### GENERAL DESCRIPTION

The TC04 (1.25V output) and TC05 (2.5V output) bipolar, two-terminal, bandgap voltage references offer precision performance without premium price. These devices do not require thin-film resistors, greatly lowering manufacturing complexity and cost.

A 50ppm/ $^{\circ}\text{C}$  output temperature coefficient and 15 $\mu\text{A}$  to 20mA operating current range make these devices attractive for multimeter, data acquisition converter, and telecommunication voltage references.
