

## OUTLINE

The Rx5RZ Series are CMOS-based voltage regulator ICs with high output voltage accuracy, low supply current, low dropout voltage and high ripple rejection. Each of these voltage regulator ICs consists of a voltage reference unit, an error amplifier, output voltage setting resistors, a current limit circuit and a chip enable circuit. (Provided two types of chip enable circuit ; "H" active and "L" active, that can be selected when order.)for A/B version

The output voltage of these ICs is fixed with high accuracy.

In addition to low supply current from CMOS process, the Rx5RZ Series may lengthen battery life through low dropout voltage and chip enable function thanks to the built-in low ON resistance transistor. Also when compared with conventional regulators that employ CMOS process, these ICs have superior ripple rejection, input transient response characteristic and load transient response characteristic thus making these product suitable for power supply for hand-held communication equipment.

Since the package for these ICs are the SOT-23-5 package and SOT89, high density mounting of the ICs on boards is possible.

## FEATURES

- Ultra-Low Supply Current.....Typ. 20 $\mu$ A
- Ultra-Low Supply Current (Standby).....Typ. 0.1 $\mu$ A (for A/B version)
- High Accuracy Output Voltage ..... $\pm$ 2.0%
- High Ripple Rejection .....Typ. 55dB (f=1kHz)
- Low Dropout Voltage .....Typ. 0.2V (I<sub>OUT</sub>=60mA)
- Low Temperature-Drift Coefficient of Output Voltage.....Typ.  $\pm$ 100ppm/ $^{\circ}$ C
- Excellent Line Regulation.....Typ. 0.05%/V
- Output Voltage .....Stepwise setting with a step of 0.1V in the range of 2.0V to 6.0V is possible (refer to Selection Guide).
- Built-in Short Current Limit Circuit.....Typ. 50mA
- Small Package .....SOT-23-5 (Mini-mold), SOT89

## APPLICATIONS

- Power source for battery-powered equipment.
- Power source for cellular phones, cameras, VCRs, camcorders, hand-held audio instruments and hand-held communication equipment.
- Power source for domestic appliances.

## BLOCK DIAGRAMS

## SELECTION GUIDE

The output voltage, the active type of the chip enable circuit, the packing type, and the taping type for the ICs can be selected at the user's request.

These selections can be made by designating the part number as shown below:

Rx5RZxxxx-xx ← Part Number  
 ↑    ↑↑↑↑    ↑  
 a    b cd    e

Code	Contents
a	Package type: N : SOT23-5 H : SOT89
b	Setting Output Voltage (V <sub>OUT</sub> ) : Stepwise setting with a step of 0.1V in the range of 2.0V to 6.0V is possible.
c	Designation of Active Type of The Chip Enable Circuit : A : "L" active type B : "H" active type C : no CE pin
d	Designation of Packing Type : A : Taping C : Antistatic bag (for Samples only)
e	Designation of Taping Type : Ex. TR, TL (refer to Taping Specifications ; TR type is the standard direction.)

For example, the product with Output Voltage of 5.0V, Specified Polarity of Chip Enable is "H" active and Taping Type TR is designated by Part Number RN5RZ50BA-TR.

## PIN CONFIGURATION

• SOT-23-5

• SOT-89

## PIN DESCRIPTION

Pin No.	Symbol	Description
1	GND	Ground Pin
2	VDD	Input Pin
3	VOUT	Output Pin
4	NC	No Connection
5	CE or $\overline{\text{CE}}$	Chip Enable Pin

## ABSOLUTE MAXIMUM RATINGS

Symbol	Item	Ratings	Unit
V <sub>IN</sub>	Input Voltage	9	V
V <sub>CE</sub>	Input Voltage (CE or $\overline{\text{CE}}$ Pin)	-0.3 to V <sub>IN</sub> +0.3	V
V <sub>OUT</sub>	Output Voltage	-0.3 to V <sub>IN</sub> +0.3	V
I <sub>OUT</sub>	Output Current	200	mA
P <sub>D</sub>	Power Dissipation	420 (SOT-23-5)* 900 (SOT-89)*	mW
T <sub>opt</sub>	Operating Temperature	-40 to +85	°C
T <sub>stg</sub>	Storage Temperature	-55 to +125	°C

\*) For Power Dissipation, please refer to PACKAGE INFORMATION.

### ABSOLUTE MAXIMUM RATINGS

Absolute Maximum ratings are threshold limit values that must not be exceeded even for an instant under any conditions. Moreover, such values for any two items must not be reached simultaneously. Operation above these absolute maximum ratings may cause degradation or permanent damage to the device. These are stress ratings only and do not necessarily imply functional operation below these limits.

## ELECTRICAL CHARACTERISTICS

### • RN5RZxxA Series

## OPERATION

In these ICs, the output voltage  $V_{OUT}$  is detected by feed-back registers R1, R2, and the detected output voltage is compared with a reference voltage by an error amplifier, so that a constant voltage is output.

A current limit circuit working for short protection and a chip enable circuit for standby function are included.

## FOR STABLE OPERATION

### • Countermeasure for Noise

Measuring circuit for white noise ; RN5RZ30B

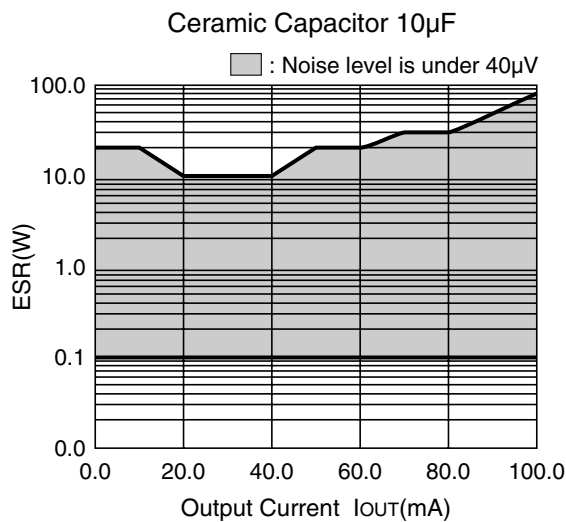

The relationship between output current ( $I_{OUT}$ ) and Equivalent Series Resistance (ESR) in the output capacitor is described in the graphs below. The conditions when the noise level is under  $40\mu\text{V}$  (Avg.) are indicated by the hatched area in the graph.

[Measuring conditions]

Frequency band : 0Hz to 1MHz

Temperature :  $25^\circ\text{C}$

## APPLICATION HINTS

When using these ICs, be sure to take care regarding the following points :

- In these ICs, phase compensation is made for securing stable operation even when the load current is varied. For this purpose, be sure to use a capacitor  $C_{OUT}$  with good frequency characteristics and ESR in the range described above.
- Make  $V_{DD}$  and GND lines sufficient. If their impedance is high, the noise picked up or unstable operation may result.
- Connect the capacitor with a capacitance of about 1 $\mu$ F between  $V_{DD}$  and GND with wiring as short as possible.
- Set external components as close as possible to the ICs and make wiring as short as possible.

## POWER DISSIPATION (SOT-23-5)

This specification is at mounted on board. Power Dissipation ( $P_D$ ) depends on conditions of mounting on board. This specification is based on the measurement at the condition below:

(Power Dissipation (SOT-23-5) is substitution of SOT-23-6.)

### Measurement Conditions

	Standard Land Pattern
Environment	Mounting on Board (Wind velocity=0m/s)
Board Material	Glass cloth epoxy plastic (Double sided)
Board Dimensions	40mm × 40mm × 1.6mm
Copper Ratio	Top side : Approx. 50% , Back side : Approx. 50%
Through-hole	φ0.5mm × 44pcs

### Measurement Result

( $T_{opt}=25^{\circ}\text{C}$ ,  $T_{jmax}=125^{\circ}\text{C}$ )

	Standard Land Pattern	Free Air
Power Dissipation	420mW	250mW
Thermal Resistance	$\theta_{ja}=(125-25^{\circ}\text{C})/0.42\text{W}=238^{\circ}\text{C/W}$	400 $^{\circ}\text{C/W}$

Power Dissipation

1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to Ricoh sales representatives for the latest information thereon.
2. The materials in this document may not be copied or otherwise reproduced in whole or in part without prior written consent of Ricoh.
3. Please be sure to take any necessary formalities under relevant laws or regulations before exporting or otherwise taking out of your country the products or the technical information described herein.
4. The technical information described in this document shows typical characteristics of and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under Ricoh's or any third party's intellectual property rights or any other rights.
5. The products listed in this document are intended and designed for use as general electronic components in standard applications (office equipment, telecommunication equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death (aircraft, spacevehicle, nuclear reactor control system, traffic control system, automotive and transportation equipment, combustion equipment, safety devices, life support system etc.) should first contact us.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, firecontainment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. Anti-radiation design is not implemented in the products described in this document.
8. Please contact Ricoh sales representatives should you have any questions or comments concerning the products or the technical information.

## RICOH COMPANY., LTD. Electronic Devices Company

■ Ricoh presented with the Japan Management Quality Award for 1999.  
Ricoh continually strives to promote customer satisfaction, and shares the achievements of its management quality improvement program with people and society.

■ Ricoh awarded ISO 14001 certification.  
The Ricoh Group was awarded ISO 14001 certification, which is an international standard for environmental management systems, at both its domestic and overseas production facilities. Our current aim is to obtain ISO 14001 certification for all of our business offices.
