SKILLS NEEDED

Core Skill: Electrical Prototyping

If it requires power, you need to know how much, what all the pins do, and how to hook it up. You may need to reference datasheets, schematics, and know the ins and outs of electronics.

Skill Level: Noob - You don't need to reference a datasheet, but you will need to know basic power requirements. See all skill levels

★★★★★ best button for the buck

about 2 years ago by Member #729378 verified purchaser

easy to order delivered on time fits as advertised. right size for what I need no data yet on how clean they switch. (*de-bouncing is a good practice, to relieve this worry)

★★★★☆ Buttons!

about a year ago by Member #785448 verified purchaser

Who doesn't like buttons?! These work great, they're color coded so you can easily determine which button works does what on your board. I marked the buttons down a star or two because they tend to pop off a bread board fairly easy.

★★★★☆ Great switches!

about a year ago by servoman verified purchaser

I have used these on a breadboard for programming AVR Micros. They work as expected.

★★★★☆ These are great for my little experiments.

about 10 months ago by Member #940160 verified purchaser

About the only building I do these days is basically for the fun of it, I appreciate the variety and quality of your products. These little buttons are perfect!
