

Radiation Hardened Dual-D Flip-Flop with Set and Reset

Intersil's Satellite Applications Flow™ (SAF) devices are fully tested and guaranteed to 100kRAD total dose. These QML Class T devices are processed to a standard flow intended to meet the cost and shorter lead-time needs of large volume satellite manufacturers, while maintaining a high level of reliability.

The Intersil HCTS74T is a Radiation Hardened positive edge triggered flip-flop with set and reset.

Specifications

Specifications for Rad Hard QML devices are controlled by the Defense Supply Center in Columbus (DSCC). The SMD numbers listed below must be used when ordering.

Detailed Electrical Specifications for the HCTS74T are contained in SMD 5962-95763. A "hot-link" is provided from our website for downloading.
