

Output rail-to-rail micropower operational amplifiers

Features

- Rail-to-rail output voltage swing
- Micropower consumption (20 μ A)
- Single supply operation (2.7 to 10 V)
- Low offset (2 mV max. for TS93xB)
- CMOS inputs
- Ultra low input bias current (1 pA)
- ESD protection (2 kV)
- Latch-up immunity (class A)
- Available in SOT23-5 micropackage
- Automotive grade

Applications

- Battery-powered systems
- Portable communication systems
- Alarms, smoke detectors
- Instrumentation and sensing
- PH meters
- Digital scales
- Automotive

Description

The TS93x (single, dual and quad) series are operational amplifiers that can operate with voltages as low as 2.7 V and reach a 2.9 V_{pp} output swing with R_L = 100 k Ω when supplied at 3 V.

Offering a typical consumption of only 20 μ A, these devices are particularly well-suited to battery-powered applications.

The amplifiers' space-saving 5-pin SOT23-5 package with outer dimensions of 2.8 mm x 2.9 mm make them very easy to implement on a board design.

Table 1. Device summary

Reference	Part number
TS93x	TS931, TS932, TS934
TS93xA	TS931A, TS932A, TS934A
TS93xB	TS931B, TS932B, TS934B

1 Absolute maximum ratings and operating conditions

Table 2. Absolute maximum ratings

Symbol	Parameter	Value	Unit
V_{CC}	Supply voltage ⁽¹⁾	12	V
V_{id}	Differential input voltage ⁽²⁾	$\pm V_{CC}$	V
V_{in}	Input voltage range ⁽³⁾	$V_{CC-} -0.3$ to $V_{CC+} +0.3$	V
I_{in}	Input current range ⁽⁴⁾	10	mA
T_{std}	Storage temperature range	-65 to +150	°C
T_j	Maximum junction temperature	150	°C
R_{thja}	Thermal resistance junction to ambient ⁽⁵⁾		°C/W
	– SOT23-5	250	
	– SO8	125	
	– SO14	103	
	– TSSOP8	120	
	– TSSOP14	100	
ESD	HBM: human body model ⁽⁶⁾	2	kV
	MM: machine model ⁽⁷⁾	200	V
	CDM: charged device model ⁽⁸⁾	2	kV
	Latch-up immunity	200	mA
	Soldering temperature (10 sec), leaded version	250	°C

1. All voltages values, except differential voltage are with respect to network terminal.
2. Differential voltages are non-inverting input terminal with respect to the inverting input terminal.
3. The magnitude of input and output voltages must never exceed $V_{CC+} +0.3$ V.
4. Input current must be limited by a resistor in series with the inputs.
5. Short-circuits can cause excessive heating and destructive dissipation.
6. Human body model: 100 pF discharged through a 1.5 kΩ resistor into pin of device.
7. Machine model ESD: a 200 pF capacitor is charged to the specified voltage, then discharged directly into the IC with no external series resistor (internal resistor < 5 Ω), into pin-to-pin of device.
8. Charged device model: all pins and the package are charged together to the specified voltage and then discharged directly to ground through only one pin. This is done for all pins.

Table 3. Operating conditions

Symbol	Parameter	Value	Unit
V_{CC}	Supply voltage	2.7 to 10	V
V_{icm}	Common mode input voltage range	$V_{CC-} -0.2$ to $V_{CC+} -1.5$	V
T_{oper}	Operating free air temperature range	-40 to +105	°C

2 Electrical characteristics

[Table 4](#) and [Table 5](#) give the electrical characteristics at each V_{CC} value.

Table 4. $V_{CC+} = +3\text{ V}$, $V_{CC-} = 0\text{ V}$, $T_{\text{amb}} = 25^\circ\text{ C}$
(unless otherwise specified)

3 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK[®] packages, depending on their level of environmental compliance. ECOPACK[®] specifications, grade definitions and product status are available at: www.st.com. ECOPACK[®] is an ST trademark.

5 Revision history

Table 11. Document revision history

Date	Revision	Changes
01-Nov-2001	1	Initial release.
01-Dec-2004	2	Modified AMR values in Table 2 (explanation of Vid and Vi limits).
04-May-2009	3	Document reformatted. Removed DIP package information and order codes from Chapter 3 . Modified temperature range: extended to -40 to +105° C in Table 10: Order codes . Added automotive grade products in Table 10 .
07-Sep-2009	4	Added root part numbers (TS93xA, TS93xB) and Table 1: Device summary on cover page. Added parameters for full temperature range in Table 4 and in Table 5 .
