Description

Features

Can be used to program most AVR microcontrollers via USB (USBASP compatible. See http://www.fischl.de/usbasp/ for details)
A general purpose AVR Mega48 board with all I/Os brought to sides of board and holes matching 0.1 inch pitch prototype boards. Excellent for AVR experiments and developments. (Note: 07302 is shipped with ATmega48 on board)
Can be separately powered by adding two commonly available through-hole components
Compatible header provided for programming 062 oscilloscopes
Can be converted to Uart/USB converter by simply reflashing it with AVRCDC firmware (available at http://www.recursion.jp/avrcdc/) and adding one resistor

Accessory included:

10-core programming ribbon cable
Optional: miniUSB cable
