Description

The RBD-12 series is a Buck-Boost constant current source designed for driving high power LED applications. Two output currents are available, 350mA and 500mA, and the maximum output voltage is 40V. The drivers have digital and analogue voltage dimming control and a regulated reference 5V output. Typical applications are solar, off-grid lighting, mobile traffic signs and battery-powered lighting. The wired version is IP67 rated.

All LED Drivers may not be used without a load. They must be switched on the primary side only. Noncompliance may damage the LED or reduce its lifetime.

Note 1: Output Current Accuracy is defined as:

$$\left[\frac{I_{out} - I_{out} \text{ "rated"}}{I_{out} \text{ "rated"}} \right] \times 100$$

Note 2: Output Current Stability is defined as:

$$\left[\frac{I_{out} \text{ "deviation"} - I_{out} \text{ "nominal"}}{I_{out} \text{ "nominal"}} \right] \times 100$$
 I_{out} (deviation) = maximum Deviation (min. Load, max. Load)
