DESCRIPTION DOCUMENTS

These are bare non-addressable 5 meter long RGB LED strips that come packed with 60 5060 LEDs per meter, that's 300 LEDs. As these are bare LED strips that have no protective coating, your project won't be water proof but there is access to each 5060 LED and each strip length can be easily modified. You will be able to control and power the whole LED RGB Strip together with 12V giving you cool lighting effects for your car or perhaps under cabinet lighting in your kitchen!

Note: These come in 5m segments on a reel. They are preterminated with wires, as shown in the pictures.

★★★★☆ nice color strips

about 3 years ago by Member #323317 ✓ verified purchaser

These strips have good colors and nice brightness, far better than the elcheapo strips I purchased elsewhere. The only problem is the the blue and green wires are mislabeled.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
