

ZSR SERIES

2.85 TO 12 VOLT FIXED POSITIVE LOCAL VOLTAGE REGULATOR

DEVICE DESCRIPTION

The ZSR Series three terminal fixed positive voltage regulators feature internal circuit current limit and thermal shutdown making the devices difficult to destroy. The circuit design allows creation of any custom voltage in the range 2.85 to 12 volts. The devices are available in a small outline surface mount package, ideal for applications where space saving is important, as well as through hole TO92 style packaging. The devices are suited to local voltage regulation applications, where problems could be encountered with distributed single source regulation, as well as more general voltage regulation applications.

The ZSR Series show performance characteristics superior to other local voltage regulators. The initial output voltage is maintained to within 2.5% with a quiescent current of typically 350 μ A. Output voltage change, with input voltage and load current, is much lower than competitive devices. The ZSR devices are completely stable with no external components.

FEATURES

- 2.85 to 12 Volt
- Output current up to 200mA
- Tight initial tolerance of 2.5%
- Low 600 μ a quiescent current
- -55 to 125°C temperature range
- No external components
- Internal thermal shutdown
- Internal short circuit current limit
- Small outline SOT223 package
- TO92 package

VOLTAGE RANGE

| | |
|---------|-------|
| ZSR285 | 2.85V |
| ZSR300 | 3.0V |
| ZSR330 | 3.3V |
| ZSR400 | 4.0V |
| ZSR485 | 4.85V |
| ZSR500 | 5.0V |
| ZSR520 | 5.2V |
| ZSR600 | 6.0V |
| ZSR800 | 8.0V |
| ZSR900 | 9.0V |
| ZSR1000 | 10.0V |
| ZSR1200 | 12.0V |

ABSOLUTE MAXIMUM RATING

| | | | |
|---------------------------------|--------------|---|------------|
| Input voltage | 20V | Power Dissipation (T_{amb}=25°C) | |
| Output Current(I _o) | 200mA | SOT223 | 2W(Note 3) |
| Operating Temperature | -55 to 125°C | TO92 | 600mW |
| Storage Temperature | -65 to 150°C | | |

ELECTRICAL CHARACTERISTICS

Notes:

1. The maximum operating input voltage and output current of the device will be governed by the maximum power dissipation of the selected package. Maximum package power dissipation is specified at 25 °C and must be linearly derated to zero at T_{amb}=125°C.

2. The following data represents pulse test conditions with junction temperatures as indicated at the initiation of the test. Continuous operation of the devices with the stated conditions might exceed the power dissipation limits of the chosen package.

3. Maximum power dissipation for the SOT223 and SO8 packages, is calculated assuming that the device is mounted on a PCB measuring 2 inches square.

4. The shut down feature of the device operates if its temperature exceeds its design limit as might occur during external faults, short circuits etc. If the regulator is supplied from an inductive source then a large voltage transient, on the regulator input, can result should the shut down circuit operate. It is advised that a capacitor (1µF or greater) should be applied across the regulator input to ensure that the maximum voltage rating of the device is not exceeded under shutdown conditions.

ZSR285 TEST CONDITIONS (Unless otherwise stated):T_j=25°C, I_o=100mA, V_{in}=6.85V

ORDERING INFORMATION

| Part No | Package | Partmark |
|---------|---------|----------|
| ZSR ▲ C | TO92 | ZSR ▲ |
| ZSR ▲ G | SOT223 | ZSR ▲ |

▲ Voltage Option

eg 3V device in TO92 package
part number ZSR300C
part marked ZSR300 *

eg 12V device in SOT223 package
part number ZSR1200G
part marked ZSR1200 *

SOT223 is supplied on tape in 7" reels of 1000, suffix TA or 13" reels of 4000, suffix TC. Order code e.g. ZSR300GTA.

TO92 is supplied loose in boxes of 4000, no suffix, or taped and wound on a reel of 1500, suffix STOB, or taped and folded in concertina form of 1500, suffix STZ.

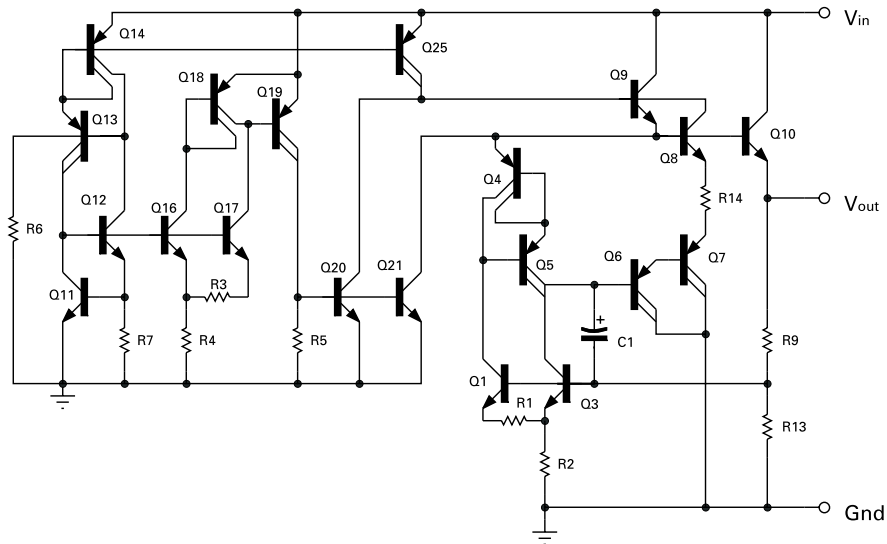

OPTIONS

| Voltage | Voltage Option ▲ | TO92 | SOT223 |
|---------|------------------|------|--------|
| 2.85V | 285 | 3 | 3 |
| 3.0V | 300 | 3 | 3 |
