

TECHNICAL DATA SHEET

CATEGORY: **NO-CLEAN CORED WIRE SOLDER**
NAME: **GLOW CORE**

FEATURES

- EXCELLENT WETTING
- LEAD-FREE COMPATIBLE
- WIDE PROCESS WINDOW
- CLEANABLE WITH SAPONIFIER

DESCRIPTION

GLOW CORE is a no-clean, resin-based flux cored wire solder designed to offer excellent wetting characteristics and lead-free compatibility. This product is very active and is recommended for fast cycle time soldering. **GLOW CORE** flux promotes good thermal transfer, offering better solder penetration into plated through holes or surface mount interconnections. **GLOW CORE** cored wire produces low-to-medium post-process residues that are electrically safe and do not require cleaning for most applications.

HANDLING

- **GLOW CORE** cored wire has an indefinite shelf life when proper storage conditions are observed.
- Store **GLOW CORE** in a clean, dry area away from moisture and sunlight. Do not freeze this product

APPLICATION

- Solder iron tip temperature should be between 650° - 750°F (350° - 400°C) for Sn63, Sn62 and Sn60 alloys, 700° - 800°F (370° - 425°C) for Sn/Ag and Sn/Ag/Cu (SAC305, CASTIN, TSC-4, etc.) alloys.
- Hold the solder iron tip at a 45° to 60° angle to the work surface.
- The solder iron should contact both the component lead and PCB pad surface.
- Solder and flux should flow onto the lead and pad or lead and barrel to promote optimum flux activity for the joint being worked.
- If additional flux is needed, the use of AIM flux dispensing pens is recommended for dispensing precise amounts of flux to eliminate over-saturation.

CLEANING

GLOW CORE can be cleaned with saponified tap water or an alcohol and water blend. **AIMTERGE 520** is recommended. A water temperature of 140°F is recommended, and should be adequate for removing any post-process residues.

PACKAGING

- **GLOW CORE** is standard with a 2.5% flux core.
- **GLOW CORE** is available in Sn/Ag/Cu, CASTIN, SN100C, and other alloys upon request.
- Standard spool sizes: ½ lb. for .010 and .015 diameters, and 1lb. for .020, .032, .040, .050 and .062 diameters. Other diameters and spool sizes are available upon special request.
- Packaging of ½ lb. and 1 lb. spools is available in 12 lb. and 24 lb. cases.

SAFETY

- Use with adequate ventilation and proper personal protective equipment.
- Refer to the accompanying **Material Safety Data Sheet** for any specific emergency information.
- Do not dispose of any hazardous materials in non-approved containers.

PRODUCT TESTING RESULTS

CATEGORY: **CORED WIRE MEDIUM**
 NAME: **GLOW CORE**

Surface Insulation Resistance

Surface Insulation Resistance (SIR) test for cored wire flux was carried out according to J-STD-004 and IPC-TM-650 method 2.6.3.3.

Pass-Fail Criteria and Data Evaluation

Reference	Property	Pass-Fail Criteria	Result
IPC-TM-650 method 2.6.3.3. §5.5.1	Control coupons	>1E9 Ω at 96 and 168 h	PASS
J-STD-004 §3.2.4.5.1	Sample coupons	>1E8 Ω at 96 and 168 h	PASS
IPC-TM-650 method 2.6.3.3. §5.5.2	Post-test visual inspection	No dendrite growth or corrosion	PASS

Conclusions

The result of the qualification test indicates that GLOW CORE wire solder complies with the requirements of IPC TM-650, Method 2.6.3.3 for Surface Insulation Resistance.
