National Semiconductor

100363 Low Power Dual 8-Input Multiplexer

General Description

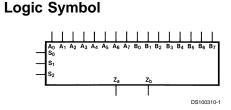

The 100363 is a dual 8-input multiplexer. The Data Select (S_n) inputs determine which bit (A_n and B_n) will be presented at the outputs (Z_a and Z_b respectively). The same bit (0–7) will be selected for both the Z_a and Z_b output. All inputs have 50 kΩ pulldown resistors.

- 2000V ESD protection
- Pin/function compatible with 100163
- Voltage compensated operating range = -4.2V to -5.7V
- Standard Microcircuit Drawing (SMD) 5962-9165501

100363 Low Power Dual 8-Input Multiplexer

Features

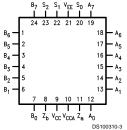

■ 50% power reduction of the 100163

Pin Names	Description	
$S_0 - S_2$	Data Select Inputs	
$S_0 - S_2$ $A_0 - A_7$ $B_0 - B_7$	A Data Inputs	
B ₀ -B ₇	B Data Inputs	
Z _a , Z _b	Data Outputs

					+125°C			

Note 3: F100K 300 Series cold temperature testing is performed by temperature soaking (to guarantee junction temperature equals -55°C), then testing immediately without allowing for the junction temperature to stabilize due to heat dissipation after power-up. This provides "cold start" specs which can be considered a worst case condition at cold temperatures.

Note 4: Screen tested 100% on each device at -55°C, +25°C, and +125°C, Subgroups 1, 2, 3, 7, and 8.

Note 5: Sample tested (Method 5005, Table I) on each manufactured lot at -55°C, +25°C, and +125°C, Subgroups A1, 2, 3, 7, and 8.

Note 6: Guaranteed by applying specified input condition and testing $V_{OH}\!/\!V_{OL}.$

LIFE SUPPORT POLICY

NATIONAL'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DE-VICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF NATIONAL SEMI-CONDUCTOR CORPORATION. As used herein:

- Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
