## **Pushbutton Switches/Selector Switches/Indicators** A22N/M22N/A30N

Control panel miniaturization through a more compact design and modified wiring direction

Addition of Push-In Plus terminal blocks for easy wiring Workability and safety improvements

A30NK

A30NK-P

Page 70

## **Pushbutton Switches**

22-mm dia. Pushbutton Switches Control panel miniaturization through a more compact design and modified wiring direction. Addition of Push-In Plus terminal blocks for easy wiring.

OMROI

#### Easy to Use

- Improved wiring visibility through to a modified wiring direction. (Push-In Plus terminal block type)
- Screw terminal block structure is compatible with round crimp terminals. (Screw terminal block type)
- The terminals can be secured even when a contact block is mounted. (Screw terminal block type)
- · Contact Blocks can be attached in any direction for easy assembly.

#### Miniaturization

- No need for extra lateral space because of the modified wiring direction. (Push-In Plus terminal block type)
- · Compact design.
- A22NL (lighted models) are the same size as A22NN (non-lighted models).

#### Safety

- Easy-to-operate lock lever for secure locking.
- Easy-mounting Contact Blocks provide finger protection.
- No loose connections of wiring means maintenance-free use. (Push-In Plus terminal block type)

#### **Product Lineup**

- · Meet global safety standards.
- · Can be installed in two types of panel hole dimensions: 22.3 and 25.5 dia.
- · The buttons and bezels come in a wide variety of colors, shapes, and materials.
- · Standard-feature degree of protection: IP66, NEMA 4X, and NEMA 13.

Refer to Safety Precautions for All Pushbutton Switches/ Indicators and Safety Precautions on page 85.

#### **Button Colors**

				Green	Yellow	White	Blue	Black	
Non-lighted Switches	A22NN-□□□-N□ Opaque								
Lighted Switches	A22NL-□□□-T□ Transparent		Red	Green	Yellow	White	Blue	Orange	White
		When not lit							
			Red	Green	Yellow	White	Blue	Orange	Opaque white*

The colors when the Switches are lit are for transparent white buttons (code: TW) and yellow LED Lamps (code: Y).

## **List of Models**

Note: Normally, the Button and LED Lamp with the same color are combined.

However, opaque white is available by combining a white Button and yellow LED. A22N $\square$ - $\square$  $\square$ - $\underline{TW}$ A- $\square$  $\square$ - $\underline{Y}$ 

■ Subassemblies: Refer to pages 9 to 11 and 78. (You can order Operation Units, LED Lamps, Mounting Collars, and Contact Blocks individually.)

- Specifications: Refer to page 12.
- Dimensions: Refer to pages 14 to 16.
- Accessories and tools: Refer to pages 80 to 81.

Switch Structure---- You can order Operation Units, LED Lamps (lighted models only), Mounting Collars, Contact Blocks, and Lighting Units (lighted models only) separately. Use them in combination for models that are not available as assembled Switches. They can also be used as inventory for maintenance parts.

- Accessories and tools: Refer to pages 80 to 81.

## A22NN/A22NL

## **Ordering Information**

Subassemblies -----You can order Operation Units, LED Lamps (lighted models only), Mounting Collars, Contact Blocks, and Lighting Units (lighted models only) separately. Use them in combination for models that are not available as assembled Switches. They can also be used as inventory for maintenance parts.

## A22NN/A22NL

## **Specifications**

#### **Certified Safety Standard Ratings**

UL 508 (File No. E76675), CSA C22.2 No.14

6 A 240 VAC, 10 A 120 VAC TÜV (EN60947-5-1)

AC-15 3 A 240 VAC

DC-13 4 A 24 VDC

CCC (GB/T14048.5) AC-15 3 A 240 VAC DC-13 4 A 24 VDC

## **Application Standards**

UL1059 and UL486E (Push-In Plus terminal block type)

### **Ratings**

**Contacts (Standard Load)** 

Rated insulation volt	age	600 V					
Rated carry current		10 A	10 A				
Rated voltage		24 V	120 V	240 V	380 V	440 V	
AC at 50/60 Hz	Resistive load (AC-12)	10 A	10 A	6 A	2A	2 A	
AC at 50/60 HZ	Inductive load (AC-15)	10 A	6 A	3 A	1.9 A	1.6 A	
DC	Resistive load (DC-12)	8 A	2.2 A	1.1 A			
	Inductive load (DC-13)	4 A	1.1 A	0.55 A			

**Note: 1.** The above ratings were obtained by conducting tests under the following conditions.

- (1) Ambient temperature: 20 ±2°C
- (2) Ambient humidity: 65% ±5% RH
- (3) Operating frequency: 30 operations/minute
  2. Minimum applicable load: 10 mA at 5 VDC.

#### **LED Lamps**

Rated voltage	Applied voltage	Rated current	
6 VAC/DC	6 VAC/DC ±10%	Approx. 11 mA (red, orange, yellow, or blue) Approx. 5 mA (white or green)	
12 VAC/DC	12 VAC/DC ±10%	Approx. 12 mA (red, orange, yellow, or blue) Approx. 5 mA (white or green)	
24 VAC/DC	24 VAC/DC ±10%	Approx. 12 mA (red, orange, yellow, or blue) Approx. 5 mA (white or green)	
100 VAC	100 VAC ±10%		
110 VAC	110 VAC ±10%	Approx. 12 mA (red, orange, yellow, or blue) Approx. 5 mA (white or green)	
120 VAC	100 to 130 VAC	Approx. 3 find (write of green)	
200 VAC	200 VAC ±10%		
220 VAC	220 VAC ±10%	Approx. 12 mA (red, orange, yellow, or blue)	
230 VAC	230 VAC ±10%	Approx. 5 mA (white or green)	
240 VAC	220 to 250 VAC		

**OMRON** 

## **Specifications**

#### **Characteristics**

Туре		Pushbutton Switches		
Item		Non-lighted models	Lighted models	
Allowable operating	Mechanical	60 operations/minute max.		
frequency	Electrical	30 operations/minute max.		
Insulation resistance		100 MΩ min. (at 500 VDC)	Not available for lighting units	
Contact resistance		100 mΩ max. (initial value)		
Dielectric strength	Between terminals of same polarity	2,500 VAC at 50/60 Hz for 1 min. (initial value)	Not available for lighting units	
	Between each terminal and ground	2,500 VAC at 50/60 Hz for 1 min. (initi	al value)	
Vibration resistance	Malfunction	10 to 55 Hz, 1.5-mm double amplitude	e (malfunction within 1 ms)	
Shock resistance	Malfunction	1,000 m/s² max. (malfunction within 1 ms)		
Mechanical		Momentary action: 5,000,000 operations min. Alternate action: 500,000 operations min.		
Durability	Electrical	500,000 operations min. (250 VAC, 3 A, with an inductive load having power factor $\cos \theta = 0.4$ )		
Ambient operating ten	nperature*1	−25 to 70°C −25 to 55°C		
Ambient operating hu	midity	35% to 85% RH		
Ambient storage temperature*1		-40 to 80°C		
Degree of protection*2		Conforming to IP66, NEMA 4X, NEMA13		
Electric shock protection class		Class II		
PTI (tracking characteristic)		175		
Degree of contaminati	on (application environment)	3 (EN 60947-5-1)		
Weight		Approx. 50 g (for 1NC/1NO)	Approx. 65 g (for 1NC/1NO)	

<sup>\*1.</sup> With no icing or condensation.

## **Operating Characteristics (for SPST-NO/SPST-NC)**

Туре	Pushbutton Switches
Item	Lighted/non-lighted
Total travel force (torque) (maximum TTF)	18 N
Total travel (TT)	6 mm max.
Resetting force (torque) (RF)	

## **Examples of Linked Contact Blocks (Screw terminal block type)**

## **Selector Switches**

# A22NS/A22NW

22-mm dia. Knob-type Selector Switches
Control panel miniaturization through a more
compact design and modified wiring
direction.

Addition of Push-In Plus terminal blocks for easy wiring.

- Improved wiring visibility through to a modified wiring direction. (Push-In Plus terminal block type)
- Screw terminal structure is compatible with round crimp terminals. (Screw terminal block type)
- The terminals can be secured even when a contact block is mounted. (Screw terminal block type)

#### **Miniaturization**

- No need for extra lateral space because of the modified wiring direction.
   (Push-In Plus terminal block type)
- · Compact design.
- A22NW (lighted models) are the same size as A22NS (non-lighted models).

#### Safety

- · Easy-to-operate lock lever for secure locking.
- Easy-mounting Contact Blocks provide finger protection.
- No loose connections of wiring means maintenance-free use. (Push-In Plus terminal block type)

#### **Product Lineup**

- · Meets global safety standards.
- Can be installed in two types of panel hole dimensions: 22.3 and 25.5 dia.
- The buttons and bezels come in a wide variety of colors, shapes, and materials.
- Standard-feature degree of protection: IP66, NEMA 4X, and NEMA 13.

Refer to Safety Precautions for All Pushbutton Switches/ Indicators and Safety Precautions on page 85.

## OMRON

# **Key-type Selector Switches**

22-mm dia. Key-type Selector Switches Control panel miniaturization through a more compact design and modified wiring direction. Addition of Push-In Plus terminal blocks for easy wiring.

#### Easy to Use

- · You can connect up to three Contact Blocks in one stage for multistage expansion.
- Screw terminal structure is compatible with round crimp terminals. (Screw terminal block type)
- The terminals can be secured even when a contact block is mounted. (Screw terminal block type)
- Contact Blocks can be attached in any direction for easy assembly.

#### **Miniaturization**

- No need for extra lateral space because of the modified wiring direction. (Push-In Plus terminal block type)
- Compact design.

#### Safety

- Easy-to-operate lock lever for secure locking.
- Easy-mounting Contact Blocks provide finger
- No loose connections of wiring means maintenancefree use. (Push-In Plus terminal block type)

### **Product Lineup**

- · Meet global safety standards.
- Can be installed in two types of panel hole dimensions: 22.3 and 25.5 dia.
- The buttons and bezels come in a wide variety of colors, shapes, and materials.
- · Standard-feature degree of protection: IP66 and **NEMA 13.**

Refer to Safety Precautions for All Pushbutton Switches/ Indicators and Safety Precautions on page 85.

# **Specifications**

#### **Characteristics**

	Туре	Vau tura Salaatar Suitahaa	
Item		Key-type Selector Switches	
Allowable operating	Mechanical	30 operations/minute max.	
frequency	Electrical	30 operations/minute max.	
Insulation resistance		100 M $\Omega$ min. (at 500 VDC)	
Contact resistance		100 m $\Omega$ max. (initial value)	
Dielectric strength	Between terminals of same polarity	2,500 VAC at 50/60 Hz for 1 min. (initial value)	
Dielectric strength	Between each terminal and ground	2,500 VAC at 50/60 Hz for 1 min. (initial value)	
Vibration resistance Malfunction		10 to 55 Hz, 1.5-mm double amplitude (malfunction within 1 ms)	
Shock resistance	Malfunction	1,000 m/s² max. (malfunction within 1 ms)	
	Mechanical	500,000 operations min. (Switches with 3 positions: 300,000 operations min.)	
Durability	Electrical	500,000 operations min. (Switches with 3 positions: 300,000 operations min.) (250 VAC, 3 A, with an inductive load having power factor $\cos \theta = 0.4$ )	
Ambient operating ter	mperature*1	−25 to 70°C	
Ambient operating hu	midity	35% to 85% RH	
Ambient storage temp	oerature*1	-40 to 80°C	
Degree of protection*2	2	Conforming to IP66, NEMA13	
Electric shock protec	tion class	Class II	
PTI (tracking characte	eristic)	175	
Degree of contamination (application environment)		3 (EN 60947-5-1)	
Weight		Approx. 65 g (for 1NC/1NO)	

- \*1. With no icing or condensation.
- \*2. Degree of protection from the front of the panel.

# **Operating Characteristics (for SPST-NO/SPST-NC)**

Туре	Key-type Selector Switches	
Item	Manual reset	Automatic reset
Total travel force (torque) (maximum TTF)	0.6 N·m	0.6 N·m
Total travel (TT)	2 positions: Approx. 90°, 3 positions: Approx. 45°	
Resetting force (torque) (RF)	0.5 N·m max.	

# Examples of Linked Contact Blocks (Screw terminal block type)

Contact Blocks

	Key-type Selector Switches		
	2 positions	3 positions	
Linking example	Operation Unit  Mounting Collar	Operation Unit  Mounting Collar	

**Note:** If you increase the number of Contact Blocks, evaluate the Switch under actual working conditions before permanent installation and use the Switch within a number of switching operations that will not adversely affect the Switch's performance.

Note: The above shows a terminal connection diagram for a screw terminal block type.

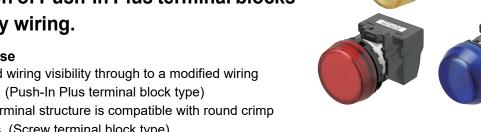

# **Indicators**

22-mm dia. Indicators Control panel miniaturization through a more compact design and modified wiring direction.

Addition of Push-In Plus terminal blocks for easy wiring.

- · Improved wiring visibility through to a modified wiring direction. (Push-In Plus terminal block type)
- · Screw terminal structure is compatible with round crimp terminals. (Screw terminal block type)

#### Miniaturization

- No need for extra lateral space because of the modified wiring direction. (Push-In Plus terminal block type)
- · Compact design.

#### **Product Lineup**

- · Meet global safety standards.
- Can be installed in two types of panel hole dimensions: 22.3 and 25.5 dia.
- The indicators come in a wide variety of colors and shapes.
- Standard-feature degree of protection: IP66, NEMA 4X, and NEMA 13.

Refer to Safety Precautions for All Pushbutton Switches/ Indicators and Safety Precautions on page 85.

### **Indicator Unit Colors**

	Red	Green	Yellow	White	Blue	Orange	White

# A30NN/A30NL

30-mm dia. Pushbutton Switches Control panel miniaturization through a more compact design and modified wiring direction.

Addition of Push-In Plus terminal blocks for easy wiring. Workability and safety improvements.

#### Easy to Use

- You can connect up to three Contact Blocks in one stage for multistage expansion. (Screw terminal block type)
- Screw terminal structure is compatible with round crimp terminals. (Screw terminal block type)
- The terminals can be secured even when a contact block is mounted. (Screw terminal block type)
- · Contact Blocks can be attached in any direction for easy assembly.

#### Safety

- Easy-to-operate lock lever for secure locking.
- Easy-mounting Contact Blocks provide finger protection.
- No loose connections of wiring means maintenance-free use. (Push-In Plus terminal block type)

#### **Product Lineup**

• The buttons and bezels come in a wide variety of colors and shapes.

Refer to Safety Precautions for All Pushbutton Switches/ IIndicators and Safety Precautions on page 85.

#### **Button Colors**

	Non-lighted A30NN-□□□-N□ Switches Opaque		Red	Green	Yellow	White	Blue	Black

# Selector Switches A30NS/A30NW

30-mm dia. Knob-type Selector Switches Control panel miniaturization through a more compact design and modified wiring direction. Addition of Push-In Plus terminal blocks for easy wiring.

Workability and safety improvements.

#### **Easy to Use**

- You can connect up to three Contact Blocks in one stage for multistage expansion. (Screw terminal block type)
- Screw terminal structure is compatible with round crimp terminals. (Screw terminal block type)

#### Safety

- Easy-to-operate lock lever for secure locking.
- Easy-mounting Contact Blocks provide finger protection.
- No loose connections of wiring means maintenance-free use. (Push-In Plus terminal block type)

#### Product Lineup

• The buttons and bezels come in a wide variety of colors and shapes.

# • The buttons and bezels come in

# **Key-type Selector Switches**

# **A30NK**

30-mm dia. Key-type Selector Switches Control panel miniaturization through a more compact design and modified wiring direction. Addition of Push-In Plus terminal blocks for easy wiring.

Workability and safety improvements.

#### Easy to Use

- You can connect up to three Contact Blocks in one stage for multistage expansion. (Screw terminal block type)
- Screw terminal structure is compatible with round crimp terminals. (Screw terminal block type)
- The terminals can be secured even when a contact block is mounted. (Screw terminal block type)
- · Contact Blocks can be attached in any direction for easy assembly.

#### Safety

- · Easy-to-operate lock lever for secure locking.
- Easy-mounting Contact Blocks provide finger protection.
- No loose connections of wiring means maintenance-free use. (Push-In Plus terminal block type)

#### **Product Lineup**

• The buttons and bezels come in a wide variety of colors and shapes.

Refer to Safety Precautions for All Pushbutton Switches/
Indicators and Safety Precautions on page 85.

Protective Cover		-		A22NZ-A-303	A protector designed to prevent incorrect operation. Cannot be used together with other accessories. (Rubber seal included.) For 22.3 and 25.5-mm panel holes diameter. Key-type selector switches cannot be used.
Plastic Hole Plug		Round		A22NZ-A-401	Can be plugged into precut panel holes for future expansion. Applicable panel thickness: 0.8 to 3.0 mm For 22.3-mm panel hole diameter.
Metal Hole Plug		Ro	und	A22NZ-A-402	Can be plugged into precut panel holes for future expansion. Applicable panel thickness: 0.8 to 6.0 mm (Rubber seal included.) For 22.3-mm panel hole diameter.
Lock Ring		Round		A22NZ-A-403	Used when a more secure lock is required to prevent rotation inside the Operation Unit. (Rubber seal included.) For 22.3-mm panel hole diameter. Can be used together with the A22NZ-A-50501 Lock Ring.
Lock Ring	Ò			A22NZ-A-50501	Used when a more secure lock is required to prevent rotation of the Operation Unit. Can be used together with the A22NZ-A-403 Lock Ring. Can be used with the A22N Series and the A30N Series.
Reinforcement Plate	GER			A22NZ-A-C01	Used to reinforce Contact Blocks and Lighting Units, Refer to page 92 for mounting instructions.
Key	New North			A22NZ-K-01	Used with a key-type selector switch.
	-	1 hole		A22NZ-A-B101	
		T Hole		A22NZ-A-B201	For 22.3-mm panel hole diameter, A30N□ cannot be
		1 hole, yellow box		A22NZ-A-B101Y	used.
Control Box				A22NZ-A-B01Y	linked.
	202	2 h	oles	A22NZ-A-B102 A22NZ-A-B202	The A22NZ-A-B01Y and The A22NZ-A-B2□ model cannot be used for a double-contact unit of the Push-In
				A22NZ-A-B202 A22NZ-A-B103	Plus terminal block type.
		3 holes		A22NZ-A-B103	
		Suitable Cable	7 to 9 dia.	A22Z-3500-1	Plastic connector used to extend a cable from the
Connector		Diameter (mm)	9 to 11 dia.	A22Z-3500-2	switch box. Refer to page 95 for details.
		For flat	models	A22Z-3600F	Used to prevent dust or water from entering the Operation Unit.
Sealing Caps		For projection models		A22Z-3600T	Color: opaque Material: silicon For 22.3 and 25.5-mm panel holes diameter.
		For full-guard models		A22Z-3600G	Knob-type and key-type selector switches cannot be used.
Resin Attachment for 30 dia.		Round		A22Z-A30	Use when mounting to a panel with a 30-dia. hole. Refer to page 96 for details. Purchase and mount a separate Lock Ring when using an indicator.

### **Signal Word Definitions**

Precautions for Safe Use	Supplementary comments on what to do or avoid doing, to use the product safely.
Precautions for Correct Use	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction, or undesirable effects on product performance.

#### **Precautions for Safe Use**

# For both the Screw terminal block type and the Push-In Plus terminal block type

- Do not perform wiring with power supplied to the Switch/Indicator.
   Do not touch the terminals or other charged parts while power is being supplied. Doing so may result in electric shock.
- Do not disassemble or modify the Switch/Indicator under any circumstances.
- Doing so may prevent the Switch/Indicator from functioning to its full capability. Do not drop the Switch/Indicator. Do not apply pressure that may deform or alter the Switch/Indicator.
- The durability of the Switch varies considerably depending on the switching conditions. Always test the Switch/Indicator under actual working conditions before application and use the Switch/Indicator only for the number of switching operations allowed.
- Do not allow the load voltage and current to exceed the rated value. This may damage or burn out the Switch/Indicator.
- Do not use the Switch/Indicator in locations where explosive or flammable gases or liquid may be present or scattered. The electric ark or the heat caused by switching contacts may cause a fire or explosion.
- Do not use the Switch/Indicator in locations where toxic gases, such as H<sub>2</sub>S, SO<sub>2</sub>, NH<sub>3</sub>, HNO<sub>3</sub>, and Cl<sub>2</sub>, may be present, or in locations subject to high temperature or humidity. Doing so may damage the Switch/Indicator due to contact failure or corrosion.
- Do not use the Switch/Indicator submersed in oil or water, or in locations continuously subject to splashes of oil or water. Doing so may result in oil or water entering and damaging the Switch/ Indicator.
- Do not use or keep the Switch/Indicator under the following conditions:
  - Subject to severe temperature changes.
  - · Subject to high humidity or condensation.
  - · Subject to severe vibration or shock.
  - Where direct rays of the sun strike.
  - Where sea breeze may be present.
- Make sure that a rubber washer is present between the Operation Unit and the panel. Otherwise, the specifications of the protective structure may not be satisfied.
- Do not apply excessive force to the Switch or wiring.
   A damaged or deformed contact block may cause contact failure.
- Use an appropriate wire and ferrule.
- Exercise caution to avoid wiring errors when connecting the terminals.

 To prevent wiring materials from smoking or igniting, confirm wire ratings and use the wiring materials given in the following table.

**A22N/M22N/A30N** 

Model	Wire Type	Wire	Recommended Wires	Stripped length
A22N, M22N (Screw terminal block)	Solid wire/	Copper -	1.25 to 2.5 mm <sup>2</sup> / AWG 16 to 14	8 mm
A22N-P, M22N-P (Push-In Plus terminal block)	stranded wire		0.25 to 1.5 mm <sup>2</sup> / AWG 24 to 16	Ferrules not used: 8 mm

Use wiring crimp terminals and ferrule terminals of the specified size.

- For Push-In Plus terminal blocks, use only one wire per terminal.
   For screw terminal blocks, use no more than two wires of the same size and type with no more than two crimp terminals per terminal.
- After storing the product for a long time exceeding 1 year, perform, at a minimum, inspections of the operating characteristics, contact resistance, insulation resistance, and dielectric strength as well as evaluate the product under the working conditions.
- This Switch/Indicator is intended for indoor use only.
   Using the Switch/Indicator outdoors may result in failure.

#### **Push-In Plus Terminal Blocks**

- Do not wire anything to the release holes.
- Do not tilt or twist a flat-blade screwdriver while it is inserted into a release hole on the terminal block. The terminal block may be damaged.
- Insert a flat-blade screwdriver into the release holes at an angle.
   The terminal block may be damaged if you insert the screwdriver straight in.
- Do not allow the flat-blade screwdriver to fall out while it is inserted into a release hole.
- Do not bend a wire past its natural bending radius or pull on it with excessive force.
- Doing so may cause the wire disconnection.
- Do not insert more than one wire into each terminal insertion hole.
- Do not mount A22N-P Push-In Plus terminal contact blocks on A22N screw terminal blocks. Doing so may result in unsatisfactory performance.

#### **Precautions for Correct Use**

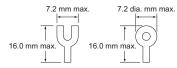

### Mounting

• Do not tighten the Mounting Nut more than necessary using tools such as pointed-nose pliers. Doing so will damage the Mounting Nut. (The tightening torque of the Mounting Nut is 1.0 to 2.0 N·m.)

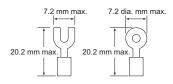

### Wiring (Screw terminal block)

- Terminal screws must be M3.5 Phillips or slotted screws with a square washer.
- The terminal screw tightening torque is 1.0 to 1.3 N·m.
- Solid wires, stranded wires, and crimp terminals can be connected to the Switch/Indicator.

Bare Crimp Terminals

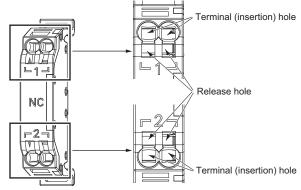

Crimp Terminals with Insulating Sheathes

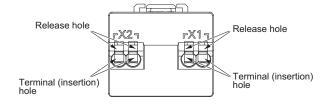

### Wiring (Push-in Plus terminal block)

1. Connecting Wires to the Push-In Plus Terminal Block

#### Part Names of the Terminal Block <A22N>

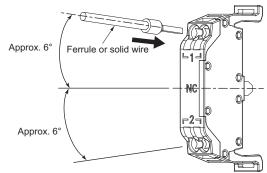

# <M22N>

#### **Connecting Wires with Ferrules and Solid Wires**

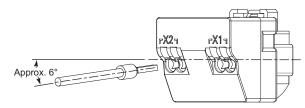

- Insert the solid wire or ferrule straight into the terminal block until the end strikes the terminal block. The angle should be approximately 6°.
- If a wire is difficult to connect because it is too thin, use a flat-blade screwdriver in the same way as when connecting stranded wires.

#### <A22N>

The wiring for the Lighting Unit and Contact Block (2 contacts) are the same as for the Contact Block (1 contact) shown in the above illustration.

#### <M22N>

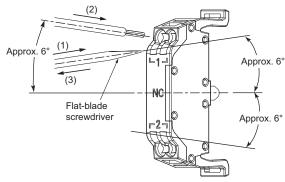

#### **Connecting Stranded Wires**

Use the following procedure to connect the wires to the terminal block.

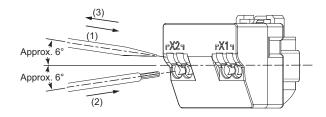

- Hold a flat-blade screwdriver at an angle and insert it into the release hole.
  - The angle should be approximately 6°. If the flat-blade screwdriver is inserted correctly, you will feel the spring in the release hole.
- 2. With the flat-blade screwdriver still inserted into the release hole, insert the wire into the terminal hole until the end strikes the terminal block
- 3. Remove the flat-blade screwdriver from the release hole.

#### <A22N>

The wiring and screwdriver angles for the Lighting Unit and Contact Block (2 contacts) are the same as for the Contact Block (1 contact) shown in the above illustration.

#### <M22N>

#### **Checking Connections**

- After the insertion, pull gently on the wire to make sure that it will not come off and it is securely fastened to the terminal block.
- If you use a ferrule with a conductor length of 10 mm, part of the conductor may be visible after the ferrule is inserted into the terminal block, but the product insulation distance will still be satisfied.

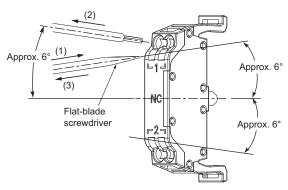

# 2. Removing Wires from the Push-In Plus Terminal Block

A22N/M22N/A30N

Use the following procedure to remove wires from the terminal block. The same method is used to remove stranded wires, solid wires, and ferrules.

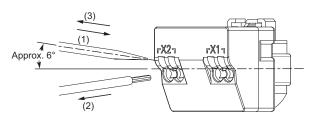

- Hold a flat-blade screwdriver at an angle and insert it into the release hole. The angle should be approximately 6°.
- 2. With the flat-blade screwdriver still inserted into the release hole, remove the wire from the terminal insertion hole.
- 3. Remove the flat-blade screwdriver from the release hole.

#### <A22N>

The wiring and screwdriver angles for the Lighting Unit and Contact Block (2 contacts) are the same as for the Contact Block (1 contact) shown in the above illustration.

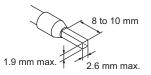

#### <M22N>

#### 3. Recommended Ferrules and Crimp Tools Recommended ferrules

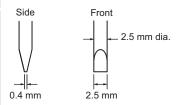

Applic		Ferrule Conductor			nmended f	nended ferrules

Recommended Crimp Tools		CRIMPFOX6 CRIMPFOX6T-F CRIMPFOX10S	PZ6 roto	Variocrimp4			

- Note: 1. Make sure that the outer diameter of the wire coating is smaller than the inner diameter of the insulation sleeve of the recommended ferrule.
  - 2. Make sure that the ferrule processing dimensions conform to the following figures.

# **Recommended Flat-Blade Screwdrivers**

Use a flat-blade screwdriver to connect and remove wires. Use one of the following flat-blade screwdrivers. The following table shows manufacturers and models as of 2015/Dec.

Model	Manufacturer
ESD 0,40 x 2,5	Wera
SZS 0,4 x 2,5 SZF 0-0,4 x 2,5 *	Phoenix Contact
0.4 x 2.5 x 75 302	Wiha
AEF.2,5 x 75	Facom
210-719	Wago
SDI 0.4 x 2.5 x 75	Weidmuller

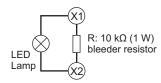

- OMRON's exclusive purchase model XW4Z-00B is available to order as SZF 0-0,4 x 2,5 (manufactured by Phoenix Contact).
- After wiring the Switch/Indicator, provide a sufficient insulation distance.

# The following information applies to both screw terminal blocks and Push-In Plus terminal blocks.

#### **LED Lamps**

- A current-limiting resistor is built in the LED lamp, so the installation of an external resistance is not required. A diode bridge is equipped in 6, 12, and 24 V specifications. As such, there is no specific polarity. Use only AC power for 100 and 200 V specifications.
- Lighting malfunction of the LED lamp A micro-current of approximately 0.1 mA or less is sufficient to turn on the LED lamps. Take a countermeasure like adding a resistor to prevent mis-lighting in parallel to the LED lamp. The micro-current varies with the machine (leak current or stray capacity between cables, etc.). Select resistance value and allowable power consumption that meet the actual current.

#### (Example of lighting malfunction prevention circuit) When using a 24-VAC/VDC lighted unit

## **Key-Type Selector Switches**

. Make sure to insert the key to the bottom of the cylinder before turning it.

## **Button Operation**

• Do not rotate or pull on the button on a Mushroom Switch. The button may come off, preventing operation.

# **Application**

# **Mounting to the Panel Panel Hole Dimensions**

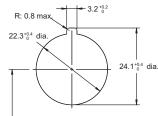

#### <A22N>

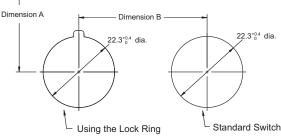

- Panel hole dimensions are given below.
- The recommended panel thicknesses are given below.

Panel hole dimension	Panel thickness *
22.3 dia.	0.8 to 5 mm
25.5 dia.	0.8 to 6 mm

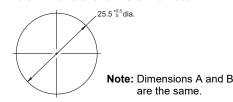

- \* Panel thickness without accessories (Lock Ring, etc.)
- If outer surface treatment such as coating is performed for the panel, the panel dimensions after outer surface treatment must meet the specified panel dimensions.
- The following figure gives pitch dimension A and pitch dimension B between the centers of the mounting holes.

#### Panel Hole Dimensions for 22.3 Diameter

#### Panel Hole Dimensions for 25.5 Diameter

## Dimension A

Wire type	Number of linked Contact Blocks	Number of wires per terminal	Minimum allowable pitch Dimension A (mm) or larger
Leads (stranded wire / solid wire)	1	1	50
Bare crimp terminals	1	1	50
Crimp terminals with insulating sheathes	1	1	60

Note: The minimum mounting pitch is based on three Contact Blocks in stage 1 with one wire attached to each terminal. If the Mounting Collar lock levers all face the same direction at the minimum mounting pitch, be sure to note the order the mounting collars are attached to the Operation Unit. If you attach two wires or link Units, determine the mounting pitch based on the dimensions diagrams and ease of operation and wiring.

### **Dimension A When Using Accessory**

- Dimension A is 50 mm minimum when a Standard Legend Plate Frame is attached.
- Dimension A is 51 mm minimum when a Large Legend Plate Frame is attached
- Dimension A is 75 mm minimum when a Protective Cover is attached.

#### Dimension B

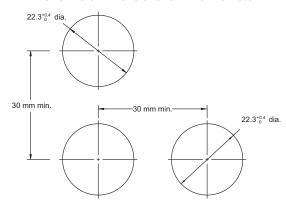

Operation Unit shape	Dimension B
Mushroom	40 mm min.
Other than the above	30 mm min.

**A22N/M22N/A30N** 

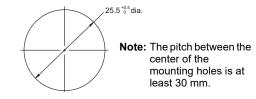

#### <M22N>

- Panel hole dimensions are given below.
- Acceptable panel thickness is between 0.8 and 6 mm.
- If outer surface treatment such as coating is performed for the panel, the panel dimensions after outer surface treatment must meet the specified panel dimensions.

#### Panel Hole Dimensions for 22.3 Diameter

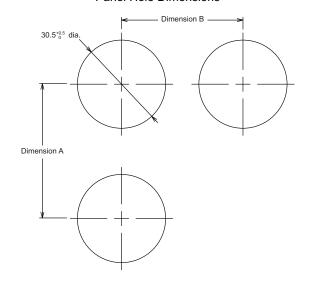

#### Panel Hole Dimensions for 25.5 Diameter

### <A30N>

- Panel hole dimensions are given below.
- Acceptable panel thickness is between 0.8 and 6 mm.
- If outer surface treatment such as coating is performed for the panel, the panel dimensions after outer surface treatment must meet the specified panel dimensions.
- The following figure gives pitch dimension A and pitch dimension B between the centers of the mounting holes.

#### Panel Hole Dimensions

#### **Dimension A**

Wire type	Number of linked Contact Blocks	Number of wires per terminal	Minimum allowable pitch Dimension A (mm) or larger
Leads (stranded wire / solid wire)	1	1	50
Bare crimp terminals	1	1	50
Crimp terminals with insulating sheathes	1	1	60

Note: The minimum mounting pitch is based on three Contact Blocks in stage 1 with one wire attached to each terminal. If the Mounting Collar lock levers all face the same direction at the minimum mounting pitch, be sure to note the order the mounting collars are attached to the Operation Unit. If you attach two wires or link Units, determine the mounting pitch based on the dimensions diagrams and ease of operation and wiring.

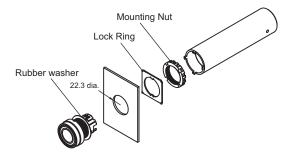

#### **Dimension B**

Operation Unit shape	Dimension B
Mushroom	40 mm min.
Other than the above	35 mm min.

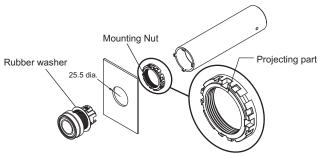

## **Mounting the Operation Unit**

#### <A22N>

• Panel Hole of 22.3-mm Diameter Insert the Operation Unit from the front of the panel, insert the Lock Ring and Mounting Nut from the back of the panel, and tighten the Mounting Nut. Before tightening, check that the rubber washer is present between the Operation Unit and the panel.

 Panel Hole of 25.5-mm Diameter Do not use the Lock Ring, and tighten the Mounting Nut while confirming that the projecting part (see following figure) on the Mounting Nut is aligned with mounting hole. Before tightening, check that the rubber washer is present between the Operation Unit and the panel.

• Align the Lock Ring with the slot on the case and insert it so that the edge is flush with the panel.

#### <A30N>

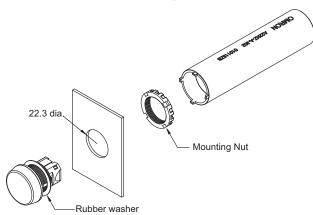

• Insert the Operation Unit from the front of the panel, insert the Lock Ring and Mounting Nut from the back of the panel, and tighten the Mounting Nut. Before tightening, check that the rubber washer is present between the Operation Unit and the panel.

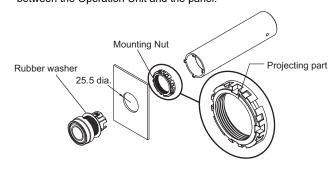

#### **Mounting the Indicator Unit**

#### <M22N>

• Panel Hole of 22.3-mm Diameter Insert the Indicator Unit from the front of the panel, insert the Mounting Nut from the back of the panel, and tighten the Mounting Nut. Before tightening, check that the rubber washer is present between the Indicator Unit and the panel.

 Panel Hole of 25.5-mm Diameter Tighten the Mounting Nut while confirming that the projecting part (see following figure) on the Mounting Nut is aligned with mounting hole. Before tightening, verify that the rubber washer is present between the Operation Unit and the panel.

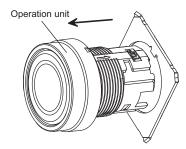

OMRON

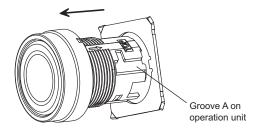

# **Mounting the Lock Ring**

#### <A22N/A30N>

 Align the grooves on the Operation Unit with the protruding parts of the Lock Ring and mount.

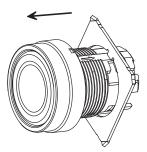

- When experiencing difficulties when mounting a Lock Ring, use the following procedure.
  - 1. Insert the Lock Ring into groove A on the Operation Unit.

When the Lock Ring is in the position shown in the figure below, rotate it to insert the protruding part of the Lock Ring into groove B on the Operation Unit.

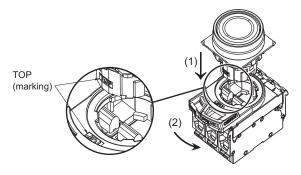

When the Lock Ring is in the position shown in the figure below, move it in the direction indicated by the arrow.

# Mounting the Contact Block to the Operation Unit <A22N/A30N>

 Insert the Operation Unit into the Mounting Collar, aligning the TOP mark inscribed on the Operation Unit with the lever on the Mounting Collar, and then turn the lever in the direction indicated by the arrow in the following figure all of the way until it clicks into place.

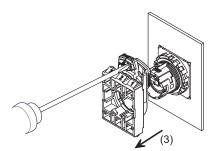

A22N/M22N/A30N

# Removing the Mounting Collar <A22N/A30N>

 Press the lock lever in from the back side to release the lock, and then hook the Mounting Collar with a screwdriver, move it in the direction indicated at (2), and remove it. Turn the lever all of the way until it clicks into place.

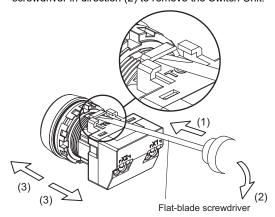

# Attaching the Switch Unit to the Indicator Unit <M22N>

 Align the "TOP" marks on the Indicator Unit and Switch Unit and insert the Indicator Unit into the Switch Unit. Insert it all the way until it clicks into place.

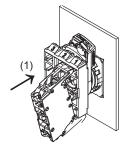

# Removing the Switch Unit <M22N>

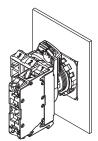

• Insert a screwdriver into the tab on the Switch Unit. Move the screwdriver in direction (2) to remove the Switch Unit.

# Contact Block and Lighting Unit Attaching the Contact Block and Lighting Unit

Catch the projection on the opposite side of the Mounting Collar from the lever side and press the Contact Block in the direction indicated at (1). Attach the Lighting Unit at Unit position 2 on the Mounting Collar.

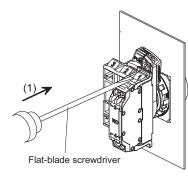

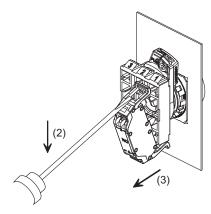

When attached

## Removing the Contact Block and Lighting Unit

 Insert a screwdriver into the gap between the Mounting Collar and Contact Block and press it inward in the direction shown at (2). A Lighting Unit can be removed at Unit position 2 on the Mounting Collar

# Attaching the Reinforcement Plate (Screw terminal block type)

• To link Contact Blocks together, attach a Reinforcement Plate in the direction shown in the following figure. To remove the Plate, insert a screwdriver in the direction indicated at (1) and rotate it in the direction indicated at (2).

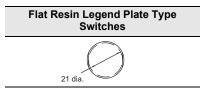

# **Engraving** (Except for Non-Lighted / Opaque Types)

- Engrave legends on the Legend Plates.
   Do so with the straight part of the Legend Plate positioned on the right and left.
- The characters must be engraved no deeper than 0.5 mm. Use an alcohol-based paint, such as a melamine, phthalic acid, or acrylic resin based paint.

#### <A22N/A30N>

Projected, Full-guard, or Mushroom Switches	Flat Switches
15.4 dia.	17.7 dia.

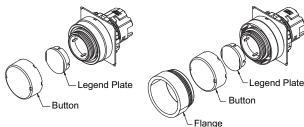

### <M22N>

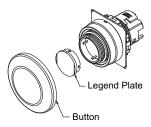

# Attaching Character Films (Except for Non-Lighted / Opaque Types) <A22N/A30N>

 To attach a character film, remove the Button and attach the film, aligning it with the straight portions of the Legend Plate.

# Projected Switches Full-guard Switches

#### **Mushroom Switches**

#### Flat Switches

 Prepare films of the following sizes depending on the type of Legend Plate.

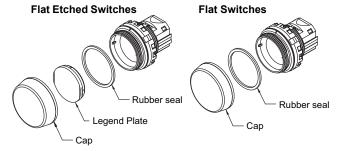

A22N/M22N/A30N

• The films must be provided by the user.

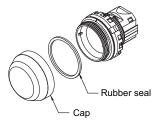

Projected, Full-guard, or Mushroom Switches	Legend Plate dimensions	Display range  15.4 dia.  1.6 5.15  1.7 July 1.6
	Film dimensions	17.1% dia.  17.4% T = 0.1 to 0.2 mm
Flat Switches File	Legend Plate dimensions	Display range 17.7 dia.
	Film dimensions	19.6° <sub>.0.2</sub> dia.  17.5° <sub>.0.2</sub> T = 0.1 to 0.2 mm

## <M22N>

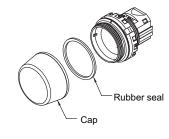

• To attach a character film, remove the Button and attach the film, aligning it with the straight portions of the Legend Plate.

#### **Semi-spherical Switches**

### **Projected Switches**

 Film processing dimensions should be as per the indications below.

Legend Plate dimensions	21 dia. 1
Film dimensions	22.7° <sub>02</sub> dia.  20.8° <sub>02</sub> T=0.1 to 0.2 mm

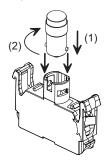

# Removing and Tightening the Cap

For all Switches except for Mushroom Switches, use the A22Z-3908 Cap Tightening Tool to loosen the cap. When you tighten the cap, make sure that the Legend Plate is in the correct position and then turn the cap in the direction opposite of the direction shown in the following figure. Tighten it to a torque of 0.5 to 1.0 N·m so that it will not become loose.

# Attaching the LED Lamp to the Lighting Unit

 Insert the protrusions on the LED Lamp into the guides on the Lighting Unit and then turn the LED Lamp in direction (2) to lock it in place.

# Attaching and Replacing LED Lamps Removing the LED Lamp from the Panel Surface

 Insert the LED Lamp Extractor as shown in the following figure and then rotate the Extractor in the direction shown at (2) while pressing it inward.

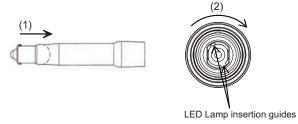

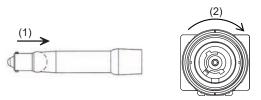

#### Attaching the LED Lamp from the Panel Surface

 Insert the LED Lamp into the LED Lamp Extractor as shown in the following figure. Align the projections on the LED Lamp with the LED Lamp insertion guides, insert the LED Lamp, and turn it in the direction indicted at (2).

#### <A22N>

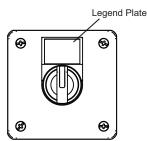

#### <M22N>

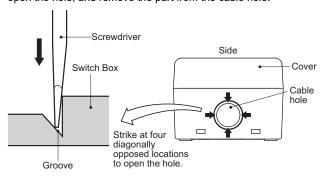

## **Control Box**

You can attach a Legend Plate Frame. Attach it in the direction shown in the following figure. Mount the Switch in the same way as for a standard panel. The tightening torque of the Box screws is 1.4 to 2.0 N·m.

#### Creating a Cable Hole

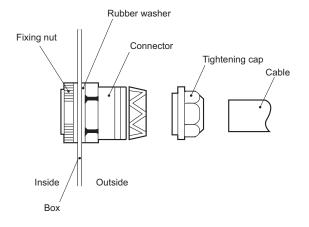

To open a cable hole, leave the cover attached, place the tip of a screwdriver in the grooves at four locations around the cable hole, strike the screwdriver with a hammer in order at the four locations to open the hole, and remove the part from the cable hole.

## Attaching the Connector and Cable

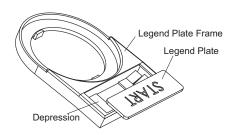

- Insert the connector into the cable port hole in the Box and secure with the fixing nut inside the box.
- 2. Run the cable through the tightening cap, insert the cable into the connector, and then tighten the hexagonal nut to secure the cable.

Cable diameter (mm)	Connector
7 to 9 dia.	A22Z-3500-1
9 to 11 dia.	A22Z-3500-2

### **Attaching and Removing Legend Plates**

- Press the Legend Plate into the depression in the Legend Plate Frame. The Legend Plate Frame can be separate or it can be mounted on the panel when you attach the Legend Plate.
- The direction of the characters will depend on the mounting direction of the Operation Unit if the Switch is a Selector Switch or Key Selector Switch.

- You can easily remove the Legend Plate by pressing it forwards from the back of the Legend Plate Frame.
- The acrylic plastic Legend Plate is easily damaged by shock.
   Handle it with care.

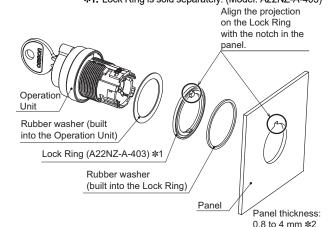

## Attaching the Lock Ring

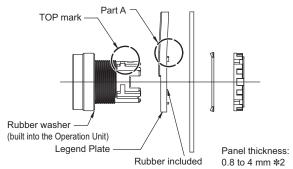

Attach the Lock Ring as shown in the following figure.

To ensure water resistance, attach the rubber washer in the specified location.

\*1. Lock Ring is sold separately. (Model: A22NZ-A-403)

 Align the TOP mark on the Operation Unit, part A on the Legend Plate, and the notch in the panel, and insert the Operation Unit.

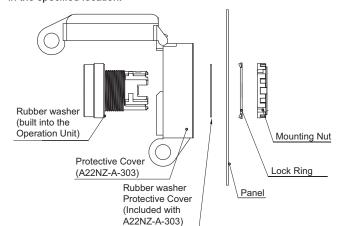

\*2. This is the panel thickness when using Lock Ring.

 If there is no notch in the panel, remove part A from the Legend Plate with pliers.

#### **Attaching the Protective Cover**

Attach the Protective Cover (A22NZ-A-303) to a panel that is 0.8 to 1.0 mm thick. To ensure water resistance, attach the rubber washer in the specified location.

## Attaching the Sealing Cap

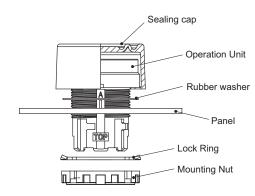

#### <A22N/M22N>

• Panel acceptable thickness is given below.

Panel hole dimension	Panel thickness
22.3 dia.	0.8 to 4.2 mm
25.5 dia.	0.8 to 5.2 mm

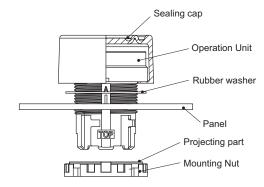

#### Panel Hole of 22.3-mm Diameter

Attach the Sealing cap as shown in the following figure. To ensure water resistance, attach the rubber washer in the specified location.

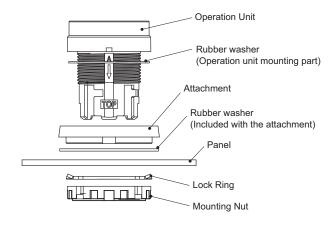

#### Panel Hole of 25.5-mm Diameter

Attach the Sealing cap as shown in the following figure. Do not use the Lock Ring, and tighten the Mounting Nut while confirming that the projecting part on the Mounting Nut is aligned with mounting hole. To ensure water resistance, attach the rubber washer in the specified location.

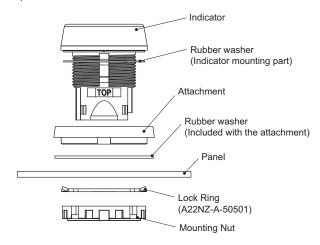

# Mounting the 30-dia. Resin Attachments

- Acceptable panel thickness is between 1.8 and 2.2 mm.
- Mount the attachment as shown in the following figure.
- To ensure water resistance, attach the rubber washer in the specified location.

#### <M22N>

- Acceptable panel thickness is between 1.8 and 2.2 mm.
- Mount the attachment as shown in the following figure.
- Purchase and mount a separate lock ring (A22NZ-A-50501).
- To ensure water resistance, attach the rubber washer in the specified location.

## Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

## Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

#### Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

### Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

## **Programmable Products.**

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

### Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

## Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

# **Errors and Omissions.**

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

Note: Do not use this document to operate the Unit.
