### DESCRIPTION

You turned off a TV with a kit you made! Adafruit offers a fun and exciting "badges" of achievement for electronics, science and engineering. We believe everyone should be able to be rewarded for learning a useful skill, a badge is just one of the many ways to show and share.

This is the "I made a TV-B-Gone kit!" badge for use with [educators](#), classrooms, workshops, [Maker Faires](#), [TechShops](#), [Hackerspaces](#), [Makerspaces](#) and around the world to reward beginners on their skill building journey! This beautiful badge is made in the USA.

"You can use TV-B-Gone (kit) to control access to television for philosophical or practical reasons, or simply to have fun!" —Mitch Altman, Inventor of TV-B-Gone and co-designer of the TV-B-Gone kit!

The badge is skillfully designed and sturdily made to last a life time, the backing is iron-on but the badge can also be sewn on.

### TECHNICAL DETAILS

Size: approx: 1.7" x 1.7" (44mm x 44mm).

<https://github.com/adafruit> Made for...

- Tajima professional multi-head embroidery machine
