

# 250mA Single LDO with Low $I_Q$ , Low Noise and High PSRR LDO

## ISL9021A

The ISL9021A is a single LDO, which provides high performance, low input voltage and high PSRR. It delivers guaranteed continuous 250mA load current and is stable with 1 $\mu$ F to 4.7 $\mu$ F of output capacitance ( $\pm$ 30%) with an ESR range of 5m $\Omega$  to 400m $\Omega$ .

The input voltage range for the ISL9021A is between 1.5V to 5.5V and the output voltage comes in many fixed voltage options with  $\pm$ 1.8% accuracy over-temperature, line and load ranges. The ISL9021A has typical PSRR of 75dB @ 10kHz and 50dB @ 1MHz.

The reverse current protection feature prevents current from flowing back to the power source when the output voltage is pulled higher than the input.

The ISL9021A is offered in tiny 4-bump 0.975mmx1.155mm WLCSP and 1.6mmx1.6mm 6 Ld  $\mu$ TDFN packages.

## Related Literature

- See [FN6867](#), ISL9021 “250mA Single LDO with Low  $I_Q$ , Low Noise and High PSRR LDO”

## Features

- High performance LDO with 250mA guaranteed continuous output current
- Input voltage range: 1.5V to 5.5V
- Output voltage range: 1.2V to 3.3V
- High PSRR: 75dB @ 10kHz, 50dB @ 1MHz
- Low quiescent current: 35 $\mu$ A
- Dropout voltage: <150mV @ 250mA
- Stable with 1 $\mu$ F to 4.7 $\mu$ F output capacitance ( $\pm$ 30%) with an ESR range of 5m $\Omega$  to 400m $\Omega$
- $\pm$ 1.8% output accuracy over-temperature/load/line
- Soft-start limits input current surge during enable
- Current limit and overheat protection
- -40 $^{\circ}$ C to +85 $^{\circ}$ C operating temperature range
- Available in 0.975mmx1.155mm 4-bump WLCSP package and 1.6mmx1.6mm 6 Ld  $\mu$ TDFN
- Pb-free (RoHS compliant)

## Applications

- PDAs, cell phones and smart phones
- Portable instruments, MP3 players
- Handheld devices including medical handheld

## Pin Descriptions

PIN NAME	$\mu$ TDFN PIN #	WLCSP PIN #	DESCRIPTION
VIN	1	B1	IC Supply/LDO Input. Connect a 1 $\mu$ F capacitor to GND.
NC	2, 5	-	No Connect.
GND	4	A2	System ground pin.
EN	3	A1	LDO Enable. When this signal goes high, the LDO is turned on.
VO, VOUT	6	B2	LDO Output. Connect a 1 $\mu$ F to 4.7 $\mu$ F capacitor to GND.
PAD	-	-	For $\mu$ TDFN package option only. Connect it to the system ground.

## Functional Description

The ISL9021A is a high performance low-dropout regulator (LDO) with 250mA sourcing capability. The extra low ground current makes this part a good choice for handheld product applications. The device also incorporates overcurrent, thermal shutdown, reverse current protections, and soft-start features.

Thermal shutdown protects the device against overheating. Soft-start limits the start-up input current surges. In some applications, the output voltage may be externally pulled higher than the input, or the input voltage could be connected to ground, or connected to some voltage lower than the output side. The ISL9021A features reverse current protection; that can block the reverse current from output to input.

### Enable Control

The ISL9021A has an enable pin. When EN is low, the IC is in shutdown mode. In this condition, all on-chip circuits are off, and the device draws minimum current, typically less than 0.1 $\mu$ A(typ). Driving this pin high will turn on the device.

### LDO Protections

The ISL9021A offers several protection functions, making it ideal for use in battery-powered applications. The ISL9021A provides short-circuit protection by limiting the output current at current limit of 260mA (min). If the short circuit lasts long enough, the die temperature increases, and the over-temperature protection circuit will shut down the output. When the die temperature reaches about +145°C, thermal protection starts to work with output being loaded with at least 50mA. Once the die temperature drops to about +110°C, the LDO will resume operation beginning with a soft-start.

The ISL9021A's reverse current protection is intended to block reverse conduction if output voltage is higher than input voltage.

### Input and Output Capacitors

The ISL9021A provides a linear regulator that has low quiescent current, fast transient response, and overall stable operation across the recommended operating conditions. A ceramic capacitor (X5R or X7R) with a capacitance of 1 $\mu$ F to 4.7 $\mu$ F with an ESR up to 400m $\Omega$  is suitable for the ISL9021A to maintain its output stability. The ground connection of the output capacitor should be routed directly to the GND pin of the device, and also placed close to the IC. Similarly for the input capacitor, usually a 1 $\mu$ F ceramic capacitor (X5R or 7R) is suitable for most cases, but if a large, fast rising load transient condition is expected, a higher value input capacitor may be necessary to achieve satisfactory performance.

### Board Layout Recommendations

A good PCB layout is an important step to achieve good performance. It is recommended to design the board with separate ground planes for input and output, and connect both ground planes at the GND pin of the IC. Consideration should be taken when placing the components and routing the trace to minimize the ground impedance, and keep the parasitic inductance low. Usually the input/output capacitors should be placed as close to the IC as possible with a good ground connection.

The revision history provided is for informational purposes only and is believed to be accurate, but not warranted. Please go to web to make sure you have the latest revision.

DATE	REVISION	CHANGE
December 17, 2012	FN7845.3	Added evaluation boards and ISL9021AIIUZ-T to "Ordering Information" on page 3.
December 2, 2011	FN7845.2	Changed CSP package dimension from "2mmx2mm" to "0.975mmx1.155mm" on page 1 to page 3.
October 7, 2011	FN7845.1	Updated "Ordering Information" on page 3 by adding ISL9021AIRUYZ-T and ISL9021AIRUYZ-T7A parts. Made corrections to part markings and added -T7A parts.
May 27, 2011	FN7845.0	Initial Release

## About Intersil

Intersil Corporation is a leader in the design and manufacture of high-performance analog, mixed-signal and power management semiconductors. The company's products address some of the fastest growing markets within the industrial and infrastructure, personal computing and high-end consumer markets. For more information about Intersil or to find out how to become a member of our winning team, visit our website and career page at [www.intersil.com](http://www.intersil.com).

For a complete listing of Applications, Related Documentation and Related Parts, please see the respective product information page. Also, please check the product information page to ensure that you have the most updated datasheet: [ISL9021A](#)

To report errors or suggestions for this datasheet, please go to: [www.intersil.com/askourstaff](http://www.intersil.com/askourstaff)

Reliability reports are available from our website at: <http://rel.intersil.com/reports/search.php>

For additional products, see [www.intersil.com/product\\_tree](http://www.intersil.com/product_tree)

Intersil products are manufactured, assembled and tested utilizing ISO9000 quality systems as noted in the quality certifications found at [www.intersil.com/design/quality](http://www.intersil.com/design/quality)

*Intersil products are sold by description only. Intersil Corporation reserves the right to make changes in circuit design, software and/or specifications at any time without notice. Accordingly, the reader is cautioned to verify that data sheets are current before placing orders. Information furnished by Intersil is believed to be accurate and reliable. However, no responsibility is assumed by Intersil or its subsidiaries for its use; nor for any infringements of patents or other rights of third parties which may result from its use. No license is granted by implication or otherwise under any patent or patent rights of Intersil or its subsidiaries.*

6 LEAD ULTRA THIN DUAL FLAT NO-LEAD COL PLASTIC PACKAGE (UTDFN COL)

Rev 1, 11/07

#### NOTES:

1. Dimensions are in millimeters.  
Dimensions in ( ) for Reference Only.
2. Dimensioning and tolerancing conform to AMSE Y14.5m-1994.
3. Unless otherwise specified, tolerance : Decimal  $\pm 0.05$
4. Dimension b applies to the metallized terminal and is measured between 0.15mm and 0.30mm from the terminal tip.
5. Tiebar shown (if present) is a non-functional feature.
6. The configuration of the pin #1 identifier is optional, but must be located within the zone indicated. The pin #1 identifier may be either a mold or mark feature.
