING switch

- Ring for fast fault-tolerant loops
- Recovery time of 30 ms + 5 ms per hop!
- QoS and CoS priority queuing

MANAGED switch

- RSTP for redundant rings
- QoS and CoS priority queuing
- SNMPv3 authentication and encryption
- IGMP for multicast filtering
- VLAN for traffic segregation
- And much more !

RJ-Switch enclosure description

Real-Time Ring Switches

Amphenol Real-Time Ring switches combines the Plug&Play **simplicity** of an unmanaged switch with **high performances** of managed switches.

Real-Time fault-tolerant Ring

Recovery time of 30 ms + 5 ms per hop!

Real-Time traffic prioritization (QoS & CoS)

Assure delivery of real-time data

Available Managed features

User configurable port settings
Port mirroring for traffic diagnostics
Pre-configurable for Plug & Play simplicity

The use of such switches provides a fast network and avoids faults. When a break occurs, the switch instantly transfers data to new path. The link loss recovery is 30 ms plus 5 ms times the number of Ring switches in the ring. For example, 10 ring switches will recover in less than 80 ms. Rings can be pre-configured to "just run". They don't need an assigned IP address. But if you like, you can fine tune the performance of the ring by using a simple Windows wizard (which is free). Ring networks can be divided into multiple "sub-rings" which enhance reliability and recovery speed through the small ring paths.

Dimensions (mm) *Military Aluminum ML Enclosure*

NOTE:

The model shown is given for indication.
The LEDs for Power status and ports activity depend on models.

Part Numbers

| Series | RJS | ML | 9ES1 |

RJ FIELD GLOSSARY

10BASE-T

10 Mbps Ethernet on twisted-pair (Category 3) cable.

100BASE-T

The twisted pair version of 100 Mbps Ethernet. Requires Category 5 cabling.

1000BASE-T

A recent LAN standard for implementing 1000 Mbps Ethernet on Category 5 cable. Also called Gigabit Ethernet.

Auto-MDIX

A protocol which allows two Ethernet devices to negotiate their use of the Ethernet Transmit (Tx) and Receive (Rx) cable pairs. This allows two Ethernet devices with MDI or MDI-X connectors to connect without using a cross-over cable.

Baud

A unit of measurement that denotes the number of bits that can be transmitted per second. For example, if a modem is rated at 9600 baud it is capable of transmitting data at a rate of 9600 bits per second.

Bandwidth

The maximum capacity of a network channel. Usually expressed in bits per second (bps). Ethernet channels have bandwidths of 10, 100, and 1000 Mbps (Gigabit).

bps

Bits Per Second is the unit used for measuring line speed, the number of information units transmitted per second.

Broadcast

A transmission initiated by one station and sent to all stations on the network.

Byte

The amount of memory needed to store one character such as a letter or a number. Equal to 8 bits of digital information. The standard measurement unit of a file size.

Category 5

A performance classification for twisted pair cables, connectors and systems. Specified to 100 MHz. Suitable for voice and data applications up to 155 Mbps.

Category 5 e

Also called Enhanced Category 5. A performance classification for twisted pair cables, connectors and systems. Specified to 100 MHz. Suitable for voice and data applications up to 1000 Mbps.

Category 6

A performance classification for twisted pair cables, connectors and systems. Specified up to 250 MHz.

CSMA/CD

Carrier Sense Multiple Access/Collision Detect. The Medium Access Control (MAC) protocol used in Ethernet.

Data rate

The speed of the data transmission, measured in bps (bits per second) or Mbps.

Duplex (Full, Half)

Full duplex is a communications method that allows for the simultaneous transmission and reception of data. In Half Duplex communication, transmissions and receptions can occur in either direction but not at the same time.

Ethernet

The most common network protocol in use. A protocol is a set of rules enabling data communications. Ethernet can operate over several different media including fiber optic, coaxial cable and twisted-pair cable.

IEEE 802.3

IEEE Working Group for CSMA/CD, the protocol used in Ethernet transmissions.

IGMP snooping

The ability of a switch to observe Internet Group Multicast Protocol (IGMP) traffic in order to learn IP Multicast group membership. The purpose is to restrict multicast transmissions to only those ports which have requested them.

LAN

Local Area Network. A network of directly-connected machines (located in close proximity), providing high speed communication over physical media such as fiber optics, coaxial cable, or twisted pair wiring.

MAC Address

A unique address assigned to a station interface, identifying that station on the network. With Ethernet, this is the unique 48-bit station address. Same as the physical address.

Megabit (Mb)

Megabit. One million bits of information, usually used to express a data transfer rate; 1 Megabit/second = 1Mbps.

Megabyte (MB)

MegaByte. A unit of data storage size which represents one million characters of information.

Multicast

A transmission initiated by one station to many stations of the network.

Port Mirroring

Port mirroring allows a switch port to monitor packets from any or all of its ports so that traffic can be analysed.

Quality of Service (QoS)

Some switches support QoS (per 802.1p and 802.1Q standards) whereby messages can be assigned levels of priority. QoS is important where time-critical applications can be impaired by data delays.

RJ45

8-position modular jacks used on twisted pair links for Ethernet cabling.

RJ-Field

A wide range of connectors which allow to reinforce and seal standard RJ45 cable. See www.rjfield.com

SNMP

Simple Network Management Protocol. This is THE standard used for switch management programs.

Spanning Tree Protocol (STP)

A link management protocol providing path redundancy and preventing network loops by defining a tree to span all switches in a network. It forces redundant data paths into a standby (blocked) state. If a path malfunction occurs, the topology is reconfigured and the link reestablished by activating the standby path.

TCP/IP

Transmission Control Protocol/Internet Protocol. A set of protocols, resulting from ARPA efforts, used by the Internet to support services such as remote login (TELNET), file transfer (FTP) and mail (SMTP).

TELNET

The Internet standard protocol for remote login (terminal connection) service. TELNET allows a user at one site to interact with a remote timesharing system at another site as if the user's terminal were connected directly to the remote computer.

VLAN

Virtual Local Area Network. A LAN that maps stations on a basis other than location such as by department, user type or application. Managing traffic, workstations, and bandwidth can be easier with a VLAN and improve network efficiency.
