

LED LENSER® P5R.2 – Rechargeable

A desirable planet-friendly rechargeable small hand torch from German LED torch specialists LED Lenser. The LED Lenser P5R.2 features a distinctive two-tone design, energy-efficient LED and magnetic contact charge capability, that makes it as pleasing on the pocket as it is to the eye. Engineered with the finest industrial components, including an aircraft-grade aluminium housing and gold-plated battery contacts, this is a torch that will last and perform to the highest standard for many years. The P5R.2 has an energy-efficient high-strength CREE® LED, with a beam distance up to 240 metres and maximum 270 lumen brightness. It features LED Lenser's brilliant Advanced Focus System, a patented application praised the world over by the most demanding torch enthusiasts' for its ring-free bright homogenous white light over a significantly increased lighting diameter, thereby improving visibility in either flood or spot beam. Thanks to micro-chip operated Smart Light Technology the user can choose from three lighting functions - Power, Low Power and Defence Strobe – for the optimal light in any situation. Ergonomically everything has been designed to maximise user comfort: the matt black anodised finish improves grip and feels just right in the hand; a switch at one end allows for push-button operation, while a sliding Speed Focus™ at the other enables the user to zoom from spot beam to flood beam and back with just one hand. The power source is an eco-friendly rechargeable AA Li-on 3.7v battery, probably a significantly more economical long-term option than having to go out and buy expensive replacements. This is supplied along with a mains/USB Floating Charge System for wall-mounted or on-the-go charging. It allows the entire torch to be put in the magnetic charge housing, upon which it will appear to float as battery life is replenished. Also includes 360° belt-clip, wall mount and hard plastic protective carrycase.

As a leading international brand of hand-held torches and head lamps, LED Lenser is renowned for superior German engineering, outstanding performance, and state-of-the-art technologies, such as the patented Advanced Focus System and Smart Light Technology. Constantly driving innovation to provide class-leading lighting instruments, LED Lenser is the brand of choice for professional tradesmen, emergency services personnel, search & rescue teams and serious outdoor enthusiasts. LED Lenser hand torches and head lamps deliver breath-taking, bright homogenous white light, that turns night into day and simply has to be seen to be believed. Using only the finest materials, such as energy-efficient CREE LED light chips, aircraft-grade aluminium and gold-plated contacts, they are renowned for quality and have a reputation for reliability that is second to none.

- Desirable, planet and pocket friendlier rechargeable handheld torch that is small in size but big on performance.
- Recalibrated lens for wide light beam angle
- Energy efficient CREE Power+ LED Light Chip
- State-of-the-art, reliable German engineering
- Advanced Focus System™ Optics. Patented reflector and lens combination for intense spot (distance) or flawless flood (near) illumination
- Smart Light Technology™(SLT). Micro-chip controlled light options -Power, Low Power, Defence Strobe
- Floating Charge System™ – effortless contact recharging
- Speed Focus™ enables smooth single-handed beam focusing
- Dynamic Switch™. Convenient single switch selection of SLT options
- Robust, yet lightweight aircraft-grade aluminium housing
- Smart, anti-slip matt black finish
- User-friendly modular design
- Corrosion resistant gold plated contacts for better conductivity
- Water and dust resistant. IPX54

Technical Information

Size: 117 x 26mm Ø

Power: 270 lumens

Run Time: up to 12 hours

Beam Distance: up to 240m

Weight: 77grams

Supplied with : Wrist-strap, Wall Mount, Floating Charge System™ contact charger, Mains/USB cable, Hard Case and Battery (1 x AA L-ion)
