WP3 SPO 061W8 250Mhz,LFballs,PBFbump,CAP

Status: In Production.

📄 Documentation ⌄ Symbols

Microsemi's WinPath3-SuperLite (WP3-SL) provides a powerful, yet lower cost WinPath3 solution for access processing in the wireline and wireless access infrastructure equipment market. This new family of devices leverages Microsemi's broad portfolio of hardened market-ready protocols and industry preferred I/O interfaces and provides this solution in devices priced less than previous WinPath devices. It has the same processing elements as the WinPath3, but a reduced number (six) running up to 400 MHz. These processing elements support the latest packet based protocols such as Ethernet, PWE3 (for Ethernet TDM, HDLC, ATM), and Packet Network Synchronization (IEEE1588v2, Synchronous Ethernet, adaptive and differential clock recovery). It

🛒 Purchase Options

Product Features

- Next generation of access processors providing up to 2x the performance and more integration than the previous WinPath2 family
- Numerous WAN and LAN interfaces are supported in the family including 6 Gigabit Ethernet, 24 Fast Ethernet, 16 TDM and dual SPI-3/POS level 2/Utopia Level 2
- Wide range of bus interfaces available including PCIe plus
