JST SH Jumper 4 Wire Assembly - 8"

● PRT-10359

★★★★½ 3

DESCRIPTION   FEATURES   DOCUMENTS

This is a simple four wire cable. Great for jumping from board to board or just about anything else. These cables mate with the connectors listed below. They have bare wires on one end and a 4-pin JST SH connector on the other end with a mating socket.

JST SH Jumper 4 Wire Assembly - 8" Product Help and Resources

SKILLS NEEDED

Core Skill: **Soldering**

This skill defines how difficult the soldering is on a particular product. It might be a couple simple solder joints, or require special reflow tools.

Skill Level: Noob - Some basic soldering is required, but it is limited to a just a few pins, basic through-hole soldering, and couple (if any) polarized components. A basic soldering iron is all you should need.

★★★★★ **Sure beats crimping those tiny connectors**

about 3 years ago by Member #555292 ✓ verified purchaser

After many failed attempts at crimping those tiny connectors, these pigtails were a godsend. Thank you so much for offering them!

★★★★☆ **Shouldn't have to buy this separately but...**

about 7 months ago by Member #1049382 ✓ verified purchaser

I used this with the fingerprint scanners from sparkfun. I really think this should've come with the scanners since they can't be used without this cable. The cable did what its supposed to do though. Would've been nice if the wires were slightly heavier duty like 22 AWG instead of 28 to make soldering a little easier.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
