

RAFIX FS switching element emergency stop PCB, gold, plus 1, 2 NC + 1 signaling contact

fields of application

- > Measurement-control-regulation
- > Electrical engineering
- > Mechanical and system engineering
- > Signalling systems
- > Vehicle construction
- > Agricultural and forestry machinery
- > Construction machinery
- > Handheld terminals
- > Industrial robots

description

These switching elements have internal plungers and therefore can only be combined with emergency stop and mushroom pushbuttons.

The PCB switching elements are positioned on a PCB shared with other components. These can subsequently be mounted behind the front panel together with the actuators and signal indicators. The switching elements "float" directly underneath the actuators on the PCB behind the front panel and leave plenty of space for other components.

In the center channel of the switching element, there are either light conductors for the use of SMT-LEDs, or 3 mm THT LEDs can be installed for illumination.

PCB mounting depths

- 9.2 mm for RAFIX 22 FS+ and RAFIX 22 FSR
- 15.7 mm for RAFIX 30 FS+:

The NC contacts of these switching elements are forcibly separated according to IEC 60947-5-1.

- > PCB switching element
- > Only suitable for RAFIX 22 FS+ Emergency Stop "Plus 1
- > Gold contacts (= grey housing)
- > 2 Ö + 1 S (= middle contact as signal contact)
- > Mounting: Soldering on printed circuit board

Betriebsanleitung Not-Halt-Befehlsgeräte (Original)

Operating Instructions EMERGENCY STOP Control Units (Translation of the source text)

d'ARRÊT D'URGENCE (Traduction original)

1. Sicherheitshinweise

Vor Inbetriebnahme bitte Betriebsanleitung sorgfältig lesen. Not-Halt-Befehlsgeräte erfüllen eine Personenschutz-Funktion. Unsachgemäßer Einbau, sachwidrige Anwendung oder Manipulationen können zu schweren Verletzungen von Personen

Not-Halt-Befehlsgeräte dürfen nicht umgangen, entfernt oder auf andere Weise unwirksam gemacht werden!

Vor Beginn der Installation Anlage und Gerät spannungsfrei schalten! Vor Erst-Inbetriebnahme der Maschine oder Anlage Not-Halt-Befehlsgerät durch Testbetätigung auf korrekte Montage und Funktion überprüfen.

Not-Halt-Befehlsgeräte mit sichtbaren Beschädigungen sind unverzüglich auszutauschen. Not-Halt-Funktion darf nicht als Ersatz für Schutzmaßnahmen oder andere Sicherheitsfunktionen verwendet werden.

Not-Halt-Funktion darf die Wirksamkeit von Schutzreinrichtungen oder von Einrichtungen mit anderen Sicherheitsfunktionen nicht beeinträchtigen.

(GB) 1. Safety instructions

ase read the operating instructions carefully prior to use

Please read the operating instructions carefully prior countries.

- EMERGENCY STOP control units are designed to protect persons. Inappropriate installation,

improper use or inadmissible manipulation may result in severe injuries!

- EMERGENCY STOP control units must never be bypassed, removed or disabled in any other way!

Disconnect the power supply to the machinery and device prior to installation!

Operate the EMERGENCY STOP control unit to test and verify proper installation and function arise is initial total unit to be supplied.

prior to initial start-up of the machine or line.

An EMERCENCY STOP control unit with an obvious defect must be replaced immediately The emergency stop function is not to be used for safety measures or safety functions.

The emergency stop function must not compromise the effectiveness of safety devices or devices with other safety functions.

 Il faut soigneusement lire le mode d'emploi avant la mise en service.
 Les auxiliaires de commande d'ARRÊT D'URGENCE remplissent une fonction de protection personnelle. Un montage inapproprié, une application contre-indiquée ou une manipulation peuvent

causer des blessures corporelles graves!

Il est interdit de ponter, d'enlever ou de rendre inopérants les auxiliaires de commande d'ARRÊT

(F) 3. Description de produit

Avant d'entamer l'installation il faut mettre l'installation et l'appareil hors tension!

Avant la première mise en service de la machine ou de l'installation, contrôler l'auxiliaire de commande d'ARRÊT D'URGENCE quant au montage et à un fonctionnement corrects.

Les auxiliaires de commande d'ARRÉT D'URGENCE présentant des dommages visibles sont à remplacer sans tarder.

La fonction d'arrêt d'urgence ne peut pas être utilisée en remplacement de mesures de protec-

tion ou d'autres fonctions de sécurité.

La fonction d'arrêt d'urgence ne peut pas entraver l'efficacité de dispositifs de sécurité ou de

dispositifs possédant d'autres fonctions de sécurité

2. Allgemeine Beschreibung und bestimmungsgemäße Verwendung

Not-Halt-Befehlsgeräte sind elektromechanische Schaltgeräte zum Schutz von Personen. Sie dienen der schnellen Abschaltung um Maschinen, Fahrzeuge und Anlagen in einen sicheren Zu-stand zu bringen, um Gefahren und Schäden für Mensch und Maschine zu vermeiden oder zu verrinaern.

Für die Inbetriebnahme, den Einsatz und technischen Überprüfungen gelten im speziellen folgen-de Vorschriften:

- Die Maschinenrichtlinie 2006/42/EG
- Die Sicherheitsvorschriften sowie
 Die Unfallverhütungsvorschriften / Sicherheitsregeln

Hersteller und Benutzer von Maschinen, an denen Not-Halt-Befehlsgeräte eingesetzt werden, tragen die Verantwortung für die Beachtung der Betriebsanleitung, wie auch für die Einhaltung der für sie geltenden Sicherheitsvorschriften und -regeln.

Verwendung folgende Anforderungen beachtet und eine Gefahrenbewertung durchgeführt werden:

- EN ISO 13849-1:2015
- EN ISO 13850:2008 EN 60204-1/A1:2009 EN ISO 13849-2:2012

(GB) 2. General description and intended use

EMERGENCY STOP control units are electromechanical switching devices designed to protect persons. They are used for instant disconnection to achieve a safe status of machines, vehicles or other equipment in order to avoid or reduce risks or damage to man and machine.

The following standards and regulations apply to their start-up, use and technical inspections without limitation:

- Machinery Directive 2006/42/EC
- Accident prevention regulations / rules for safety Manufacturers and users of machines provided with EMERGENCY STOP control units are respon

sible for ensuring that the operating instructions are observed and the applicable safety standards and rules complied with. For the installation and operation of EMERGENCY STOP control devices in line with the intended

use, the following requirements must be observed and a risk assessment must be performed:

- EN ISO 13849-1:2015 - EN ISO 13850:2008

- EN ISO 13849-2:2012 - EN 60204-1/A1:2009

2. Description générale et application conforme aux prescriptions Les auxiliaires de commande d'ARRÊT D'URGENCE sont des appareils de commutation électromécaniques pour protéger des personnes. Ils servent à couper rapidement les machines, les véhicules et les installations, à les amener dans un état de sécurité fiable pour éviter ou diminuer les risques de dommages corporels et de dégâts matériels.

Pour la mise en service, l'utilisation et les contrôles techniques, il faut respecter les prescriptions

suivantes:

- La directive sur les machines selon la norme 2006/42/EG
- Les règlements de sécurité ainsi que
- Les instructions sur la prévention des accidents / règlements de sécurité

C'est aux fabricants et utilisateurs de machines où des auxiliaires de commande d'ARRÊT D'URGENCE sont utilisés, qu'incombe la responsabilité du respect du mode d'emploi ainsi que

des prescriptions et règlements de sécurité en vigueur.
Pour l'instalation et l'exploitation de dispositifs d'ARRÊT D'URGENCE, les exigences suivantes doivent être respectées et une évaluation des risques doit être menée en vue d'une utilisation en bonne et due forme:

- EN ISO 13849-1:2015 EN ISO 13849-2:2012 - EN ISO 13850:2008
- EN 60204-1/A1:2009

Aufbau: Die Not-Halt-Befehlsgeräte bestehen aus einer Kombination von Betätigern mit einem oder mehreren Schaltelementen. Die Not-Halt-Befehlsgeräte gibt es als Einbauversion oder in

einem Gehäuse verbaut. Die Betätigung erfolgt durch Drücken, die Entriegelung erfolgt je nach Variante entweder durch:

- Drehbewegung in beide Richtungen nach links oder nach rechts
- Ziehen entgegen der Betätigungsrichtung

(GB) 3. Product description

Design: An EMERGENCY STOP button is an assembly of actuator combined with one or more contact blocks. EMERGENCY STOP buttons are available either as a panel mounting version or installed in a separate housing

They are operated by pressing. Unlatching is done by one of two methods

- Turning in either direction
- Pulling against the direction of operation

Structure: Les boutons-poussoirs d'ARRÊT D'URGENCE sont composés d'une combinaison d'actionneurs ou de plusieurs éléments de commutation. Les boutons-poussoirs d'ARRÊT D'URGENCE sont disponibles en version intégrable ou installés dans un boîtier.

L'actionnement s'effectue par appui sur ces derniers. Selon la variante, le déverrouillage s'effectue

- Un mouvement de rotation dans les deux directions, soit vers la gauche, soit à droite
- Soit en tirant dans la direction opposée de la direction d'actionne
