

LED LENSER® P14.2

This reassuringly sturdy hand-held torch is sure to be welcomed by professional trades, emergency services, search and rescue teams, police squads and security personnel, all of whom take fantastic build quality and outstanding performance for granted. The P14.2 excels in both areas! With its German-engineered lens optics, including the patented Advanced Focus System for a flood or spot light range and a cutting-edge CREE® LED for stunning light strength, this is one of the most accomplished torches in the world. Made from near-indestructible aircraft-grade aluminium, it has a matt black anodised finish which looks great and enhances grip. The Dynamic operating switch on the end of the torch allows the user to regulate brightness with any of three different light settings – Power, Low Power and Boost - and is deliberately oversized to make it easy to turn on at all times (even when wearing gloves). Users will no doubt appreciate the long-range maximum beam distance of 270 metres and a potential 40 hour burn time as well as the remarkable 350 lumens, which casts an astonishingly bright and homogenous white light onto any subject near or far. A sliding Speed Focus allows you to select the flood or spot beam with just one hand, a useful feature in a torch measuring 198mm and weighing 356.5g. Takes widely available 4 x AA batteries (included). Also includes belt pouch and hand cord.

As a leading international brand of hand-held torches and head lamps, LED Lenser is renowned for superior German engineering, outstanding performance, and state-of-the art technologies, such as the patented Advanced Focus System and Smart Light Technology. Constantly driving innovation to provide class-leading lighting instruments, LED Lenser is the brand of choice for professional tradesmen, emergency services personnel, search & rescue teams and serious outdoor enthusiasts. LED Lenser hand torches and head lamps deliver breath-taking, bright homogenous white light, that turns night into day and simply has to be seen to be believed. Using only the finest materials, such as energy-efficient CREE LED light chips, aircraft-grade aluminium and gold-plated contacts, they are renowned for quality and have a reputation for reliability that is second to none.

- Reassuringly sturdy medium sized torch ideal for heavy-duty professional use
- Energy efficient CREE Power+ LED Light Chip
- State-of-the-art, reliable German engineering
- Advanced Focus System™ Optics. Patented reflector and lens combination for intense spot (distance) or flawless flood (near) illumination
- Dynamic Switch™ - Reactive, large single switch controls light options (Power, Low Power, Boost) and is easier to use with gloves on.
- Speed Focus™ enables smooth single-handed beam focusing
- Recalibrated lens for wider light beam angle
- Robust, yet lightweight aircraft-grade aluminium housing
- Smart, anti-slip matt black finish
- User-friendly modular design
- Corrosion resistant gold plated contacts for better conductivity
- Water and dust resistant. IPX4

Technical Information

Size: 197 x 47mm Ø

Power: 350 lumens max

Run Time: up to 40 hours

Beam Distance: up to 270m

Weight: 357grams

Supplied with : Belt Pouch, Wrist-Strap and Duracell® Batteries (4xAA)
