

VMSF50-22-M10-70-70-ZN

Ruland VMSF50-22-M10-70-70-ZN, Rubber Bumper, 50mm OD, M10 Threaded Stud, 70mm Stud Length, 22mm Height, 70 Shore A Nitrile Jacket, Steel

Description

Ruland VMSF50-22-M10-70-70-ZN is a rubber leveling foot with a threaded stud. It has a 50mm outside diameter, M10 threaded stud, 70mm stud length, and 22mm height. This rubber leveling foot can be used on a floor or other flat surface to dampen shock loads and reduce noise and wear on industrial equipment such as conveyors, motors, fans, and pumps. The threaded stud is riveted to the body which allows it to directly withstand compressive forces and effectively transmit the load to the rubber jacket. This is critical as loads are often unevenly distributed during operation due to imperfections in the floor or surface the leveling foot rests on. VMSF50-22-M10-70-70-ZN can be mounted to the system by passing it through an unthreaded hole and securing with a nut or threading it directly into tapped holes on the component it will be mounted to. The rubber jacket is made from nitrile for better wear and corrosion resistance than natural rubber. It has 70 Shore A hardness for high rigidity and load capacity. The zinc plated steel body allows for high strength and is suitable for most industrial applications. VMSF50-22-M10-70-70-ZN is manufactured by Otto Ganter, inventoried by Ruland, and RoHS3 compliant.

Product Specifications

Outer Diameter (OD)	1.97 in (50 mm)	Height (H1)	0.87 in (22 mm)
Thread (TH)	M10 x 1.5	Plate Thickness (PT)	0.1 in (2.5 mm)
Stud Length (LS)	2.76 in (70 mm)	Shore Hardness	70A (+/- 5)
Geometry	Cylindrical	Rubber Material	Nitrile
Metal Material	Zinc Plated Steel	Metallic Body Finish	Zinc-Plated
Manufacturer	JW Winco/ Otto Ganter	Country of Origin	Germany
Weight (lbs)	0.242700	UPC	634529364345
Tariff Code	4016.99.6000	UNSPC	31162804
Note 1	Performance ratings are for guidance only. The user must determine suitability for a particular application.
