## 1 Amp Low Dropout Positive Voltage Regulator

**Low dropout voltage 1.3 V max.**

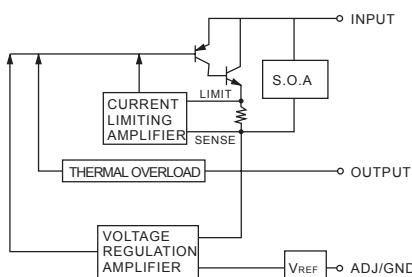

### General Description

The TS1117 Series of high performance positive voltage regulators are designed for use in applications requiring low dropout performance at full rated current. Additionally, the TS1117 Series provides excellent regulation over variations due to changes in line, load and temperature. Outstanding features include low dropout performance at rated current, fast transient response. The TS1117 Series are three terminal regulators with fixed and adjustable voltage options available in popular packages.

### Features

- ◊ Low dropout voltage 1.3 V max.
