Description

NetDecoder - DeviceNet Analyzer: Sniff, Analyze, Debug and Troubleshoot DeviceNet Networks Encompass Product Partner The NetDecoder - DeviceNet analyzer provides a comprehensive troubleshooting and diagnostics solution for solving communication problems on DeviceNet networks. USB-to-DeviceNet Cable (1784-U2DN) The DeviceNet analyzer supports the following DeviceNet interface cards: •Rockwell Automations 1784-U2DN USB interface. •Molex-SST's PCI and PCMCIA interfaces. The NetDecoder analyzer uses these cards as the sniffer interface into the DeviceNet network. The startup wizard provides the options to run the analyzer using any of these DeviceNet interfaces. The NetDecoder analyzer provides a wide range of features to simplify troubleshooting DeviceNet problems. These features include:
