

1 and 2 Channel *PicoGuard*™ AC Signal ESD Protector

Features

- Single channel ESD protection for an AC signal up to $\pm 5V$ for 0.25W transmit power
- Connect two channels in series for signals up to $\pm 10V$ (1W transmit power)
- $\pm 8kV$ ESD protection per IEC 61000-4-2 contact discharge
- Sub-1pF loading capacitance
- Minimal variation with voltage and temperature
- Can withstand over 1000 ESD strikes at 8kV
- DFN-3, SOT23-3 and MSOP-8 package options
- Lead-free versions available

Applications

- RF switch and amplifier protection
- RF modules and RF IC protection
- Wireless handsets and WLAN
- High-speed AC signals for Gbit Ethernet, etc.

Product Description

The CM1214 *PicoGuard*™ ESD protector is used to protect bipolar signal lines against electrostatic discharge (ESD). The CM1214 allows operation in high-speed environments with signals levels up to $\pm 5V$. The low sub-1pF loading capacitance makes the CM1214-01DF/DE and CM1214-01ST/SO ideal for protecting high-speed interfaces including RF switches and amplifiers. The CM1214-02MS/MR is ideal for dual high-speed signal pairs used in Gigabit Ethernet, ADSL, etc. The CM1214-02MS/MR can also be used for higher transmit voltage applications by connecting the two channels in series.

The CM1214-01DF/DE and the CM1214-01ST/SO are single channel ESD protectors available in a 3-lead DFN-3 and SOT23-3 packages respectively. The CM1214-01DF/DE is housed in a very small form factor DFN package that provides up to 20% and 32% board space savings when it is used in place of SC70 and SOT23 packages. The CM1214-02MS/MR is a dual channel ESD protector and is available in an 8-lead MSOP-8 package. All three devices are available with optional lead-free finishing.

Specifications

ABSOLUTE MAXIMUM RATINGS

PARAMETER	RATING	UNITS
DC Voltage between CH pins	7	V
Operating Temperature Range	-40 to +85	°C
Storage Temperature Range	-65 to +150	°C
Package Power Rating		
DFN-3 Package (CM1214-01DF/DE)	TBD	mW
SOT23-3 Package (CM1214-01ST/SO)	225	mW
MSOP8 Package (CM1214-02MS/MR)	400	mW

STANDARD OPERATING CONDITIONS

PARAMETER	RATING	UNITS
Operating Temperature Range	-40 to +85	°C

ELECTRICAL OPERATING CHARACTERISTICS (SEE NOTE 1)

SYMBOL	PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
V_{ST}	Standoff Voltage	$I=10\mu A$		± 7		V
V_{ESD}	ESD Voltage Protection Peak discharge voltage between CH pins a) Contact discharge per IEC 61000-4-2 standard	Notes 2, 3 and 4	± 8			kV
I_{LEAK}	Channel Leakage Current	$T_A=25^\circ C$, 5.5V between CH pins		± 0.1	± 1.0	μA
R_{DYN}	Dynamic Resistance	$T_A=25^\circ C$, $I_{PP} = 1A$, $t_p = 8/20\mu S$; Any I/O pin to Ground; Notes 2 and 5		0.9		Ω
V_{CL}	Channel Clamp Voltage	$T_A=25^\circ C$, $I_{PP} = 1A$, $t_p = 8/20\mu S$; Notes 2 & 5		10.0		V
C_{IN}	Channel Input Capacitance Voltage between CH pins = 0V Voltage between CH pins = 5V	Measured at 1 MHz between CH pins; Note 2 applies	0.5 0.5	0.8 0.8	1.2 1.2	pF pF

Note 1: All parameters specified at $T_A = -40^\circ C$ to $+85^\circ C$ unless otherwise noted.

Note 2: These parameters guaranteed by design and characterization.

Note 3: Standard IEC 61000-4-2 with $C_{Discharge} = 150pF$, $R_{Discharge} = 330\Omega$.

Note 4: From CH pin with other CH pin grounded.

Note 5: No Connect pins are left open for all tests.

Performance Information

Typical Capacitance Characteristics vs. Voltage

Figure 1 illustrates how the loading capacitance remains mainly flat across the voltage range from 0V to 5V, the voltage between CH pins.

Figure 1. CM1214 Capacitance vs. Voltage

Typical Voltage Current (VI) Characteristics (low current)

Figure 2 shows how the CM1214 experiences a symmetrical I/V curve, without any snapback or trigger voltage. It gradually starts to turn on at about 6V and clamps above 7V.

Figure 2. CM1214 VI Characteristics, Low Current

Typical Voltage-Current (VI) Characteristics (high current, pulse condition)

Figure 3 shows how the CM1214 experiences a symmetrical I/V curve, without any snapback or trigger voltage. The curve shows only one polarity.

Figure 3. CM1214 VI Characteristics, Low Current, Pulse (clamping) Condition

Performance Information (cont'd)

Typical Filter Performance (nominal conditions unless specified otherwise, 50 Ohm Environment)

Figure 4. Insertion Loss vs. Frequency (0V DC Bias)

Figure 5. Insertion Loss vs. Frequency (2.5V DC Bias)

Application Information

The CM1214-01ST/SO and the CM1214-01DF/DE protect a single bipolar signal line, such as is found in RF circuits. One I/O pin (pin 1 for example) is connected to the signal line to be protected, and the other I/O pin is tied to GND. It is important to have a solid ground connection in order to reduce the clamping voltage. Pin 3 of the 3-lead SOT23 (Pin 1 of the 3-lead DFN) must be left open (not connected on the PCB).

The CM1214-02MS/MR protects two bipolar lines, such as for Gbit Ethernet. The PCB traces underneath the package connect across to the corresponding pins, i.e., pin 1 to pin 8 etc.

Any disturbance on the line above or below the stand-off voltage is clamped.

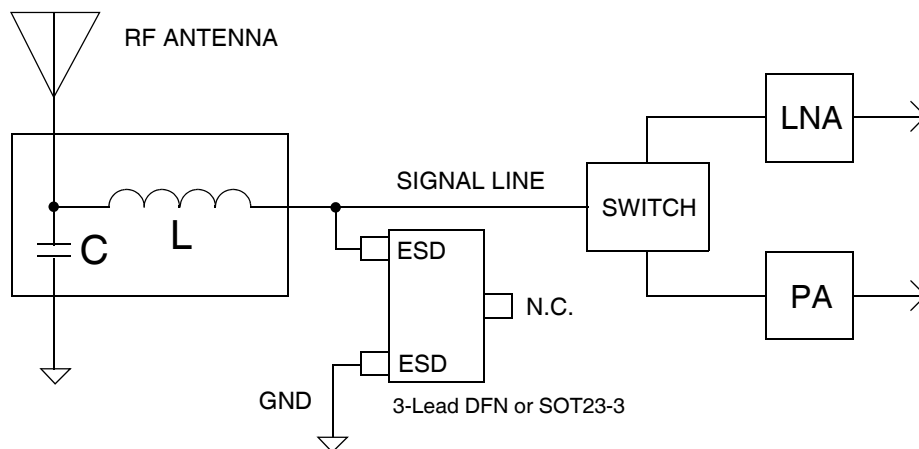

Figure 6. Typical Application - RF Switch and Amplifier Protection, CM1214-01ST/SO/DF/DE in 3-lead DFN or SOT23

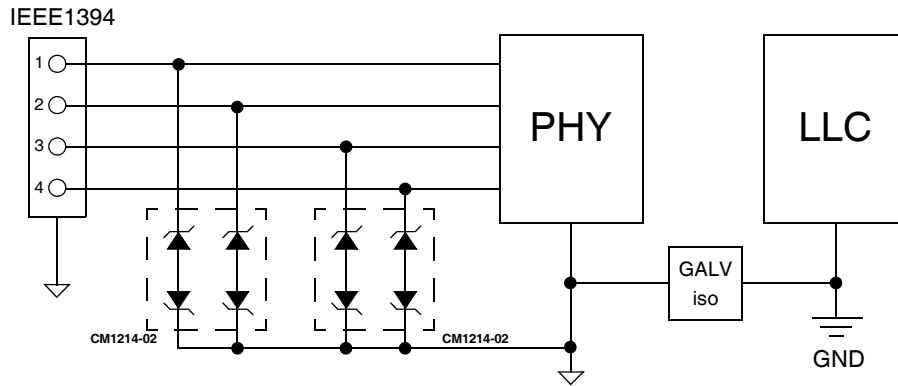

Figure 7. Typical Application - Ethernet Protection, CM1214-02MS/MR in 8-lead MSOP

Application Information (cont'd)

Keep the ESD devices on the PHY side of the galvanic isolation and inside the V_{CC} domain of the PHY controller.

Figure 8. Typical Application - IEEE1394 Protection, CM1214-02MS/MR in 8-lead MSOP

Mechanical Details

The CM1214 is supplied in DFN-03, SOT23-3 and MSOP-8 packages. Dimensions are presented below.

SOT23-3 Mechanical Specifications

Dimensions for CM1214-01ST/SO supplied in a 3-pin SOT23 package are presented below.

For complete information on the SOT23-3, see the California Micro Devices SOT23 Package Information document.
