### Description

### Technical Details

## Description

These solid 2.5mm pitch connector cable pairs are great when you need something that can carry a couple amps of current, easy to connect and disconnect, and is just-about 0.1" pitch compatible.

These cables are nice and long, 20 cm each, in fact. They've got both small form factor and are a matching set, with an inline socket and plug connector. The two friction lock to make easy-breezy connections whenever you need light and small connectivity.

The two cables match with each other and with any JST XH compatible connectors. Wires are stranded 26 AWG.

[We carry a few different pin configurations for JST XH cables and connectors.](#)

## Technical Details

- Length (including connectors): approx 20cm each
- 26 AWG wires
- Connector Pitch: 2.5mm
