

UD10-XX-XX-SS

Ruland UD10-XX-XX-SS, Machinable Bore Double Universal Joint, Friction Bearing, Steel, 0.620" (15.7mm) OD, 3.250" (82.6mm) Length

Description

Ruland UD10-XX-XX-SS is a double cardan friction bearing universal joint with plain bores that can be machined to a bore size and geometry of the user's choice. It has a 0.620" (15.7mm) OD and 3.250" (82.6mm) length. UD10-XX-XX-SS is ideal for applications with wide distances between shafts and can accommodate all forms of misalignment. This plain bearing double universal joint is comprised of pins and blocks that are precision machined, selectively heat treated, and ground for high strength, accuracy, and wear resistance. The combination of these components with precision ground and hardened yoke ears allow for a longer lifespan, increased performance in demanding applications, and greater angular misalignment of up to 90° when compared to commodity style double universal joints. UD10-XX-XX-SS is made from high grade stainless steel for increased corrosion resistance. It can be combined with boot UBOOT10/15-NI-KIT to protect the joints from unwanted contaminants such as dust or water and self lubricate reducing maintenance time. This double cardan universal joint is manufactured in the USA by Belden Universal for strict control of processes.
