

Surface Mount Quad PNP Transistor

Type HCT790

Feature

- Four independent transistors in a 0.35 inch, square ceramic package
- Surface mountable on ceramic or printed circuit board
- Electrical performance similar to a 2N2907A
- Hermetically sealed package
- Screened per MIL-S-19500 TX or TXV equivalent levels on request

Description

The HCT790 is a 20 pad, hermetically sealed, ceramic surface-mount transistor array, consisting of a 2N2907A silicon PNP transistor die. The HCT790 electrical characteristics are similar to the MIL-S-19500/291 specification for the 2N2907A.

TX and TXV screening, if requested, will be performed similar to MIL-S-19500/558 per 2N6987 conditions. Order HCT790TX or HCT790TXV.

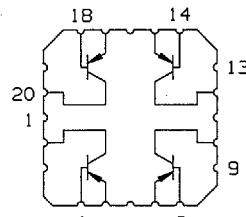

Absolute Maximum Ratings ($T_A = 25^\circ\text{C}$ unless otherwise noted)

Collector-Base Voltage	60V
Collector-Emitter Voltage	60V
Emitter-Base Voltage	5.0V
Collector Current-Continuous	600mA
Isolation Voltage	500V _{DC}
Operating Junction Temperature(T_J)	-65°C to +200°C
Storage Junction Temperature (T_{SJ})	-65°C to +200°C
Power Dissipation @ $T_A = 25^\circ\text{C}$ (four devices driven equally)	1.0W
Power Dissipation @ $T_S^{(1)} = 25^\circ\text{C}$ (four devices driven equally)	2.0W ⁽²⁾
Soldering Temperature (vapor phase reflow for 30 sec.)	215°C
Soldering Temperature (heated collet for 5 sec.)	260°C

Notes

(1) T_S = Substrate temperature that the chip carrier is mounted on.

(2) Derate linearly 11.4mW/ $^\circ\text{C}$ above 25°C. This rating is provided as an aid to designers. It is dependent upon mounting material and methods and is not measurable as an outgoing test.
