

2-A Power-Switching Transistors

High-Voltage N-P-N Types for Off-Line Power Supplies and Other Switching Applications

Features:

- Performance information tailored for switching applications
- 100°C maximum limits specified for:
 - Switching times
 - Saturation voltages
 - Leakage currents
- 300 to 400V $V_{CEO(sus)}$
- Very fast turn-off $t_f < 180 \text{ nsec (typ.)}@1.5A$

The D44TD-series of n-p-n power transistors are designed for use in switching applications requiring high-voltage capability, fast switching speeds, and low-saturation voltages. They are particularly suited for off-line switching power supplies, solid state lighting ballast, inverters, solenoid/relay drivers, and deflection circuits.

JEDEC TO-220AB
