description

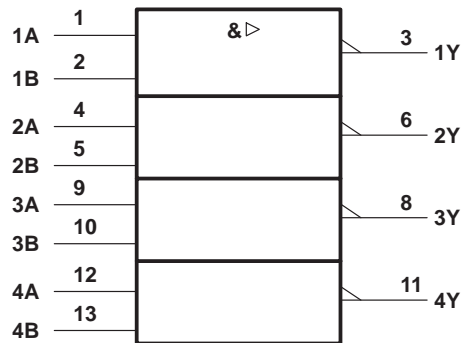

These devices contain four independent 2-input NAND buffers/drivers. They perform the Boolean functions $Y = \overline{A \cdot B}$ or $Y = \overline{A + B}$ in positive logic.

The SN54ALS1000A and SN54AS1000A are characterized for operation over the full military temperature range of -55°C to 125°C . The SN74ALS1000A and SN74AS1000A are characterized for operation from 0°C to 70°C .
