DESCRIPTION

The QSFCT3373 is 8-bit high-speed CMOS TTL-compatible buffered latch with three-state outputs that are ideal for driving high capacitance loads such as memory and address buses. All inputs have clamp diodes for undershoot noise suppression and all outputs have ground bounce suppression (see QSI Application Note AN-001).

Notes:

1. Typical values indicate $V_{CC}=3.3\text{V}$ and $T_A=25^\circ\text{C}$.
2. Not more than one output should be shorted and the duration is ≤ 1 second.
3. These parameters are guaranteed by design but not tested.
