B43305

Snap-in capacitors

Ultra compact - 85 °C

#### General-purpose grade capacitors

#### Applications

- Frequency converters
- Solar inverters
- Uninterruptible power supplies
- Professional power supplies
- Medical appliances
- Telecommunications

#### Features

- Voltage derating (0.93 · V<sub>R</sub>) enables 105 °C operation,more details available upon request
- Extremely high CV product, ultra compact
- High ripple current capability
- Different case sizes available for each capacitance value
- Capacitors with all insulation versions pass the needle flame test according to IEC 60695-11-5 for all flame exposure times up to 120 s
- RoHS-compatible

#### Construction

- Charge/discharge-proof, polar
- Aluminum case, fully insulated with PVC
- Version with PET insulation available
- Version with additional PET insulation cap on terminal side available for insulating the capacitor from the PCB
- Snap-in solder pins to hold component in place on PC-board
- Minus pole marking on case surface
- Minus pole not insulated from case
- Overload protection by safety vent on the base

#### Terminals

- Standard version with 2 terminals,
- 2 lengths available: 6.3 and 4.5 mm
- 3 terminals to ensure correct insertion: length 4.5 mm

B43305

Ultra compact - 85  $^{\circ}$ C

#### Specifications and characteristics in brief

Rated voltage V <sub>R</sub>	200 450 V DC					
Surge voltage Vs	$1.15 \cdot V_{R}$ (for $V_{R} \le 250$ V DC)					
	$1.10 \cdot V_R$ (for $V_R \ge 400 \text{ V DC}$ )					
Rated capacitance C <sub>R</sub>	68 3300 μF					
Capacitance tolerance	±20% ≙ M					
Dissipation factor tan $\delta$	$V_{\rm B} \leq 250 \text{ V DC}$ : tan $\delta \leq 0.15$					
(20 °C, 120 Hz)	$V_{\rm R} \ge 400 \text{ V DC}$ : tan	$\delta \leq 0.20$				
Leakage current I <sub>leak</sub> (5 min, 20 °C)	$I_{\text{leak}} \le 0.3 \ \mu\text{A} \cdot \left(\frac{C_{\text{F}}}{\mu\text{F}}\right)$	$\left(\frac{V_R}{V}\right)^{0.7}$	+ 4 μΑ			
Self-inductance ESL	Approx. 20 nH

#### **Dimensional drawings**

#### Snap-in capacitors with standard insulation (PVC or PET)

Snap-in terminals, length  $(6.3 \pm 1)$  mm. Also available in a shorter version with a length of (4.5 - 1) mm. PET insulation is marked with label "PET" on the sleeve.

Dimensi			Packing
d +1	l ±2	weight (g)	units (pcs.)

## **☆TDK**

#### Packing of snap-in capacitors

For ecological reasons the packing is pure cardboard. Components can be withdrawn (in full or in part) in the correct position for insertion.

#### Ordering codes for terminal styles and insulation features

Snap-in capacitors

#### **Cautions and warnings**

#### Personal safety

The electrolytes used by EPCOS have been optimized both with a view to the intended application and with regard to health and environmental compatibility. They do not contain any solvents that are detrimental to health, e.g. dimethyl formamide (DMF) or dimethyl acetamide (DMAC).

Furthermore, some of the high-voltage electrolytes used by EPCOS are self-extinguishing.

As far as possible, EPCOS does not use any dangerous chemicals or compounds to produce operating electrolytes. However, in exceptional cases, such materials must be used in order to achieve specific physical and electrical properties because no alternative materials are currently known. However, the amount of dangerous materials used in our products is limited to an absolute minimum.

Materials and chemicals used in EPCOS aluminum electrolytic capacitors are continuously adapted in compliance with the EPCOS Corporate Environmental Policy and the latest EU regulations and guidelines such as RoHS, REACH/SVHC, GADSL, and ELV.

MDS (Material Data Sheets) are available on the EPCOS website for all types listed in the data book. MDS for customer specific capacitors are available upon request. MSDS (Material Safety Data Sheets) are available for all of our electrolytes upon request.

Nevertheless, the following rules should be observed when handling aluminum electrolytic capacitors: No electrolyte should come into contact with eyes or skin. If electrolyte does come into contact with the skin, wash the affected areas immediately with running water. If the eyes are affected, rinse them for 10 minutes with plenty of water. If symptoms persist, seek medical treatment. Avoid inhaling electrolyte vapor or mists. Workplaces and other affected areas should be well ventilated. Clothing that has been contaminated by electrolyte must be changed and rinsed in water.

B43305 Ultra compact – 85 °C

#### Product safety

The table below summarizes the safety instructions that must be observed without fail. A detailed description can be found in the relevant sections of chapter "General technical information".

Торіс	Safety information	Reference chapter "General technical information"
Polarity	Make sure that polar capacitors are connected with the right polarity.	1 "Basic construction of aluminum electrolytic capacitors"
Reverse voltage	Voltages polarity classes should be prevented by connecting a diode.	3.1.6 "Reverse voltage"
Mounting position of screw- terminal capacitors	Do not mount the capacitor with the terminals (safety vent) upside down.	11.1. "Mounting positions of capacitors with screw terminals"
Robustness of terminals	The following maximum tightening torques must not be exceeded when connecting screw terminals: M5: 2.5 Nm M6: 4.0 Nm	11.3 "Mounting torques"
Mounting of single-ended capacitors	The internal structure of single-ended capacitors might be damaged if excessive force is applied to the lead wires. Avoid any compressive, tensile or flexural stress. Do not move the capacitor after soldering to PC board. Do not pick up the PC board by the soldered capacitor. Do not insert the capacitor on the PC board with a hole space different to the lead space specified.	11.4 "Mounting considerations for single-ended capacitors"
Soldering	Do not exceed the specified time or temperature limits during soldering.	11.5 "Soldering"
Soldering, cleaning agents Upper category	Do not allow halogenated hydrocarbons to come into contact with aluminum electrolytic capacitors. Do not exceed the upper category temperature.	11.6 "Cleaning agents" 7.2
temperature		"Maximum permissible operating temperature"
Passive flammability	Avoid external energy, such as fire or electricity.	8.1 "Passive flammability"

Topic Active flammability	Safety information Avoid overload of the capacitors.	Reference chapter "General technical information" 8.2 "Active flammability"
Maintenance	Make periodic inspections of the capacitors. Before the inspection, make sure that the power supply is turned off and carefully discharge the electricity of the capacitors. Do not apply any mechanical stress to the capacitor terminals.	10 "Maintenance"
Storage	Do not store capacitors at high temperatures or high humidity. Capacitors should be stored at +5 to +35 °C and a relative humidity of $\leq$ 75%.	7.3 Storage conditions
		Reference chapter "Capacitors with screw terminals"
Breakdown strength of insulating sleeves	Do not damage the insulating sleeve, especially when ring clips are used for mounting.	"Screw terminals – accessories"

#### Symbols and terms

Symbol	English	German	
С	Capacitance	Kapazität	
C <sub>R</sub>	Rated capacitance	Nennkapazität	
Cs	Series capacitance	Serienkapazität	
C <sub>S,T</sub>	Series capacitance at temperature T	Serienkapazität bei Temperatur T	
C <sub>f</sub>	Capacitance at frequency f	Kapazität bei Frequenz f	
d	Case diameter, nominal dimension	Gehäusedurchmesser, Nennmaß	
d <sub>max</sub>	Maximum case diameter	Maximaler Gehäusedurchmesser	
ESL	Self-inductance	Eigeninduktivität	
ESR	Equivalent series resistance	Ersatzserienwiderstand	
ESR <sub>f</sub>	Equivalent series resistance at frequency f	Ersatzserienwiderstand bei Frequenz f	
ESR⊤	Equivalent series resistance at temperature T	Ersatzserienwiderstand bei Temperatur T	
f	Frequency	Frequenz	
I	Current	Strom	
I <sub>AC</sub>	Alternating current (ripple current)	Wechselstrom	
I <sub>AC,rms</sub>	Root-mean-square value of alternating current	Wechselstrom, Effektivwert	
I <sub>AC,f</sub>	Ripple current at frequency f	Wechselstrom bei Frequenz f	
I <sub>AC,max</sub>	Maximum permissible ripple current	Maximal zulässiger Wechselstrom	
I <sub>AC,R</sub>	Rated ripple current	Nennwechselstrom	
I <sub>AC,R</sub> (B)	Rated ripple current for base cooling	Nennwechselstromstrom für Bodenkühlung	
I <sub>leak</sub>	Leakage current	Reststrom	
I <sub>leak,op</sub>	Operating leakage current	Betriebsreststrom	
I	Case length, nominal dimension	Gehäuselänge, Nennmaß	
I <sub>max</sub>	Maximum case length (without terminals and mounting stud)	Maximale Gehäuselänge (ohne Anschlüsse und Gewindebolzen)	
R	Resistance	Widerstand	
R <sub>ins</sub>	Insulation resistance	Isolationswiderstand	
R <sub>symm</sub>	Balancing resistance	Symmetrierwiderstand	
Т	Temperature	Temperatur	
ΔT	Temperature difference	Temperaturdifferenz	
T <sub>A</sub>	Ambient temperature	Umgebungstemperatur	
Tc	Case temperature	Gehäusetemperatur	
Т <sub>в</sub>	Capacitor base temperature	Temperatur des Becherbodens	
t	Time	Zeit	
Δt	Period	Zeitraum	
t <sub>b</sub>	Service life (operating hours)	Brauchbarkeitsdauer (Betriebszeit)	

Page 18 of 20

Symbol	English	German
V	Voltage	Spannung
V <sub>F</sub>	Forming voltage	Formierspannung
V <sub>op</sub>	Operating voltage	Betriebsspannung
V <sub>R</sub>	Rated voltage, DC voltage	Nennspannung, Gleichspannung
Vs	Surge voltage	Spitzenspannung
X <sub>c</sub>	Capacitive reactance	Kapazitiver Blindwiderstand
XL	Inductive reactance	Induktiver Blindwiderstand
Z	Impedance	Scheinwiderstand
Ζ <sub>τ</sub>	Impedance at temperature T	Scheinwiderstand bei Temperatur T
an δ	Dissipation factor	Verlustfaktor
λ	Failure rate	Ausfallrate
ε <sub>o</sub>	Absolute permittivity	Elektrische Feldkonstante
e <sub>r</sub>	Relative permittivity	Dielektrizitätszahl
ω	Angular velocity; $2 \cdot \pi \cdot f$	Kreisfrequenz; $2 \cdot \pi \cdot f$

Note

All dimensions are given in mm.

#### Important notes

The following applies to all products named in this publication:

- 1. Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. As a rule, EPCOS is either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an EPCOS product with the properties described in the product specification is suitable for use in a particular customer application.
- 2. We also point out that in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or lifesaving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
- 3. The warnings, cautions and product-specific notes must be observed.
- 4. In order to satisfy certain technical requirements, some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous). Useful information on this will be found in our Material Data Sheets on the Internet (www.epcos.com/material). Should you have any more detailed questions, please contact our sales offices.
- 5. We constantly strive to improve our products. Consequently, the products described in this publication may change from time to time. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also reserve the right to discontinue production and delivery of products. Consequently, we cannot guarantee that all products named in this publication will always be available. The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
- Unless otherwise agreed in individual contracts, all orders are subject to the current version of the "General Terms of Delivery for Products and Services in the Electrical Industry" published by the German Electrical and Electronics Industry Association (ZVEI).
- 7. The trade names EPCOS, BAOKE, Alu-X, CeraDiode, CeraLink, CeraPlas, CSMP, CSSP, CTVS, DeltaCap, DigiSiMic, DSSP, FilterCap, FormFit, MiniBlue, MiniCell, MKD, MKK, MLSC, MotorCap, PCC, PhaseCap, PhaseCube, PhaseMod, PhiCap, SIFERRIT, SIFI, SIKOREL, SilverCap, SIMDAD, SiMic, SIMID, SineFormer, SIOV, SIP5D, SIP5K, ThermoFuse, WindCap are trademarks registered or pending in Europe and in other countries. Further information will be found on the Internet at www.epcos.com/trademarks.
