Product Characteristics						
Compatible Fuses Size	3AB/AG					
Description	A low profile fuse block featuring individual barriers which reinforce the fuse clips while providing greater protection against clip damage and electrical shock. The unique design permits self-alignment of clips to fuse cap. This, plus a one-piece clip/terminal assures low contact resistance. Higher currect ratings have been attained using spring brass clips. With the exception of the two-pole unit, multiple pole units may be broken apart to obtain desired number of poles					
Dielectric Strength	2200V., Minimum					
Clip/Terminals	Tin plated phosphorus bronze except for 354900 series which is tin plated spring brass.					
Base	Glass reinforced Thermoplastic. UL 94V0 flammability rating. The standard base color is Gray except for 345 x21 items (single pole products which include anti-rotation boss option) where the standard base color is Black. Refer to the Ordering Information table on the following page for more information.					
Ambient Temperature	-40°Cto +85°C
