FQGRCM

The Panduit QuickNet Cassette Rear Cable Manager mounts to the rear of a standard EIA 19 — wide telecommunications rack, saving floor space by eliminating the need for horizontal cable managers. Users have easy access to fibers through up to 16 MTP* interconnect cable assemblies. The cable manager not only organizes and routes cables, but also holds up to one meter of slack, providing necessary strain relief and bend radius control to protect cables from damage. It is designed to support QuickNet SFQ, HDQ and MTP Cassettes in 2-post racks. Four-post racks, server cabinets and network cabinets are not supported.
